**Focus** Mike Schmoker, 2018-07-16 In this 2nd edition of Focus Elevating the Essentials to Radically Improve Student Learning Mike Schmoker extends and updates the case that our schools could be on the cusp of swift unparalleled improvements But we are stymied by a systemwide failure to simplify and prioritize we have yet to focus our limited time and energy on the most essential widely acknowledged evidence based practices that could have more impact than all other initiatives combined They are simple coherent curricula straightforward traditional literacy practices and lessons built around just a few hugely effective elements of good teaching As Schmoker demonstrates the case for these practices and the need for them has grown prodigiously In every chapter you ll find late breaking discoveries and practical advice on how to simplify the implementation of new state standards in the subject areas on the hidden pitfalls of our most popular but unproven instructional fads and programs and on simple versatile strategies for building curriculum planning lessons and integrating literacy into every discipline All of these strategies and findings are supported with exciting new evidence from

actual schools Their success confirms as Michael Fullan writes that a focus on the best high leverage practices won't only improve student performance they will produce stunningly powerful consequences in our schools

**Space-Age Acronyms**  
Reta C. Moser, 2012-12-06 Acronym agglomeration is an affliction of the age and there are acronym addicts who in their weakness find it impossible to resist them More than once in recent months my peers have cautioned me about my apparent readiness to use not only acronyms but abbreviations foreignisms codes and other cryptic symbols rather than common ordinary American words Many among us though either have not received or have chosen to ignore such advice As a consequence what we write and speak is full of mystery and confusion It is then for the reader and listener and for the writer and speaker that Reta C Moser has compiled this guide Its effective application to the art of communication is urged Such use should help avoid many of the misunderstandings involving terminology which occur daily Although such misunderstandings are certainly crucial in humanistic and social situations they are often of immediate import and the trigger to disaster in scientific technical and political situations Some 15 000 acronyms and 25 000 definitions are provided a 50 and 47 percent increase over the 1964 edition with due credit to Miss Moser's diligence in making the compilation and with the acknowledgment that the acronymical phenomenon is very much with us This edition like the first is certain to be of value to writers librarians editors and others who must identify and deal with acronyms

**Neoliberalism and Education**  
Kalwant Bhopal, Farzana Shain, 2017-10-02 Neoliberalism and Education Rearticulating Social Justice and Inclusion offers a critical reflection on the establishment of neoliberalism as the new global orthodoxy in the field of education and considers what this means for social justice and inclusion It brings together writers from a number of countries who explore notions of inclusion and social justice in educational settings ranging from elementary schools to higher education Contributors examine policy practice and pedagogical considerations covering different dimensions of inequality including disability race gender and class They raise questions about what social justice and inclusion mean in educational systems that are dominated by competition benchmarking and target driven accountability and about the new forms of imperialism and colonisation that both drive and are a product of market driven reforms While exposing the entrenchment under current neoliberal systems of educational provision of longstanding patterns of racialised classed and gendered privilege and disadvantage the contributions presented in this book also consider the possibilities for hope and resistance drawing attention to established and successful attempts at democratic education or community organisation across a number of countries This book was originally published as a special issue of the British Journal of Sociology of Education
