[An Introduction to Islamic Law](#) Wael B. Hallaq, 2009-07-09 The study of Islamic law can be a forbidding prospect for those entering the field for the first time Wael Hallaq a leading scholar and practitioner of Islamic law guides students through the intricacies of the subject in this absorbing introduction The first half of the book is devoted to a discussion of Islamic law in its pre modern natural habitat The second part explains how the law was transformed and ultimately dismantled during the colonial period In the final chapters the author charts recent developments and the struggles of the Islamists to negotiate changes which have seen the law emerge as a primarily textual entity focused on fixed punishments and ritual requirements The book which includes a chronology a glossary of key terms and lists of further reading will be the first stop for those who wish to understand the fundamentals of Islamic law its practices and history

Archaeology, Anthropology, and Interstellar Communication National Aeronautics Administration, Douglas Vakoch, 2014-09-06 Addressing a field that has been dominated by astronomers physicists engineers and computer scientists the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence These scholars are grappling with some of the enormous challenges that will face humanity if an information rich signal emanating from another world is detected By drawing on issues at the core of contemporary archaeology and anthropology we can be much better prepared for contact with an extraterrestrial civilization should that day ever come

Lost Enlightenment S. Frederick Starr, 2015-06-02 The forgotten story of Central Asia s enlightenment its rise fall and enduring legacy In this sweeping and richly illustrated history S Frederick Starr tells the fascinating but largely unknown story of Central Asia s medieval enlightenment through the eventful lives and astonishing accomplishments of its greatest minds remarkable figures who built a bridge to the modern world Because nearly all of these figures wrote in Arabic they were long assumed to have been Arabs In fact they were from Central Asia drawn from the Persianate and Turkic peoples of a region that today extends from Kazakhstan southward through Afghanistan and from the easternmost province of Iran through Xinjiang China Lost Enlightenment recounts how between the years 800 and 1200 Central Asia led the world in trade and economic development the size and sophistication of its cities the refinement of its arts and above all in the advancement of knowledge in many fields Central Asians achieved signal breakthroughs in astronomy mathematics geology medicine chemistry music social science philosophy and theology among other subjects They gave algebra its name calculated the earth s diameter with unprecedented precision wrote the books that later defined European medicine and penned some of the world s greatest poetry One scholar working in Afghanistan even predicted the existence of North and South America five centuries before Columbus Rarely in history has a

more impressive group of polymaths appeared at one place and time No wonder that their writings influenced European culture from the time of St Thomas Aquinas down to the scientific revolution and had a similarly deep impact in India and much of Asia Lost Enlightenment chronicles this forgotten age of achievement seeks to explain its rise and explores the competing theories about the cause of its eventual demise Informed by the latest scholarship yet written in a lively and accessible style this is a book that will surprise general readers and specialists alike *A People's History of the World* Chris Harman,2017-05-02 Building on A People s History of the United States this radical world history captures the broad sweep of human history from the perspective of struggling classes An indispensable volume on class and capitalism throughout the ages for readers reckoning with the history they were taught and history as it truly was Howard Zinn From the earliest human societies to the Holy Roman Empire from the Middle Ages to the Enlightenment from the Industrial Revolution to the end of the twentieth century Chris Harman provides a brilliant and comprehensive history of the human race Eschewing the standard accounts of Great Men of dates and kings Harman offers a groundbreaking counter history a breathtaking sweep across the centuries in the tradition of history from below In a fiery narrative he shows how ordinary men and women were involved in creating and changing society and how conflict between classes was often at the core of these developments While many scholars see the victory of capitalism as now safely secured Harman explains the rise and fall of societies and civilizations throughout the ages and demonstrates that history moves ever onward in every age A vital corrective to traditional history A People s History of the World is essential reading for anyone interested in how society has changed and developed and the possibilities for further radical progress *Autocar* ,2001 **Leading to Action** Mahnaz Afkhami,Ann Eisenberg,Lina Abu-Habib,Women's Learning Partnership for Rights, Development, and Peace,2010-04-01

Day of Empire Amy Chua,2009-01-06 In this sweeping history bestselling author Amy Chua explains how globally dominant empires or hyperpowers rise and why they fall In a series of brilliant chapter length studies she examines the most powerful cultures in history from the ancient empires of Persia and China to the recent global empires of England and the United States and reveals the reasons behind their success as well as the roots of their ultimate demise Chua s analysis uncovers a fascinating historical pattern while policies of tolerance and assimilation toward conquered peoples are essential for an empire to succeed the multicultural society that results introduces new tensions and instabilities threatening to pull the empire apart from within What this means for the United States uncertain future is the subject of Chua s provocative and surprising conclusion **Empires of the Silk Road** Christopher I. Beckwith,2009-03-16 An epic account of the rise and fall of the Silk Road empires The first complete history of Central Eurasia from ancient times to the present day Empires of the Silk Road represents a fundamental rethinking of the origins history and significance of this major world region Christopher Beckwith describes the rise and fall of the great Central Eurasian empires including those of the Scythians Attila the Hun the Turks and Tibetans and Genghis Khan and the Mongols In addition he explains why the heartland of Central Eurasia led the

world economically scientifically and artistically for many centuries despite invasions by Persians Greeks Arabs Chinese and others In retelling the story of the Old World from the perspective of Central Eurasia Beckwith provides a new understanding of the internal and external dynamics of the Central Eurasian states and shows how their people repeatedly revolutionized Eurasian civilization Beckwith recounts the Indo Europeans migration out of Central Eurasia their mixture with local peoples and the resulting development of the Graeco Roman Persian Indian and Chinese civilizations he details the basis for the thriving economy of premodern Central Eurasia the economy s disintegration following the region s partition by the Chinese and Russians in the eighteenth and nineteenth centuries and the damaging of Central Eurasian culture by Modernism and he discusses the significance for world history of the partial reemergence of Central Eurasian nations after the collapse of the Soviet Union Empires of the Silk Road places Central Eurasia within a world historical framework and demonstrates why the region is central to understanding the history of civilization
