**Acoustical Materials** Pranab Saha,2021-08-11 What is acoustics What is noise How is sound measured How can the vehicle noise be reduced using sound package treatments Pranab Saha answers these and more in Acoustical Materials Acoustics is the science of sound including its generation propagation and effect Although the propulsion sources of internal combustion engine ICE vehicles and electric motor powered vehicles EV are different and therefore their propulsion noises are different both types of vehicles have shared noise concerns Tire and road noise Wind noise Vehicle noise and vibration issues have been there almost from the inception of vehicle manufacturing The noise problem in a vehicle is very severe and is difficult to solve only by modifying the sources of noise and vibration Sound package treatments address the noise and vibration issues along the path to reduce in cabin noise In Acoustical Materials readers will grasp the science of reducing sound and vibration using sound absorbers sound barriers and vibration dampers Sound provides information on the proper operation of the vehicle but if unchecked can detract from the consumer experience within the vehicle and create noise pollution outside the vehicle Acoustical Materials provides essential information on the basics of sound vehicle noise source how these are measured how vehicle owners perceive sound and ultimately how to solve noise problems in vehicles using sound package materials

*Racing Toward Zero* Kelly Senecal, Felix Leach, 2021-06-01 In *Racing Toward Zero* the authors explore the issues inherent in developing sustainable transportation They review the types of propulsion systems and vehicle options discuss low carbon fuels and alternative energy sources and examine the role of regulation in curbing emissions All technologies have an impact on the environment from internal combustion engine vehicles to battery electric vehicles fuel cell electric vehicles and hybrids there is no silver bullet The battery electric vehicle may seem the obvious path to a sustainable carbon free transportation future but it s not the only nor necessarily the best path forward The vast majority of vehicles today use the internal combustion engine ICE and this is unlikely to change anytime soon Improving the ICE and its fuels entering a new ICE age must be a main route on the road to zero emissions How do we go green The future requires a balanced approach to transportation It s not a matter of choosing between combustion or electrification it s combustion and electrification As the authors say The future is eclectic By harnessing the best qualities of both technologies we will be in the best position to address our transportation future as quickly as possible ISBN 9781468601466 ISBN 9781468601473 ISBN 9781468602005 DOI 10 4271 9781468601473
