UPCO's Living Environment Lorraine Godlewski, 2001-06-30
UPCO's Physical Setting - CHEMISTRY Frederick L. Kirk, 2011-09
Physical Setting Chemistry Review is compliant with the Physical Setting Chemistry Core Curriculum. The topics are written so that they can be used in any order a teacher may deem logical. Each unit has questions of the types contained in the Regents Examinations Parts A, B, and C. Constructed Response. There are appendices containing in addition to the reference tables a section on the historical development of chemistry, a section on the use of the new chemistry reference tables, and a section on significant figures, exponential notation, graphing, and functions, as well as percent error. There are also supplemental constructed response questions, and the NYS practice Regents Exams are included. The book is in an enlarged format with a larger typeface than has been used in the past. All aspects are calculated to facilitate efficient review of the material contained.

UPCO's Physical Setting - EARTH SCIENCE Robert B. Sigda, 2010-09
Earth Science Review Book is user friendly for both the teacher and the student. Since the content is aligned with the New York State Core Curriculum for Physical Setting Earth Science, a teacher can feel confident that all the required topics are sufficiently developed. The suggested outline of units moves from the concrete material to the more abstract subjects such as meteorology and astronomy. Throughout the book, there is ample opportunity for review of basic skills and ways to tie in the various units. For example, isolines are discussed early in the year and then revisited later in the weather topics. The student has the opportunity to use the book as both a reference and a workbook. The extensive number of constructed response items, as well as multiple choice questions, found interspersed within the topics, give ample practice. The multiple Regents Exams found at the back of the book can be used both at the end of the course for review and whenever appropriate throughout the year.

Earth Science Thomas McGuire, 2004-06-01
An introduction to the study of earth science. Suitable for grades 8-12, this book helps students understand the fundamental concepts of earth science and become familiar with the Earth Science Reference Tables.

UPCO's Living Environment - BIOLOGY Lorraine Godlewski, 2010-09
UPCO's Living Environment Review is a complete review of all the key ideas and major understandings as required by the New York State Living Environment Core Curriculum. Also included is any additional information necessary for total comprehension of core curriculum key ideas. This 276 page book is conveniently organized into 8 major units, subdivided into 25 chapters. Although this book is directed toward the New York State Living Environment Curriculum, it can be used successfully with any school's biology or life science curriculum. Important features are noted below. Each chapter ends with numerous multiple choice, constructed response, and reading and interpreting information practice questions, structured to resemble regents exam questions, allowing students many opportunities to test their understanding of required concepts. Diagrams and other visuals help the students

understand concepts A complete review of laboratory and technical skills processes involved in scientific inquiry and methods of representing and analyzing scientific observations is present throughout the book Words and terms directly related to the core curriculum are highlighted in bold type while other words or terms necessary for the complete comprehension of the core curriculum key ideas are italicized A comprehensive index and glossary of all important vocabulary terms is located at the end of the book for supplementary review Sample practice Regents Exams are included at the end of the book to give the student actual test taking experiences
