Tailspin Steven Brill,2019-04-02 In this revelatory narrative covering the years 1967 to 2017 Steven Brill gives us a stunningly cogent picture of the broken system at the heart of our society He shows us how over the last half century America s core values meritocracy innovation due process free speech and even democracy itself have somehow managed to power its decline into dysfunction They have isolated our best and brightest whose positions at the top have never been more secure or more remote The result has been an erosion of responsibility and accountability an epidemic of shortsightedness an increasingly hollow economic and political center and millions of Americans gripped by apathy and hopelessness By examining the people and forces behind the rise of big money lobbying legal and financial engineering the demise of private sector unions and a hamstrung bureaucracy Brill answers the question on everyone s mind How did we end up this way Finally he introduces us to those working quietly and effectively to repair the damages At once a diagnosis of our national ills a history of their development and a prescription for a brighter

future Tailspin is a work of riveting journalism and a welcome antidote to political despair **Illicit** Moises Naim,2006-10-10 A groundbreaking investigation of how illicit commerce is changing the world by transforming economies reshaping politics and capturing governments In this fascinating and comprehensive examination of the underside of globalization Moises Na m illuminates the struggle between traffickers and the hamstrung bureaucracies trying to control them From illegal migrants to drugs to weapons to laundered money to counterfeit goods the black market produces enormous profits that are reinvested to create new businesses enable terrorists and even to take over governments Na m reveals the inner workings of these amazingly efficient international organizations and shows why it is so hard and so necessary to contain them Riveting and deeply informed Illicit will change how you see the world around you *The Square and the Tower* Niall Ferguson,2018 The most brilliant historian of his generation The Times Most history is hierarchical it s about popes presidents and prime ministers But what if that s simply because they create the historical archives What if we are missing equally powerful but less visible networks leaving them to the conspiracy theorists with their dreams of all powerful Illuminati The twenty first century has been hailed as the Networked Age But in *The Square and the Tower* Niall Ferguson argues that social networks are nothing new From the printers and preachers who made the Reformation to the freemasons who led the American Revolution it was the networkers who disrupted the old order of popes and kings Far from being novel our era is the Second Networked Age with the computer in the role of the printing press But networks have a dark side prone to clustering contagions and even outages And the conflicts of the past already have unnerving parallels today in the time of Facebook Islamic State and Trumpworld **Upheaval** Jared Diamond,2019-05-07 A riveting and illuminating Bill Gates Summer Reading pick about how and why some nations recover from trauma and others don t Yuval Noah Harari by the Pulitzer Prize winning author of the landmark bestseller *Guns Germs and Steel* In his international bestsellers *Guns Germs and Steel* and *Collapse* Jared Diamond transformed our understanding of what makes civilizations rise and fall Now in his third book in this monumental trilogy he reveals how successful nations recover from crises while adopting selective changes a coping mechanism more commonly associated with individuals recovering from personal crises Diamond compares how six countries have survived recent upheavals ranging from the forced opening of Japan by U S Commodore Perry s fleet to the Soviet Union s attack on Finland to a murderous coup or countercoup in Chile and Indonesia to the transformations of Germany and Austria after World War Two Because Diamond has lived and spoken the language in five of these six countries he can present gut wrenching histories experienced firsthand These nations coped to varying degrees through mechanisms such as acknowledgment of responsibility painfully honest self appraisal and learning from models of other nations Looking to the future Diamond examines whether the United States Japan and the whole world are successfully coping with the grave crises they currently face Can we learn from lessons of the past Adding a psychological dimension to the in depth history geography biology and anthropology that mark all of Diamond s books *Upheaval* reveals

The Fractured Republic Yuval Levin, 2017-05-23 Americans today are frustrated and anxious Our economy is sluggish and leaves workers insecure Income inequality cultural divisions and political polarization increasingly pull us apart Our governing institutions often seem paralyzed And our politics has failed to rise to these challenges No wonder then that Americans and the politicians who represent them are overwhelmingly nostalgic for a better time The Left looks back to the middle of the twentieth century when unions were strong large public programs promised to solve pressing social problems and the movements for racial integration and sexual equality were advancing The Right looks back to the Reagan Era when deregulation and lower taxes spurred the economy cultural traditionalism seemed resurgent and America was confident and optimistic Each side thinks returning to its golden age could solve America s problems In The Fractured Republic Yuval Levin argues that this politics of nostalgia is failing twenty first century Americans Both parties are blind to how America has changed over the past half century as the large consolidated institutions that once dominated our economy politics and culture have fragmented and become smaller more diverse and personalized Individualism dynamism and liberalization have come at the cost of dwindling solidarity cohesion and social order This has left us with more choices in every realm of life but less security stability and national unity Both our strengths and our weaknesses are therefore consequences of these changes And the dysfunctions of our fragmented national life will need to be answered by the strengths of our decentralized diverse dynamic nation Levin argues that this calls for a modernizing politics that avoids both radical individualism and a centralizing statism and instead revives the middle layers of society families and communities schools and churches charities and associations local governments and markets Through them we can achieve not a single solution to the problems of our age but multiple and tailored answers fitted to the daunting range of challenges we face and suited to enable an American revival

To the Edge of the World Christian Wolmar, 2014-08-05 *To the Edge of the World* is an adventure in travel full of extraordinary personalities more than a century of explosive political economic and cultural events and almost inconceivable feats of engineering Christian Wolmar passionately recounts the improbable origins of the Trans Siberian railroad the vital artery for Russian expansion that spans almost 6 000 miles and seven time zones from Moscow to Vladivostok The world s longest train route took a decade to build in the face of punishing climates rampant disease scarcity of funds and materials and widespread corruption The line sprawls over a treacherous landmass that was previously populated only by disparate tribes and convicts serving out their terms in labor camps where men were regularly starved tortured or mutilated for minor offenses Once built it led to the establishment of new cities and transformed the region s history Exceeding all expectations it became according to Wolmar the best thing that ever happened to Siberia It was not all good news however The railroad was the cause of the 1904 1905 Russo Japanese War and played a vital and at times bloody role in the Russian Revolution and the subsequent Civil War More positively the Russians were able to resist the

Nazi invasion during the Second World War as new routes enabled whole industries to be sent east Siberia previously a lost and distant region became an inextricable part of Russia's cultural identity And what began as one meandering single track line is now arguably the world's most important railroad **Today We Die a Little!** Richard AskAdditional

military development the overall intention should be the same to try to reach the point that aid is no longer necessary

Leadership for a Fractured World Dean Williams, 2015-02-16 Leaders today whether in corporations or associations nonprofits or nations face massive messy multidimensional problems No one person or group can possibly solve them they require the broadest possible cooperation But says Harvard scholar Dean Williams our leadership models are still essentially tribal individuals with formal authority leading in the interest of their own group In this deeply needed new book he outlines an approach that enables leaders to transcend internal and external boundaries and help people to collaborate even people over whom they technically have no power Drawing on what he s learned from years of working in countries and organizations around the world Williams shows leaders how to approach the delicate and creative work of boundary spanning whether those boundaries are cultural organizational political geographic religious or structural Sometimes leaders themselves have to be the ones who cross the boundaries between groups Other times a leader s job is to build relational bridges between divided groups or even to completely break down the boundaries that block collaborative problem solving By thinking about power and authority in a different way leaders will become genuine change agents able to heal wounds resolve conflicts and bring a fractured world together
