Unlike some other reproductions of classic texts (1) We have not used OCR(Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy. Description of the Rucker ambulance as modified by the author. Emergency Rescue Vehicles transports readers to the scenes of life-or-death rescues with its spectacular photographs of specially

equipped vehicles and their crews responding to a variety of emergency challenges. Specially built vehicles such as ambulances, helicopters, boats, and hovercraft carry state-of-the-art medical equipment, skilled rescue technicians to emergencies that demand immediate action. The riveting text describes the vehicles and their special equipment, and offers first-hand accounts of demanding rescue operations. The hit television show that helped revolutionize emergency medical care in the streets is still a favorite with fans all over the world. When the show premiered in 1972 fire department paramedic services were being piloted in just a handful of cities. By 1977 over 50% of the US population was within 10 minutes of a paramedic unit. The paramedics of Fire Station 51 showed viewers critical techniques such as CPR that saved lives both on screen and off. *Emergency! Behind the Scene* contains real life tales from the production crew - from medical and fire technical advisors, cast members and writer, to paramedics and fire fighters. Learn more about Johnny Gage, Roy DeSoto, Dixie McCall and the rest of the Station 51 Rampart General Hospital staff. If you are a fire fighter, paramedic or simply a fan you will enjoy this in depth look behind the scenes. The third edition of the *Emergency Ambulance Response Driver's Handbook* is the

Commission on Accreditation of Medical Transport Systems (CAMTS) has
been accrediting air and ground transport services since 1991. One of the most
significant needs the Commission has recognized is to assist transport services
in creating a culture that supports safety and quality for both crews and
patients. Most of the helicopter EMS (emergency medical service) accidents
and many ground ambulance accidents can be attributed to human factors and
systems designs that lead to poor decision-making. Management commitment
is vital to create and maintain a culture that supports risk assessment,
accountability, professionalism and organizational dynamics. This reference
book has been created by CAMTS to address this need directly and
comprehensively. It offers a groundbreaking collection of expert insights and
practical solutions that can be used by EMS, Fire and Rescue, public and
private services, and professional emergency and transport professionals

worldwide. Quoting from the foreword written by the late Robert L. Helmreich, Professor Emeritus of Psychology at The University of Texas Human Factors Research Project, 'This is an important book which should be required reading for everyone involved in patient transport, from managers and dispatchers to those at the sharp end... The experienced and able authors and editors of this work use culture as the overarching concept needed to maximize safety while delivering patients expeditiously.' No descriptive material is available for this title. Learn how rescue services help us with these fact-packed guides to emergency vehicles. From police sirens to water hoses, find out how ambulances, police cars, fire trucks and rescue boats work to save lives. Images of America: Firefighting in Frederick County honors the contribution of both volunteer and career firefighters through the years. Captured in these 200 vintage images are the local volunteer fire companies, many support agencies, and other emergency services organizations that have been assisting Frederick County for centuries. Featured also will be photographs of the Independent Hose Company of Frederick, which has the honor of being the oldest continuously operating fire company in Maryland, having been founded in 1818. Today, Frederick County is home to the National Fire Academy and the

National Fallen Firefighters Memorial, both located in Emmitsburg and featured in the book. Over several centuries the ambulance has evolved from horse-drawn wagons designed to remove wounded soldiers from the battlefield into high-speed emergency rooms on wheels, staffed by skilled professionals. This thorough history follows the ambulance through every phase, focusing not just on the vehicles but on their role within the developing medical systems they served, as well as the political, social and economic influences that have shaped their advancement. Topics include the critical role of police ambulances in the development of the first emergency medical services, the history of the ambulance intern, breakthroughs in ambulance design and function from the horse-drawn days to the present, notable women in ambulance development, and a fresh look at the first organized paramedic services. More than 275 photographs and other illustrations accompany the text. Weller Brothers was one of no fewer than four independent hearse and ambulance conversion businesses that flourished in the 1950s and 1960s. Unlike most other coachbuilders, Weller designed and fabricated hearses and ambulances on virtually any make of car supplied by the customer. The result was an astonishing variety of one-of-a-kind professional cars on nearly every marque

sold by the U.S. big three, including Ford, Mercury, Lincoln, Plymouth, Dodge, DeSoto, Chrysler, Chevrolet, Pontiac, Buick, Oldsmobile – and at least one Packard!
