The Conquest of Bread Peter Kropotkin, 2021-07-21T00:29:42Z The Conquest of Bread is a political treatise written by the anarcho communist philosopher Peter Kropotkin Written after a split between anarchists and Marxists at the First International a 19th century association of left wing radicals The Conquest of Bread advocates a path to a communist society distinct from Marx and Engels s Communist Manifesto rooted in the principles of mutual aid and voluntary cooperation Since its original publication in 1892 The Conquest of Bread has immensely influenced both anarchist theory and anarchist praxis As one of the first comprehensive works of anarcho communist theory published for wide distribution it both popularized anarchism in general and encouraged a shift in anarchist thought from individualist anarchism to social anarchism It was also an influential text among the Spanish anarchists in the Spanish Civil War of the 1930s and the late anarchist theorist and anthropologist David Graeber cited the book as an inspiration for the Occupy movement of the early 2010s in his 2011 book Debt The First 5 000 Years This book is part of the Standard Ebooks project which produces free public domain ebooks

A Revolution Down on the Farm Paul K. Conkin, 2008-09-01 At a time when food is becoming increasingly scarce in many parts of the world and food prices are skyrocketing no industry is more important than agriculture Humans have been farming for thousands of years and yet agriculture has undergone more fundamental changes in the past 80 years than in the previous several centuries In 1900 30 million American farmers tilled the soil or tended livestock today there are fewer than 4.5 million farmers who feed a population four times larger than it was at the beginning of the century Fifty years ago the planet could not have sustained a population of 6.5 billion now commercial and industrial agriculture ensure that millions will not die from starvation Farmers are able to feed an exponentially growing planet because the greatest industrial revolution in history has occurred in agriculture since 1929 with U.S. farmers leading the way Productivity on American farms has increased tenfold even as most small farmers and tenants have been forced to find other work Today only 300,000 farms produce approximately ninety percent of the total output and overproduction largely subsidized by government programs and policies has become the hallmark of modern agriculture A Revolution Down on the Farm The Transformation of American Agriculture since 1929 charts the profound changes in farming that have occurred during author Paul K. Conkin s lifetime His personal experiences growing up on a small Tennessee farm complement compelling statistical data as he explores America s vast agricultural transformation and considers its social political and economic consequences He examines the history of American agriculture showing how New Deal innovations evolved into convoluted commodity programs following World War II Conkin assesses the skills new technologies and government policies that helped transform farming in America and suggests how new legislation might affect farming in decades to come

Although the increased production and mechanization of farming has been an economic success story for Americans the costs are becoming increasingly apparent Small farmers are put out of business when they cannot compete with giant non diversified corporate farms Caged chickens and hogs in factory like facilities or confined dairy cattle require massive amounts of chemicals and hormones ultimately ingested by consumers Fertilizers new organic chemicals manure disposal and genetically modified seeds have introduced environmental problems that are still being discovered A Revolution Down on the Farm concludes with an evaluation of farming in the twenty first century and a distinctive meditation on alternatives to our present large scale mechanized subsidized and fossil fuel and chemically dependent system Consumers Digest ,2001
