A Compendium of Herbal Magick Jul 24 2022 Every plant has its own distinct spiritual energy or its own deva. Devas are the radiant light of the Universal Divine that permeates all things. Since the earliest times, people were aware that all of Nature is divine. Great and wondrous myths were told that explained the presence of divine energy as it exists in thunder, in trees, and in sunlight. Some of this lore was the foundation of religions. But the simpler stories, such as those of a plant's energy, explored day-to-day matters like health and love. This understanding of the world has been preserved in folklore through poems, chants, ditties, and spells. From researching the history of folklore from cultures around the world, patterns emerge that enable us to approach the true nature of plants' devas. This compendium presents the lore and the corresponding usage for 330 magickal herbes. Great care was taken only to include folklore that was documented as authentic. You will meet many new herbes in this text and explore fascinating magickal and religi uses, but most of all, you will come to respect the divine that surrounds your everyday life.

Secret Cures of Slaves Dec 17 2021 “Engaging unique sources . . . Londa Schiebinger untangles the complex relationships between European and local physicians, healers, plants, and slavery.” —François Regourd, Université Paris Nanterre In the natural course of events, humans fall sick and die. The history of medicine bristles with attempts to find new and miraculous remedies, to work with and against nature to restore humans to health and well-being. In this book, Londa Schiebinger examines medicine and human experimentation in the Atlantic World, exploring the circulation of people, disease, plants, and knowledge between Europe, Africa, and the Americas. She traces the development of a colonial medical complex from the 1760s, when a robust experimental culture emerged in the British and French West Indies, to the early 1800s, when debates raged about banning the slave trade and, eventually, slavery itself. Massive mortality among enslaved Africans and European planters, soldiers, and sailors fueled the search for new healing techniques. Amerindian, African, and European knowledges competed to cure diseases emerging from the collision of peoples on newly established, often poorly supplied, plantations. But not all knowledge was equal. Highlighting the violence and fear endemic to colonial struggles, Schiebinger explores aspects of African medicine that were not put to the test, such as Obeah and vodou. This book analyzes how and why specific knowledges were blocked, discredited, or held secret. “In this urgent, probing and visually striking volume, Londa Schiebinger, one of the pioneers of feminist and colonial science studies, shifts our understanding of Enlightenment racial attitudes to the domain of the medical, making a vital contribution to the dynamic new wave of research on science and slavery in the Atlantic world.” —James Delbourgo, Rutgers University

Chinese Herbal Secrets Jan 30 2023 You may think that herbal remedies are the same the world over, with just some local name-changing, but there is a radical difference between the Eastern and Western approaches to herbalism, which exists not so much in the plants themselves (many occur in both traditions) but in the approach to diagnosis. When prescribing, a Western herbalist will take the property of the herb into greater account than the constitution of the person who is taking it; an Eastern herbalist will first establish their patient's type, and will only then pinpoint a herbal cure to suit that particular person at that particular time.
