Hiller,2009-05-01 Combining statistical analysis and ethnographic study Harry Hiller uncovers two waves of in migration to Alberta His innovative approach begins with the individual migrant and analyzes the relocation experience from origin to destination Through interviews with hundreds of migrants Hiller shows that migration is complex and dynamic shaped not just by what Alberta offers but also prompted by a process that begins in the region of origin which makes migration possible and helps determine whether migrants stay or return home By combining a social psychological approach with structural factors such as Alberta s transition from a regional hinterland province to its emerging role the global system discussions of gender the internet and folk culture Second Promised Land provides a multi dimensional and deeply human account of a contemporary Canadian phenomenon

Urban Canada Harry H. Hiller,2009 Urbanization is a fact of Canadian life With approximately 80 per cent of Canadians residing in cities it is imperative that students understand the issues associated with urban living Urban Canada approaches the study of city life in two ways A demographic approach examines the movements of people to cities while a socio cultural one emphasizes the pervasiveness of urban oriented thinking culture and organization within society Urban Canada provides a succinct discussion of urban issues from a uniquely Canadian perspective

Second Promised Land Harry H. Hiller,2009 Explosive economic growth in resource rich Alberta has led to a stunning increase in its population In contrast to Ontario and British Columbia which have grown primarily through international migration Alberta has become a magnet for internal migrants contributing to population redistribution within Canada with significant national social and economic consequences Combining statistical analysis and ethnographic study Harry Hiller uncovers two waves of in migration to Alberta His innovative approach begins with the individual migrant and analyzes the relocation experience from origin to destination Through interviews with hundreds of migrants Hiller shows that migration is complex and dynamic shaped not just by what Alberta offers but also prompted by a process that begins in the region of origin that makes migration possible and helps determine whether migrants stay or return home By combining a social psychological approach with structural factors such as Alberta s transition from a regional hinterland province to its emerging role the global system discussions of gender The internet and folk culture Second Promised Land provides a multi dimensional and deeply human account of a contemporary Canadian phenomenon

Host Cities and the Olympics Harry H. Hiller,2014 Rather than interpreting the Olympics as primarily a sporting event of international or national significance this book understands the Games as a civic project for the host city that serves as a catalyst for a variety of urban interests over a period of many years from the bidding phase through the event itself Traditional Olympic studies have tended to examine the Games from an outsider s perspective or as something experienced through the print media or television In contrast the focus presented here is on the dynamics within the host city understood as a community of interacting individuals who encounter the Games in a variety of ways through support opposition or even indifference but who have a profound influence on the outcome of the Games as actors and players in the Olympics as a drama Adopting a symbolic interactionist approach the book offers a new interpretive model through which to understand the Olympic Games by exploring the relationship between the Games and residents of the host city Key analytical concepts such as framing dramaturgy the public realm and the symbolic field are introduced and illustrated through empirical research from the Vancouver 2010 Winter Games and it is shown how the social media and shifts in public opinion reflected interaction effects within the city By filling a clear lacuna in the Olympic Studies canon this book is important reading for anybody with an interest in the sociology of sport urban studies event studies or urban sociology

Urban Neighborhoods in a New Era Clarence N. Stone, Robert P. Stoker, 2015-09-18 For decades North American cities racked by deindustrialization and population loss have followed one primary path in their attempts at revitalization a focus on economic growth in downtown and business areas Neighborhoods meanwhile have often been left severely underserved There are however signs of change This collection of studies by a distinguished group of political scientists and urban planning scholars offers a rich analysis of the scope potential and ramifications of a shift still in progress Focusing on neighborhoods in six cities Baltimore Chicago Denver Los Angeles Phoenix and Toronto the authors show how key players including politicians and philanthropic organizations are beginning to see economic growth and neighborhood improvement as complementary goals The heads of universities and hospitals in central locations also find themselves facing newly defined realities adding to the fluidity of a new political landscape even as structural inequalities exert a continuing influence While not denying the hurdles that community revitalization still faces the contributors ultimately put forth a strong case that a more hospitable local milieu can be created for making neighborhood policy In examining the course of experiences from an earlier period of redevelopment to the present postindustrial city this book opens a window on a complex process of political change and possibility for reform

Making Knowledge Count Peter Harries-Jones, 1991 Largely due to the impact of human rights legislation especially in Canada the radical dissent of the 1960s has been replaced by the more co operative framework of social advocacy Political activity is no longer necessarily radical or rooted in social class but instead expresses broad themes of cultural aspiration Consequently social activists and social scientists need a new understanding of the role of dissent in society Peter Harries Jones and the contributing authors provide that understanding in *Making Knowledge Count*
