W. E. B. Du Bois was a public intellectual, sociologist, and activist on behalf of the African American community. He profoundly shaped black political culture in the United States through his founding role in the NAACP, as well as internationally through the Pan-African movement. Du Bois's sociological and historical research on African-American communities and culture broke ground in many areas, including the history of the post-Civil War Reconstruction period. Du Bois was also a prolific author of novels, autobiographical accounts, innumerable editorials and journalistic pieces, and several works of history. Written in very accessible prose, these two booklets, originally published in 1930, allowed W. E. B. Du Bois to reach a wide audience with an interest in Africa. What is so incredible about the two Africa booklets is their lasting relevance and value to the study of Africa today. Coupling Du Bois's breadth of scholarship with his passion for the subjects, the analyses in these booklets are integral to the study of Africa. Many of his arguments foreshadowed the issues and debates regarding Africa in the twentieth century. Expertly synthesized in an introduction by Emmanuel Akyeampong, this edition of the two Africa booklets is essential for anyone interested in African history. Are you studying world geography? The Black Word Search Puzzle was a concept that was developed from the question: How do you integrate history into ordinary activities? As it goes, the idea arose and an African-American oriented word search puzzle began its long process of creation. Over time, I began to play with the idea of graphics and came up with the icon of the African pick or comb, which seemed appropriate in that it lent itself to a double meaning when placed in this context -- the word search puzzle being a combing through process. The Black Word Search Puzzle is both an entertaining and educational word game that gives players, young and old, an opportunity to learn about a bit of Black history and African geography. Marie Tharp was always fascinated by the ocean. Taught to think big by her father who was a mapmaker, Marie wanted to do something no one had ever done before: map the bottom of the Atlantic Ocean. Was it even possible? Not sure if she would succeed, Marie decided to give it a try. Throughout history, others had tried and failed to measure the depths of the oceans. Sailors lowered weighted ropes to take measurements. Even today, scientists are trying to measure the depth by using echo sounder machines to track how long it would take a sound wave sent from a ship to the sea floor to come back. But for Marie, it was like piecing together an immense jigsaw puzzle. Despite past failures and challenges—sometimes Marie would be turned away from a ship because having a woman on board was "bad luck"—Marie was determined to succeed. And she did, becoming the first person to chart the ocean floor, helping us better understand the planet we call home. Award-winning author Robert Burleigh tells her story of imagination and perseverance. Beautifully illustrated by Raúl Colón, Look Up! is a book that will inspire readers to follow their dreams. Sharpen geography students' critical-thinking skills with brain-teasing activities. Parents, students, and teachers will love these fun challenges, puzzles, and logical thinking pages.
