The modernist movement produces a market-value-based approach to finance that emphasizes shareholder wealth maximization, options, and agency relationships. Management Sep 26 2023 "This course and this book are about management and managers. Managers are one thing that all organizations--no matter the size, kind, or location--need. And there's no doubt that the world managers face has changed, is changing, and will continue to change. The dynamic nature of today's organizations means both rewards and challenges for the individuals who will be managing those organizations. Management is a dynamic subject, and a textbook on it should reflect those changes to help prepare you to manage under the current conditions. We've written this 14th edition of Management to provide you with the best possible understanding of what it means to be a manager confronting change and to best prepare you for that reality. But not every student aspires to a career in management. And even if you do, you may be five or ten years away from reaching a managerial position. So you might rightly feel that taking a course in management now may be getting ahead of the game. We hear you. In response to these concerns, we've added new material to this book that is important and relevant to everyone working in an organization--manager and non-manager alike. Our "Workplace Confidential" pages identify, analyze, and offer suggestions for dealing with the major challenges that surveys indicate frustrate employees the most. You should find these pages valuable for helping you survive and thrive in your

workplace. Surprisingly, this topic has rarely been addressed in business programs. Inclusion in an introductory management course appeared to us to be a logical place to introduce these challenges and to provide guidance in handling them"--

Strategy-in-Action Jul 13 2022 The meltdown of stalwart companies from AIG to JAL to Lehman and government crises from Greece to Spain make it abundantly clear: With economic uncertainty and rapid innovation, empowered consumers and free agents, and the constant pressure to be faster, better and cheaper, the established wisdom on strategic planning works no more. Once hailed as "brilliant" by experts, it is the very approach that got so many companies into the mess in the first place. This path-breaking book shows how successful organizations of all stripes transformed their strategy paradigm based on Strategy-In-Action and the power of human capital: standing in the future, listening for vital intelligence in far-flung locations, giving voice to dissenting views, maximizing ownership by stakeholders, especially implementers, getting quick wins and screening out losers quickly in the action. Above all, successful companies of all sizes have ended the long-standing divorce of strategy—hatched by a select few behind closed doors—from action, the supreme test of strategy. Dr. Thomas D. Zweifel, strategy and performance expert, gamechanger and author of seven leadership books such as "Communicate or Die," "Culture Clash 2," "Leadership in 100 Days" and the award-winning "The Rabbi and the CEO," has teamed up with Edward J. Borey, CEO, corporate strategist and turnaround guru. Together, they bring to bear their combined half-century experience in innovating strategy design and execution at Fortune 500, midsize enterprises and startups as well as large public-sector and UN agencies. The result: a turn-key methodology for senior managers who need adaptive and people-centered strategy that yields quick wins and stands the test of time.
