Korte, S.I. Newhouse School of Public Communications, 1998 *Mediated Interpersonal Communication* Elly A. Konijn, Sonja Utz, Martin Tanis, Susan B. Barnes, 2008-06 Mediated interpersonal communication is one of the most dynamic areas in communication studies reflecting how individuals utilize technology more and more often in their personal interactions Organizations also rely increasingly on mediated interaction for their communications Responding to this evolution in communication this collection explores how existing and new personal communication technologies facilitate and change interpersonal interactions Chapters offer in depth examinations of mediated interpersonal communication in various contexts and applications Contributions come from well known scholars based around the world reflecting the strong international interest and work in the area Personal Connections in the Digital Age Nancy K. Baym, 2015-08-04 The internet and the mobile phone have disrupted many of our conventional understandings of ourselves and our relationships raising anxieties and hopes about their effects on our lives In this second edition of her timely and vibrant book Nancy Baym provides frameworks for thinking critically about the roles of digital media in personal relationships Rather than providing exuberant accounts or cautionary tales it offers a data grounded primer on how to make sense of these important changes in relational life Fully updated to reflect new developments in technology and digital scholarship the book identifies the core relational issues these media disturb and shows how our talk about them echoes historical discussions about earlier communication technologies Chapters explore how we use mediated language and nonverbal behavior to develop and maintain communities social networks and new relationships and to maintain existing

relationships in our everyday lives The book combines research findings with lively examples to address questions such as Can mediated interaction be warm and personal Are people honest about themselves online Can relationships that start online work Do digital media damage the other relationships in our lives Throughout the book argues that these questions must be answered with firm understandings of media qualities and the social and personal contexts in which they are developed and used This new edition of *Personal Connections in the Digital Age* will be required reading for all students and scholars of media communication studies and sociology as well as all those who want a richer understanding of digital media and everyday life *Computer-Mediated Communication* John C.
