In this first book-length study of imperial villages, Beat Kümin provides unprecedented insights into the micro-political cultures of rural communities and popular desires for local autonomy in the pre-modern German lands. From the beginning of the 19th century to the present day, a host of campaigners have denounced the mistreatment of animals. Relying on a comparison of the British and French experiences, this book retraces the various strands of the animal protection movement, from their origins to their continuing impact on current debates. The story of the collective mobilizations behind the struggle for animal rights sheds light on several crucial processes in our social and political history: changes in sensibilities and socially approved emotions; the definition of what constitutes legitimate violence; the establishment of norms designed to change what constitutes morally acceptable practices; rivalry between elites having differing conceptions of the forms authority should take; the influence of religious belief on militant activities; and the effects of gender discrimination.-- It also provides a detailed examination of the personality traits common to the three basic types of trader - trend-following (long to intermediate term), mean reversion (intermediate-term), and short-term (swing and day traders) - and illustrates how a strict adherence to specific types of trading systems can foster a psychological flexibility that will allow you to succeed in all kinds of trading environments: countertrending, choppy, or trending."--Jacket. Climate change negotiations have failed the world. Despite more than thirty years of high-level, global talks on climate change, we are still seeing carbon emissions rise dramatically. This edited volume, comprising leading and emerging scholars and climate activists from around the world, takes a critical look at what has gone wrong and what is to be done to create more decisive action. Composed of twenty-eight essays—a combination of new and republished texts—the anthology is organised around seven main themes: paradigms; what counts?; extraction; dispatches from a climate change frontline country; governance; finance; and action(s). Through this multifaceted approach, the contributors ask pressing questions about how we conceptualise and respond to the climate crisis, providing both 'big picture' perspectives and more focussed case studies. This unique and extensive collection will be of great value to environmental and social scientists alike, as well as to the general reader interested in understanding current views on the climate crisis. **Launch!**

*Advertising and Promotion* is written for advertising and promotion courses taught to students in the business school and journalism & mass communication students. This textbook is the first of its kind to teach advertising concepts by reverse engineering a real advertising campaign from beginning to end. In April 2007, SS+K, an innovative New York City communications agency, launched the first ever branding campaign for msnbc.com with the tag "A Fuller Spectrum of News." *Launch!* follows that campaign from initial agency pitch through roll-out of print and media assets to post-campaign analysis. Throughout, it exposes readers to the theory and concepts of advertising and promotion, and the personalities and decisions that drove this campaign. The book takes a rare look "behind the curtain" - even letting you see some of the paths not chosen by the agency and client. Students get a realistic sense of how theory plays out in practice, and get a flavor for the exciting field of advertising and promotion. And, they consistently learn the perspectives of both the advertising agency (where many journalism and communications students will work) and the client (where many marketing majors will work). This is a unique book, with a unique perspective, by a unique author team, and you

won't find this kind of insight in any other text on the market. We think you're going to love it! This textbook has been used in classes at: Ball State University, Emerson College, Florida Institute of Technology, Grand Valley State University, Johnson County Community College, Manchester Business School, McLennan Community College, Michigan State University, North Hennepin Community College, Pierce College, Rochester Institute of Technology, Saint Louis University, Salem State College, South Dakota State University, Texas State University, Texas Tech University, University of New Hampshire, University of North Carolina, University of Notre Dame, University of South Florida, Virginia Tech, Western Kentucky University. This edited book focuses on the role and use of VR for healthcare professions in both health and rehabilitation settings. It also offers future trends of other emerging technology within medicine and allied health professions. This text draws on expertise of leading medical practitioners and researchers who utilise such VR technologies in their practices to enhance patient/service user outcomes. Research and practical evidence is presented with a strong applied emphasis to further enhance the use VR technologies within the community, the hospital and in education environment(s). The book may also be used to influence policymakers on how healthcare delivery is offered. After an introduction to the subject area and a concise treatment of the technical foundations for the subsequent chapters, this book features 14 chapters on state-of-the-art graph drawing software systems, ranging from general "tool boxes" to customized software for various applications. These chapters are written by leading experts: they follow a uniform scheme and can be read independently from each other. The text covers many industrial applications. This essential volume by the godfather of modern graphic design explores his process and showcases his highly influential early-career work. This gorgeously illustrated volume delves into the early decades of America's pre-eminent graphic artist. For anyone who has ever felt like they don't belong, Sigh, Gone shares an irreverent, funny, and moving tale of displacement and assimilation woven together with poignant themes from beloved works of classic literature. In 1975, during the fall of Saigon, Phuc Tran immigrates to America along with his family. By sheer chance they land in Carlisle, Pennsylvania, a small town where the Trans struggle to assimilate into their new life. In this coming-of-age memoir told through the themes of great books such as *The Metamorphosis*, *The Scarlet Letter*, *The Iliad*, and more, Tran navigates the push and pull of finding and accepting himself despite the challenges of immigration, feelings of isolation, and teenage rebellion, all while attempting to meet the rigid expectations set by his immigrant parents. Appealing to fans of coming-of-age memoirs such as *Fresh Off the Boat*, *Running with Scissors*, or tales of assimilation like Viet Thanh Nguyen's *The Displaced* and *The Refugees*, Sigh, Gone explores one man's bewildering experiences of abuse, racism, and tragedy and reveals redemption and connection in books and punk rock. Against the hairspray-and-synthesizer backdrop of the '80s, he finds solace and kinship in the wisdom of classic literature, and in the subculture of punk rock, he finds affirmation and echoes of his disaffection. In his journey for self-discovery Tran ultimately finds refuge and inspiration in the art that shapes—and ultimately saves—him. The English writer and social critic Charles Dickens was the pre-eminent novelist of the Victorian era. His books created great fictional characters and left permanent marks on literature, popular culture, and socio-political commentary. The novels feature evocative depictions of London life and strong themes of morality and redemption. Dickens first published many of them in serialized form in magazines – a practice aimed at engaging broad audiences and increasing anticipation for

later instalments. The present book consists of 15 of the novels - compiled in one volume with modernized language for improved accessibility, readability, and understandability. The main goal has been to make the writings more engaging and vivid while sticking to the original tones and settings of the books. In "A Christmas Carol" (1843), the miserly old Ebenezer Scrooge receives four ghostly visitors on Christmas Eve who teach him the value of kindness, generosity, and the Christmas spirit. Dickens set "A Tale of Two Cities" (1859) against the backdrop of the French Revolution. The novel explores themes of resurrection, justice, and sacrifice through the lives of characters caught between Paris and London. "Great Expectations" (1860-1861) is the story of young Pip's journey from poor orphan to person of substance. The novel explores themes of wealth and poverty, love and rejection, as Pip eventually realizes what is valuable in life. In "Oliver Twist" (1837-1839), a young orphan navigates the grim underworld of Victorian London, confronting thieves and villains as he seeks a true family and a better life. "David Copperfield" (1849-1850) is a semi-autobiographical novel detailing the life and adventures of David Copperfield, from his troubled childhood to his eventual success as a writer, highlighting the importance of perseverance and personal integrity. "Barnaby Rudge" (1841) is a historical novel set against the backdrop of the anti-Catholic Gordon Riots of 1780. The focus is on the simple-minded Barnaby Rudge and the chaos that engulfs London. "Bleak House" (1852-1853) is a satire centered on a long-running legal case (Jarndyce and Jarndyce) and its impact on individuals. The narrative is rich in mystery and character study. "Dombey and Son" (1848) tells the story of a wealthy and proud businessperson who values his son as an heir to his fortune over his daughter. Redemption and familial love prevail in the end. Dickens set "Hard Times" (1854) in the fictional heavy industrial Coketown. The novel criticizes "utilitarian" philosophy and general material conditions in the town through the lens of particular individuals and their interwoven lives. "Little Dorrit" (1855-1857) tells the story of Amy Dorrit - born and raised in debtor's prison - and her impact on those around her. Dickens criticizes the British establishment and the injustices of the debtor's prison system. "Martin Chuzzlewit" (1843-1844) is a satirical novel exploring the theme of selfishness. It follows the fortunes and misfortunes of young Martin as he learns the value of being selfless. "Nicholas Nickleby" (1838-1839) describes the adventures of a man as he seeks to support his mother and sister after his father's death. He faces assorted villains but also finds allies in Victorian England. "Our Mutual Friend" (1864-1865) is Dickens' last completed novel. It examines the lives of several characters linked by a deceased man's fortune and explores themes of wealth, social class, and human nature. "The Old Curiosity Shop" (1840-1841), tells the story of Nell

Trent and her grandfather after a vicious loan shark destroys their lives. It features various characters, hardships, and criticisms of Victorian society's treatment of the poor and vulnerable. Finally, "The Pickwick Papers" (1836-1837) is about the comedic journey of Mr. Samuel Pickwick and his friends as they travel around England to explore its unique customs, characters, and landscapes. The novel is full of whimsical adventures and satirical episodes. First published in 2002. Jean Froissart is probably the best known medieval historians. His Chronicle (of the Hundred Years War) is among the top ten historical works in western civilization. In his own time, though, he was better known as a poet. This is the first dual language anthology including excerpts from Chroniques, as well as several of his verse and prose. Whether its bungee jumping in Queenstown or visiting the Guinness factory in Dublin, where we travel and what we do when we get there - has changed significantly in the past twenty years. This innovative textbook explores what is possibly the most unrecognized of international service industries, placing tourism in the context of contemporary gl The Common European Framework of Reference for Languages (CEFR) has become the yardstick for teaching and testing language skills in Europe and elsewhere. Yet little is known about the relationships between the communicative levels established using the can-do statements of the CEFR and the developmental stages of grammatical and lexical development described by Second Language Acquisition (SLA) research. This book presents empirical research by members of the SLATE network (Second Language Acquisition and Testing in Europe), aimed at bridging this gap. The studies deal with several target languages, including Dutch, English, Finnish, French, Italian, Norwegian and Spanish, with adult, adolescent and child learners in both formal and informal contexts. and control. It clearly presents the multiple advantages of molten carbonate fuel cells for the efficient conversion of energy, and also includes recent developments in this innovative technology. The whole is rounded off by an appendix featuring benchmark problems with equations and parameters. Vital reading for process, chemical and power engineers, as well as those working in power technology, chemists and electrochemists, materials scientists, and energy-supplying companies.

The Comparative Survey of Freedom is an institutional effort by Freedom House to monitor the progress and decline of political rights and civil liberties in 191 nations and 59 related territories. These year-end reviews of freedom began in 1955, when they were called the Balance Sheet of Freedom and, still later, the Annual Survey of the Progress of Freedom. This program was expanded in the early 1970s, and has appeared in Freedom Review since 1973. It has also been issued in a more developed context as a yearbook since 1978. Since 1989, the Survey project has been a year-long effort produced by regional experts, consultants and human rights specialists. The Survey derives its information from a wide range of sources. Most valued of these are the many human rights activists, journalists, editors and political figures around the world who keep us informed of the human rights situation in their countries. Throughout the year, Freedom House personnel regularly conduct fact-finding missions to gain more in-depth knowledge of the vast political transformations affecting our world. During these week-to-month-long investigations, we make every effort to meet a cross-section of political parties and associations, human rights monitors, religious figures, representatives of both the private sector and trade union movement, academics and journalists. During the past year, Freedom House staff traveled to numerous countries throughout most of the world's geographical and political regions. The Survey project team also consults a vast array of published source materials, ranging from the reports of other human rights organizations to often rare, regional newspapers and magazines. This year's Survey team includes: Adrian Karatnycky, Martin Edwin Anderson, Kristen Guida, Marshall Freeman Harris, Thomas R. Lansner, Arch Puddington, Leonard R. Sussman, and George Zarycky. The general editor of Freedom in the World is Roger Kaplan; the managing editor is Tara Kelly. This year's research coordinator was Charles Graybow.

On the Study Methods of Our Time remains a key text for anyone interested in the development's of Vico's thought and serves as a concise introduction to his work. Scholars and students in such disciplines as the history of philosophy, intellectual history, literary theory, rhetoric, and the history and philosophy of education will find this volume helpful and fascinating. Giambattista Vico's first original work of philosophy, On the Study Methods of Our Time (1708-9) takes up the contemporary "quarrel between the ancients and the moderns" and provides a highly interesting statement of the nature of humanistic education. This edition makes available again Elio Gianturco's superb 1965 English translation of a work generally regarded as the earliest statement by Vico of the fundamentals of his position. An important contribution to the development of the scientism-versus-humanism debate over the comparative merits of classical and modern culture, this book lays out Vico's powerful arguments against the compartmentalization of knowledge which results from the Cartesian world view. In opposition to the arid logic of Cartesianism, Vico here celebrates the humanistic tradition and posits the need for a comprehensive science of humanity which recognizes the value of memory and imagination. This book contains memories and accounts of her deep involvement in the field of cardiology and her philosophy about medicine in general. Through the book, she inspires not just women but all those who aspire to know the subject of Cardiology as she deftly describes the development of cardiology in the present situation worldwide—including India. With wit and humor, she chronicles her early days in British Burma and gives a peep into the exciting twists and turns of the Burmese history and her people right up to the Second World War. She also writes eloquently about the close bonding with family and friends while growing up and getting educated there with strong Tamil roots nurtured by her mother. The poor and underprivileged benefitted equally under her expert care. В номере:Игрушки для взрослых. This classic history of America's high-stakes quest to dominate the skies is "a gripping technothriller in which the technology is real" (New York Times Book Review). From the development of the U-2 to

the Stealth fighter, Skunk Works is the true story of America's most secret and successful aerospace operation. As recounted by Ben Rich, the operation's brilliant boss for nearly two decades, the chronicle of Lockheed's legendary Skunk Works is a drama of Cold War confrontations and Gulf War air combat, of extraordinary feats of engineering and human achievement against fantastic odds. Here are up-close portraits of the maverick band of scientists and engineers who made the Skunk Works so renowned. Filled with telling personal anecdotes and high adventure, with narratives from the CIA and from Air Force pilots who flew the many classified, risky missions, this book is a riveting portrait of the most spectacular aviation triumphs of the twentieth century.
