APPROACH: Atkinson is a managerially-oriented book that focuses on both quantitative and qualitative aspects of classical and contemporary managerial accounting. COMPETITORS: Garrison, MH;

Extendable Rationality Oct 17 2022 “How do people make decisions in organizations?” is the question at the core of this book. Do people act rationally? Under what conditions can information and knowledge be shared to improve decision making? Davide Secchi applies concepts and theories from cognitive science, organizational behavior, and social psychology to explore the dynamics of decision making. In particular, he integrates “bounded rationality” (people are only partly rational; they have (a) limited computational capabilities and (b) limited access to information) and “distributed cognition” (knowledge is not confined to an individual, but is distributed across the members of a group) to build upon the pioneering work of Herbert Simon (1916-2001) on rational decision making and contribute fresh insights. This book is divided into two parts. The first part (Chapters 2 to 5) explores how recent studies on biases, prospect theory, heuristics, and emotions provide the so-called “map” of bounded rationality. The second part (Chapter 6 to 8) presents the

idea of extendable rationality. In this section, Secchi identifies the limitations of bounded rationality and focuses more heavily on socially-based decision processes and the role of “docility” in teaching, managing, and executing decisions in organizations. The practical implications extend broadly to issues relating to change and innovation, as organizations adapt to evolving market conditions, implementing new systems, and effectively managing limited resources. The final chapter outlines an agenda for future research to help understand the decision making characteristics and capabilities of an organization.

Company Accounting Jul 26 2023 Company Accounting provides a thorough introduction to the theory and practice of financial reporting. By tracking the lifecycle of a company, this fifth edition continues to provide students with a logical framework for learning. Comprehensively revised and updated, Company Accounting, fifth Edition incorporates recent changes to the International Financial Reporting Standards (IFRS) as adopted by the Australian Accounting Standards Board (AASB). With an easily accessible 'how to' approach, supported by in-depth theoretical coverage and evaluations of the reporting requirements, students will.

Understanding Management Control and Organisational Sense-making Nov 17 2022

Summary This book centres around three different areas; management control, organisations and information systems - in order to understand what is actually going on and to make sense of management control questions. Management control techniques used today could in many cases be traced back to industrialisation. With the help of computerised information systems, the speed and

detail with which a manager could get a hold of important information has increased. Today, it has become even more important to be able to choose what information to work with and that the context in which it should be used is understood. Organisational sense-making is in many ways an interesting and important path to take in order to do this. When working with the management control function, it is important to understand the organisation where the work is undertaken. One important part of the function is planning and another is control. Both are needed in order for the management control function to work. Performance is often a key ingredient when trying to find out what is working in a plan and what is not and here the understanding for information becomes necessary. Since the work is done within an organisation, both by managers and employees, it is also crucial to find ways to work with not only models, methods and techniques but also people and social dimensions. Key Features Managers and employees want to act in a meaningful way in general. The way planning and control is undertaken in an organization is to a large extent dependent on the way a manager interprets information about the organisation. Decisions and actions can be traced to the interpretation of a situation in the past and present. Since organisations are built on people, it is important to try to understand why they act in a certain way and how their understanding of the organisation is evolving. Management control has in many ways been described as a function that is dependent on different techniques and methods; however, it can also be described as a social process, focusing on decisions and actions. Information systems have come to play a crucial role in managing an organisation, especially when it comes to tracing performance. The demand for responsible and accountable management has led to an increased emphasis on meaningful decisions and actions. The Author Dr Krister Bredmar is associate professor at Linneaus University in Sweden. He has for more then 20 years worked with management control and organisational sense-making,

both in theory and in practice. His research has been published both in academic journals and in books. Readership Scholars, students and practitioners. Contents The accounting heritage Corporate epistemology Thinking ahead The essence of management control Understanding performance The control concept in management control Reports, communication and stakeholders The essence of sense-making Organisations as a set of social relations Information systems and management control Individuals and organisations Organisational structure A social perspective A decisions context Techiques and functions Thinking and acting strategically Accounting tools Information and knowledge The performance paradox

Labor Relations for the Fire Service Apr 22 2023 Well organized and comprehensive, this book covers the history of labor relations and the fire service, discuss the components of fire service collective bargaining agreements, and examine contract administration and disciplinary action. It provides an overview of human resource management, explores how firefighter's personal relationship issues can play a role in personnel management, and assesses future labor relations from the perspective of the national labor union, fire service, individual union member. and aspiring fire service administrator or union officer.

The Routledge Companion to Cost Management Aug 03 2021 Over the last two decades, cost management has been an area of dynamic change and development. This is evident in the extensive inventory of new, high-profile techniques that have emerged. With cost management now firmly established as a distinct sub-discipline within management accounting, The Routledge Companion to Cost Management is a timely reference volume covering both practical developments and research

in this area. Topics covered include: Cost control issues Cost analysis and decision making Cost management systems Environmental cost management With chapters from an international team of contributors, this prestigious companion will prove an indispensable addition to any library with aspirations of keeping up-to-date with the world of accounting.

Performance Measurement Systems in Banks Mar 10 2022 Given the significant changes in the banking environment and the resultant pressures on banks to change their systems and procedures, this book is a timely reference that provides a comprehensive analytical overview of changes in the performance measurement system (PMS) of banks in the post-financial crisis era. It explores the factors that influence such changes and examines banks' consequential responses to institutional pressures. It is an invaluable resource for researchers and practitioners to gain insights into the concept of PMS change in both developed and developing economies.

Research Design for Business & Management Apr 10 2022 Research Design for Business & Management is a logical and practical book which makes no assumptions about your prior research knowledge. It will instead provide you with a clear understanding of the commonly used methods in business and management research, and enable you to tackle the fundamental elements of the research process. This book: contains conversation boxes which answer and discuss the typical

research questions you may have focuses on the judgement calls that you will need to make in your research uniquely demonstrates the circular relationships between research elements ensuring that you can relate chapters to your research process in real life provides key insights into what the examiners and journals will look for in your research to help you get the best possible grades

Management Accounting Jul 06 2024 Management Accounting: Information for Creating and Managing Value 6e explains the contemporary role of management accounting in organisations and demonstrates how it creates and enhances value for shareholders. This text has been developed using major cases based on real Australian businesses and includes numerous illustrations of current management accounting practices of organisations in Australia, New Zealand and the wider Asia-Pacific region. It takes a broad perspective in viewing management accounting as the efficient and effective use of resources, supporting managers in the improvement of customer and shareholder value. The strategic and topical focus has been further developed and strengthened, new questions have been added, text-flow streamlined and extensive revisions have been made to capital expenditure decisions, activity and target-based costings, corporate social responsibility, and supply chain management. Respected authors, a clear writing style and a wealth of features that reference the management accounting practices of real-life companies have made Management Accounting the most popular management accounting text in Australia.

Handbook of Human Systems Integration Jan 08 2022 A groundbreaking look at how technology with a human touch is revolutionizing government and industry Human Systems Integration (HSI) is very attractive as a new integrating discipline designed to help move business and engineering cultures toward a more people-technology orientation. Over the past decade, the United States and foreign governments have developed a wide range of tools, techniques, and technologies aimed at

integrating human factors into engineering systems in order to achieve important cost and performance benefits that otherwise would not have been accomplished. In order for this new discipline to be effective, however, a cultural change is needed that must start with organizational leadership. Handbook of Human Systems Integration outlines the principles and methods that can be used to help integrate people, technology, and organizations with a common objective toward designing, developing, and operating systems effectively and efficiently. Handbook of Human Systems Integration is broad in scope, covering both public and commercial processes as they interface with systems engineering processes. Emphasizing the importance of management and organization concepts as well as the technical uniqueness of HSI, Handbook of Human Systems Integration features:

- * More than ninety contributors, technical advisors, and reviewers from government, industry, and academia
- * Comprehensive coverage of the most recent HSI developments, particularly in presenting the cutting-edge tools, techniques, and methodologies utilized by each of the HSI domains
- * Chapters representing the governments and industries of the United Kingdom and Canada
- * Contributions from three services of the Department of Defense along with the Federal Aviation Administration and the National Academy of Sciences
- * Many chapters covering both military and nonmilitary applications
- * Concepts widely used by government contractors both in the United States and abroad

This book will be of special interest to HSI practitioners, systems engineers, and managers, as well as government and industry decision-makers who must weigh the recommendations of all multidisciplines contributing to systems performance, safety, and costs in order to make sound systems acquisition decisions.

The Law Times May 12 2022

Capital Budgeting Valuation Feb 18 2023 An essential guide to valuation techniques and financial analysis With the collapse of the economy and financial systems, many institutions are reevaluating what they are willing to spend money on. Project valuation is key to both cost effectiveness measures and shareholder value. The purpose of this book is to provide a comprehensive examination of critical capital budgeting topics. Coverage extends from discussing basic concepts, principles, and techniques to their application to increasingly complex, real-world situations. Throughout, the book emphasizes how financially sound capital budgeting facilitates the process of value creation and discusses why various theories make sense and how firms can use them to solve problems and create wealth. Offers a strategic focus on the application of various techniques and approaches related to a firm's overall strategy Provides coverage of international topics based on the premise that managers should view business from a global perspective Emphasizes the importance of using real options Comprised of contributed chapters from both experienced professionals and academics, Capital Budgeting Valuation offers a variety of perspectives and a rich interplay of ideas related to this important financial discipline.

Management Accounting: Principles & Practice, 3rd Edition Dec 19 2022 This book is meant for students of accounting, management and business studies. It not only describes the principles, procedures and techniques of management accounting, but also explains and analyses the core concepts that have driven the development of the subject for decades. The book is a perfect blend of conceptual and practical approaches to accounting. NEW IN THIS EDITION • Completely revised and updated • New chapters on strategic management accounting, product costing, and service costing • Coverage of total quality management (TQM), just-in-time (JIT), life cycle costing, and Kaizen costing • Worked out solutions to problems and latest professional examination questions

Foundations of Augmented Cognition Nov 29 2023 This book constitutes the refereed proceedings of the 5th International Conference on Augmented Cognition, AC 2013, held as part of the 15th International Conference on Human-Computer Interaction, HCII 2013, held in Las Vegas, USA in July 2013, jointly with 12 other thematically similar conferences. The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 81 contributions was carefully reviewed and selected for inclusion in the AC proceedings. The papers are organized in the following topical sections: augmented cognition in training and education; team cognition; brain activity measurement; understanding and modeling cognition; cognitive load, stress and fatigue; applications of augmented cognition.

EBOOK Management Accounting Feb 06 2022 Developed for an Australian and New Zealand audience, *Management Accounting 9e* explains the contemporary role of management accounting. It takes a broad perspective in viewing management accounting as the efficient and effective use of resources, demonstrating how it creates and enhances value for customers and shareholders, as well as the wider aspects of business. The text has been developed using cases based on real Australian and international businesses, and includes numerous 'Real Life' illustrations of current management accounting practices. In keeping with the need to be industry focused, the new edition includes coverage of key contemporary topics including data analytics, big data and business ethics. Highlights include: Coverage of contemporary topics including data analytics, big data and business

ethics; Real Life cases that reflect the growing global nature of business and Australia's role in our region; End of Chapter exercises and problems including algorithmic questions; and comprehensive Instructor Resource Manual.

Business Innovation and Development in Emerging Economies May 31 2021 Business Innovation driven by the advancement of technology has dramatically changed the business landscape over recent years, not only in advanced countries but also in emerging markets. It is expected that business innovation could help achieve economic inclusion, which has been a global initiative over the last decade, creating opportunities for all people to benefit from the economic development. These proceedings provide an outlet for discussing the importance of business innovation, especially in emerging countries in helping to reach inclusive economies. The papers cover the subject areas management, accounting, finance, economics and social sciences.

Performance Measurement and Management Sep 27 2023 Management accountancy has a dynamic role to play in the competitive strategy of modern global businesses. This book sets out key strategic principles and then assesses how management accountancy can affect and direct these strategies. Engaging case studies reveal how theories and concepts translate into real business practice.

Throughout, the book emphasizes: - how accounting initiatives can trigger assessment and improvement of performance management - the importance of managerial decision making to good business practice - how today's management accountancy measures against current research

Written for advanced undergraduate, postgraduate and MBA students taking courses on management accounting and performance measurement and management, the book will be also of interest to management and business consultants, professional accountants and accounting academics.

Research in Accounting in Emerging Economies May 04 2024 Includes research papers that examines various issues including the adoption of International Financial Reporting Standards (IFRS) and International Public Sector Accounting Standards (IPSASs), management accounting change in the context of public sector reforms, corporate reporting disclosures, auditing, etcetera.

Company Accounting Apr 03 2024 Company Accounting provides a thorough introduction to the theory and practice of financial reporting. By tracking the lifecycle of a company, this fifth edition continues to provide students with a logical framework for learning. Comprehensively revised and updated, Company Accounting, fifth Edition incorporates recent changes to the International Financial Reporting Standards (IFRS) as adopted by the Australian Accounting Standards Board (AASB). With an easily accessible 'how to' approach, supported by in-depth theoretical coverage and evaluations of the reporting requirements, students will find Company Accounting to be an oasis of clarity in the challenging subject area of tertiary Accounting.

Comparative Causal Mapping Feb 01 2024 Comparative Causal Mapping: The CMAP3 Method, by Mauri Laukkanen and Mingde Wang, is an introduction to the conceptual backgrounds of causal (cognitive) mapping and to the typical methods in comparative and composite causal mapping, based on either interview or questionnaire primary data or on secondary documentary data. The discussed CCM research is supported by CMAP3, a freely downloadable (www.uef.fi/cmap3) Windows software platform for CCM studies. The book has three parts. The first discusses the theoretical underpinnings and methodological issues in causal mapping including the target phenomena and different interpretations of causal maps/mapping, the motives for using CCM methods and the criteria of method selection. The second part focuses on the technical aspects of using CMAP3 in typical CCM research. The third part presents three CCM study cases: a classical document-based

study; a semi-structured interview-based (SIM) study; and a methodological study comparing SIM with an electronically administered structured hybrid CCM approach. In addition to demonstrating CCM practices, they suggest that different methods produce divergent results and are thus not substitutable. The research task should determine which CCM approach is appropriate. The book will appeal to both academic and professional audiences, in particular to doctoral students and experienced researchers looking for new topics and method approaches, but also to practitioners in fields such as management and organization studies, organizational development, public policy and education, and knowledge management.

Subsidiary Controlling with Strategically Aligned Performance Measurement Systems Jun 24 2023 Due to the growing importance and complexity of company groups and a proceeding decentralisation, subsidiary controlling is becoming more and more important. Performance measurement systems are a key instrument of subsidiary controlling. The correct use of performance measures combined with the right incentives can help reduce information asymmetry between the corporate centre and subsidiaries and at the same time ensure an orientation toward corporate objectives on all levels. In this book, the concept of performance measurement systems in the context of subsidiary controlling is explained. One focus is the thorough discussion of financial performance measures and their use in subsidiary controlling. Particularities in subsidiary controlling are for instance the determination of divisional cost-of-capital for value-based management and the aggregation of measures to the corporate level. The second focus is the design of performance measurement systems depending on certain characteristics of the company and its environment. It is emphasised that there is not one right way of designing controlling systems. Instead, they have to be aligned to certain situational variables such as strategy, organisational

structure or environmental uncertainty. For example, managers of business units that pursue differentiation strategies should be evaluated by more non-financial performance measures than managers of business units with a low-cost strategy. The book can be used as guidance for practitioners concerned with the design of performance measurement systems - for example corporate controllers, management consultants or investment managers in holding companies. It also provides a starting point for academics that intend to conduct further research on related topics.

Responsible Business in a Changing World Aug 15 2022 This book explores the current state of Corporate Social Responsibility (CSR) from an international perspective, the goal being to share ideas and visions for a sustainable future and to provide useful guidelines for academics, practitioners and policymakers in the context of the 2030 “Agenda for Sustainable Development” released by the United Nations. Research on CSR has evolved considerably over the last three decades. However, there are still many unanswered questions concerning the sustainability of business in an increasingly changing world, for example: If most companies consider CSR to be valuable to their organizations, why do only 15% of them systematically implement Social Responsibility initiatives? If CSR has been found to be profitable for companies, why are they so reluctant to develop an active, internal CSR policy? Why are there such significant differences in CSR adoption from country to country? Why does it take a huge crisis to make politicians react and regulate certain core CSR issues? This contributed volume answers these questions, presenting a wealth of case studies and new approaches in the process.

Management Accounting, 4th Edition Oct 05 2021 Eldenburg’s fourth edition of Management Accounting combines the basic technical issues associated with cost management, management

accounting and control with more recent and emerging themes and issues. Management accounting is a compulsory element of the accounting major, and this text is written to cover the content typically taught in the two management accounting units offered in most accounting programs. The Management Accounting interactive e-text features a range of instructional media content designed to provide students with an engaging learning experience. This includes case videos, interactive problems and questions with immediate feedback. Eldenburg's unique resource can also form the basis of a blended learning solution for lecturers.

Development as Leadership-led Change Mar 22 2023 'Development as Leadership-led Change' presents the findings of the Global Leadership Initiative Research Study, which examines leadership in the change processes of fourteen capacity development interventions in eight developing countries. The paper explores what it takes to make change happen in the context of development, and in particular, the role leadership plays in bringing about change. The analysis and findings conclude that leadership manifests itself in different ways in different contexts, depending on readiness, factors that shape change, and leadership opportunities. However, the key characteristics of plurality, functionality, problem orientation, and change space creation are likely to be common to all successful leadership-led change events.

The Implementation of Smart Technologies for Business Success and Sustainability Jul 14 2022 Industry 4.0 technologies identified as the main contributor to the digitalization era. New technology delivers optimal outputs by utilization of effective resource. Therefore, smart technologies that has inventive and creative objects became critical to enterprise; recent studies shows that its led enterprises business such as SMEs to considerable investments, which many organizations over the world attempt to use innovative technologies such as IoT and AI, these

technologies have potential on sustainable business models. In addition to that, innovation usage in business models led to significant benefits towards sustainability concept in SMEs marketplace. Furthermore, Sustainability objectives refers to corporate sustainability term, which integrate enterprise operations with social, educational, environmental and economic benefits, as process of decision-making can impact during sustainability implications. This book focus on the implementation of smart technologies for growing business, the book includes research articles and expository papers on the applications of technology on Decision Making, Healthcare, Smart Universities, Advertising, E-marketing, Public Sector and Digital Government, FinTech, RegTech. Some researchers also discussed the role of smart technologies in the current COVID-19 pandemic, whether in the health sector, education, and others. On all of these, the researchers discussed the impact of smart technologies on decision-making in those vital sectors of the economy.

New Studies in Global IT and Business Services Outsourcing Jan 20 2023 This book contains 11 carefully revised and selected papers from the 5th Workshop on Global Sourcing, held in Courchevel, France, March 14-17, 2011. They have been gleaned from a vast empirical base brought together by leading researchers in information systems, strategic management, and operations. This volume is intended for use by students, academics, and practitioners interested in the outsourcing and offshoring of information technology and business processes. It offers a review of the key topics in outsourcing and offshoring, populated with practical frameworks that serve as a tool kit for students and managers. The topics discussed combine theoretical and practical insights, and they are extensively illustrated by case studies from client and vendor organizations. Last but not least, the book examines current and future trends in outsourcing and offshoring, paying particular attention to how innovation can be realized in global or outsourced software development

environments.

Management Accounting Oct 29 2023 This new Southern African edition of Kim Langfield-Smith and Helen Thorne's best-selling Australian Management Accounting text explains the contemporary role of management accounting in organisations " supporting a company's quest for enhancing shareholder and customer value. The effective management of resources, both financial and non-financial, is essential to creating value. Retaining the strategic approach and comprehensive coverage but thoroughly adapted for Southern Africa, Management Accounting Southern African edition is suitable for the one- or two-semester undergraduate course, and is ideal for use over two years of study.

Management Accounting Change Dec 31 2023 Written by two experienced lecturers, this is the first student-centered textbook to bridge the technical and theoretical aspects of management accounting change. Packed full of pedagogical features, including mini-cases, learning outcomes, key terms, article summaries, key concept boxes, real-world cases, chapter summaries and further reading suggestions and resources, it is clear and accessibly written, covering all the major emerging topics in management accounting theory. Discussing technical developments in management accounting from conventional cost accounting to contemporary strategic management accounting and beyond, in four parts it: shows how conventional cost accounting techniques and management control models evolved in line with the development of mass production and bureaucracy explores how recent developments such as customer and strategic orientations in business, flexible manufacturing, post-bureaucracy, network and virtual organizational technologies implicate in management accounting provides a number of alternative theories through which the transition of management accounting from mechanistic to post-mechanistic approaches can be explained - elaborating both rational and

interpretive/critical theories. This excellent text meets a desperate need for an advanced management accounting textbook that incorporates theory and practice and is accessible and engaging for all those studying in this challenging area.

Cross-Border Mergers and Acquisitions Feb 26 2021 Cross-border mergers and acquisitions (CBM&As) activity has become an important vehicle for firms' internationalization and corporate restructuring over the past three decades. Despite the huge volume of global CBM&A activity, however, there are few books which carefully explore the strategies, motives, and consequences of global mergers and acquisitions. This book discusses and synthesizes the theoretical literature on the motivation and performance of international merger activities. Focusing on the UK as a top acquiring country in the European Union, the authors explore the recent trends in cross-border mergers and acquisitions, motives for cross-border mergers and acquisitions, the mergers integration process, home and host countries' macroeconomic consequences on mergers and acquisitions, and shareholder's wealth effects on CBM&A. This book explores and sheds much-needed light on the UK CBM&A market, what drives it, and what lessons can be learned for other regions around the globe.

Decision Management: Concepts, Methodologies, Tools, and Applications Sep 15 2022 The implementation of effective decision making protocols is crucial in any organizational environment in modern society. Emerging advancements in technology and analytics have optimized uses and applications of decision making systems. Decision Management: Concepts, Methodologies, Tools, and Applications is a compendium of the latest academic material on the control, support, usage, and strategies for implementing efficient decision making systems across a variety of industries and fields. Featuring comprehensive coverage on numerous perspectives, such as data visualization,

pattern analysis, and predictive analytics, this multi-volume book is an essential reference source for researchers, academics, professionals, managers, students, and practitioners interested in the maintenance and optimization of decision management processes.
