

## Biology Test- Chapter 11: Introduction to Genetics

### Multiple Choice

Identify the choice that best completes the statement or answers the question.

- Gregor Mendel used pea plants to study
  - flowering.
  - gamete formation.
  - the inheritance of traits.
  - cross-pollination.
- Offspring that result from crosses between true-breeding parents with different traits
  - are true-breeding.
  - make up the  $F_2$  generation.
  - make up the parental generation.
  - are called hybrids.
- The chemical factors that determine traits are called
  - alleles.
  - traits.
  - genes.
  - characters.
- Gregor Mendel concluded that traits are
  - not inherited by offspring.
  - inherited through the passing of factors from parents to offspring.
  - determined by dominant factors only.
  - determined by recessive factors only.
- When Gregor Mendel crossed a tall plant with a short plant, the  $F_1$  plants inherited
  - an allele for tallness from each parent.
  - an allele for tallness from the tall parent and an allele for shortness from the short parent.
  - an allele for shortness from each parent.
  - an allele from only the tall parent.
- The principle of dominance states that
  - all alleles are dominant.
  - all alleles are recessive.
  - some alleles are dominant and others are recessive.
  - alleles are neither dominant nor recessive.
- When Gregor Mendel crossed true-breeding tall plants with true-breeding short plants, all the offspring were tall because
  - the allele for tall plants is recessive.
  - the allele for short plants is dominant.
  - the allele for tall plants is dominant.
  - they were true-breeding like their parents.
- A tall plant is crossed with a short plant. If the tall  $F_1$  pea plants are allowed to self-pollinate,
  - the offspring will be of medium height.
  - all of the offspring will be tall.
  - all of the offspring will be short.

*Prentice Hall Chemistry* Antony C. Wilbraham, 2006-10-15 Prentice Hall Chemistry meets the needs of students with a range of abilities diversities and learning styles by providing real world connections to chemical concepts and processes The first nine chapters introduce students to the conceptual nature of chemistry before they encounter the more rigorous mathematical models and concepts in later chapters The technology backbone of the program is the widely praised Interactive Textbook with ChemASAP which provides frequent opportunities to practice and reinforce key concepts with tutorials that bring chemistry to students through Animations Simulations Assessment and Problem solving tutorials Holt McDougal Modern Chemistry Mickey Sarquis, 2012 **Chemistry 2e** Paul Flowers, Richard Langely, William R. Robinson, Klaus Hellmut Theopold, 2019-02-14 Chemistry 2e is designed to meet the scope and sequence requirements of the two semester general chemistry course The textbook provides an important opportunity for students to learn the core concepts of chemistry and understand how those concepts apply to their lives and the world around them The book also includes a number of innovative features including interactive exercises and real world applications designed to enhance student learning The second edition has been revised to incorporate clearer more current and more dynamic explanations while maintaining the same organization as the first edition Substantial improvements have been made in the figures illustrations and example exercises that support the text narrative Changes made in Chemistry 2e are described in the preface to help instructors transition to the second edition Pearson Chemistry Antony C. Wilbraham, Dennis D. Staley, Michael S. Matta, Edward L. Waterman, 2012-01-01 Prentice Hall Physical Science Concepts in Action Program Planner National Chemistry Physics Earth Science, 2003-11 Prentice Hall Physical Science Concepts in Action helps students make the important connection between the science they read and what they experience every day Relevant content lively explorations and a wealth of hands on activities take students understanding of science beyond the page and into the world around them Now includes even more technology tools and activities to support differentiated instruction **Holt Chemistry** R. Thomas Myers, 2006 **Addison-Wesley Chemistry** Antony C. Wilbraham, 2000 **Chemistry** Thandi Buthelezi, Laurel Dingrando, Nicholas Hainen, Cheryl Wistrom, Dinah Zike, 2013 Analysis, Synthesis and Design of Chemical Processes Richard Turton, Richard C. Bailie, Wallace B. Whiting, Joseph A. Shaeiwitz, 2008-12-24 The Leading Integrated Chemical Process Design Guide Now with New Problems New Projects and More More than ever effective design is the focal point of sound chemical engineering Analysis Synthesis and Design of Chemical Processes Third Edition presents design as a creative process that integrates both the big picture and the small details and knows which to stress when and why Realistic from start to finish this book moves readers beyond classroom exercises into open ended real world process problem solving The authors introduce integrated techniques for every facet of the discipline from finance to operations new

plant design to existing process optimization This fully updated Third Edition presents entirely new problems at the end of every chapter It also adds extensive coverage of batch process design including realistic examples of equipment sizing for batch sequencing batch scheduling for multi product plants improving production via intermediate storage and parallel equipment and new optimization techniques specifically for batch processes Coverage includes Conceptualizing and analyzing chemical processes flow diagrams tracing process conditions and more Chemical process economics analyzing capital and manufacturing costs and predicting or assessing profitability Synthesizing and optimizing chemical processing experience based principles BFD PFD simulations and more Analyzing process performance via I O models performance curves and other tools Process troubleshooting and debottlenecking Chemical engineering design and society ethics professionalism health safety and new green engineering techniques Participating successfully in chemical engineering design teams Analysis Synthesis and Design of Chemical Processes Third Edition draws on nearly 35 years of innovative chemical engineering instruction at West Virginia University It includes suggested curricula for both single semester and year long design courses case studies and design projects with practical applications and appendixes with current equipment cost data and preliminary design information for eleven chemical processes including seven brand new to this edition

*General Chemistry* Donald Allan McQuarrie, Peter A. Rock, Ethan B. Gallogly, 2011 Atoms First seems to be the flavor of the year in chemistry textbooks but many of them seem to be little more than rearrangement of the chapters It takes a master like McQuarrie to go back to the drawing board and create a logical development from smallest to largest that makes sense to students Hal Harris University of Missouri St Louis McQuarrie s book is extremely well written the order of topics is logical and it does a great job with both introductory material and more advanced concepts Students of all skill levels will be able to learn from this book Mark Kearley Florida State University This new fourth edition of *General Chemistry* takes an atoms first approach from beginning to end In the tradition of McQuarrie s many previous works it promises to be another ground breaking text This superb new book combines the clear writing and wonderful problems that have made McQuarrie famous among chemistry professors and students worldwide Presented in an elegant design with all new illustrations it is available in a soft cover edition to offer professors a fresh choice at an outstanding value Student supplements include an online series of descriptive chemistry Interchapters a Student Solutions Manual and an optional state of the art Online Homework program For adopting professors an Instructor s Manual and a CD of the art are also available

*Quantities, Units and Symbols in Physical Chemistry* International Union of Pure and Applied Chemistry. Physical and Biophysical Chemistry Division, 2007 Prepared by the IUPAC Physical Chemistry Division this definitive manual now in its third edition is designed to improve the exchange of scientific information among the readers in different disciplines and across different nations This book has been systematically brought up to date and new sections added to reflect the increasing volume of scientific literature and terminology and expressions being used The Third Edition reflects the experience of the contributors

with the previous editions and the comments and feedback have been integrated into this essential resource This edition has been compiled in machine readable form and will be available online

**Chemical Engineering Design** Gavin Towler, Ray Sinnott, 2012-01-25 Chemical Engineering Design Second Edition deals with the application of chemical engineering principles to the design of chemical processes and equipment Revised throughout this edition has been specifically developed for the U S market It provides the latest US codes and standards including API ASME and ISA design codes and ANSI standards It contains new discussions of conceptual plant design flowsheet development and revamp design extended coverage of capital cost estimation process costing and economics and new chapters on equipment selection reactor design and solids handling processes A rigorous pedagogy assists learning with detailed worked examples end of chapter exercises plus supporting data and Excel spreadsheet calculations plus over 150 Patent References for downloading from the companion website Extensive instructor resources including 1170 lecture slides and a fully worked solutions manual are available to adopting instructors This text is designed for chemical and biochemical engineering students senior undergraduate year plus appropriate for capstone design courses where taken plus graduates and lecturers tutors and professionals in industry chemical process biochemical pharmaceutical petrochemical sectors New to this edition Revised organization into Part I Process Design and Part II Plant Design The broad themes of Part I are flowsheet development economic analysis safety and environmental impact and optimization Part II contains chapters on equipment design and selection that can be used as supplements to a lecture course or as essential references for students or practicing engineers working on design projects New discussion of conceptual plant design flowsheet development and revamp design Significantly increased coverage of capital cost estimation process costing and economics New chapters on equipment selection reactor design and solids handling processes New sections on fermentation adsorption membrane separations ion exchange and chromatography Increased coverage of batch processing food pharmaceutical and biological processes All equipment chapters in Part II revised and updated with current information Updated throughout for latest US codes and standards including API ASME and ISA design codes and ANSI standards Additional worked examples and homework problems The most complete and up to date coverage of equipment selection 108 realistic commercial design projects from diverse industries A rigorous pedagogy assists learning with detailed worked examples end of chapter exercises plus supporting data and Excel spreadsheet calculations plus over 150 Patent References for downloading from the companion website Extensive instructor resources 1170 lecture slides plus fully worked solutions manual available to adopting instructors

**Chemical Kinetics and Reaction Dynamics** Santosh K. Upadhyay, 2007-04-29 Chemical Kinetics and Reaction Dynamics brings together the major facts and theories relating to the rates with which chemical reactions occur from both the macroscopic and microscopic point of view This book helps the reader achieve a thorough understanding of the principles of chemical kinetics and includes Detailed stereochemical discussions of reaction steps Classical theory based

calculations of state to state rate constants A collection of matters on kinetics of various special reactions such as micellar catalysis phase transfer catalysis inhibition processes oscillatory reactions solid state reactions and polymerization reactions at a single source The growth of the chemical industry greatly depends on the application of chemical kinetics catalysts and catalytic processes This volume is therefore an invaluable resource for all academics industrial researchers and students interested in kinetics molecular reaction dynamics and the mechanisms of chemical reactions Chemistry Theodore Lawrence Brown, H. Eugene LeMay, Bruce E. Bursten, Patrick Woodward, Catherine Murphy, 2017-01-03 NOTE This edition features the same content as the traditional text in a convenient three hole punched loose leaf version Books a la Carte also offer a great value this format costs significantly less than a new textbook Before purchasing check with your instructor or review your course syllabus to ensure that you select the correct ISBN Several versions of MyLab™ and Mastering™ platforms exist for each title including customized versions for individual schools and registrations are not transferable In addition you may need a Course ID provided by your instructor to register for and use MyLab and Mastering products For courses in two semester general chemistry Accurate data driven authorship with expanded interactivity leads to greater student engagement Unrivaled problem sets notable scientific accuracy and currency and remarkable clarity have made Chemistry The Central Science the leading general chemistry text for more than a decade Trusted innovative and calibrated the text increases conceptual understanding and leads to greater student success in general chemistry by building on the expertise of the dynamic author team of leading researchers and award winning teachers In this new edition the author team draws on the wealth of student data in Mastering™ Chemistry to identify where students struggle and strives to perfect the clarity and effectiveness of the text the art and the exercises while addressing student misconceptions and encouraging thinking about the practical real world use of chemistry New levels of student interactivity and engagement are made possible through the enhanced eText 2.0 and Mastering Chemistry providing seamlessly integrated videos and personalized learning throughout the course Also available with Mastering Chemistry Mastering™ Chemistry is the leading online homework tutorial and engagement system designed to improve results by engaging students with vetted content The enhanced eText 2.0 and Mastering Chemistry work with the book to provide seamless and tightly integrated videos and other rich media and assessment throughout the course Instructors can assign interactive media before class to engage students and ensure they arrive ready to learn Students further master concepts through book specific Mastering Chemistry assignments which provide hints and answer specific feedback that build problem solving skills With Learning Catalytics™ instructors can expand on key concepts and encourage student engagement during lecture through questions answered individually or in pairs and groups Mastering Chemistry now provides students with the new General Chemistry Primer for remediation of chemistry and math skills needed in the general chemistry course If you would like to purchase both the loose leaf version of the text and MyLab and Mastering search for 0134557328 9780134557328 Chemistry The Central Science
