**Technologies for the Information Society** Jean-Yves Roger, Brian Stanford-Smith, Paul T. Kidd, 1998 GATEWAYS TO DEMOCRACY continues with its framework of gateways to help readers conceptualize participation and civic engagement, even democracy itself, with reference to how individuals access the political system. This approach helps readers better see the relevance of government in their lives. GATEWAYS uniquely incorporates policy into a section at the end of each chapter, helping readers better understand the connection between public opinion, policy making, and how public policy applies to their lives. The second edition, complete with 2012 election updates, emphasizes critical thinking by clearly outlining learning outcomes and enhancing learning with self-assessment checkpoints and a clear chapter study plan. Chapters in this ESSENTIALS version are condensed to accommodate a shorter format but preserve the integrity of the text's hallmarks.

Strategies to the Prediction, Mitigation and Management of Product Obsolescence Bjoern Bartels, Ulrich Ermel, Peter Sandborn, Michael G. Pecht, 2012-04-04 Supply chains for electronic products are primarily driven by consumer electronics. Every year, new mobile phones, computers, and gaming consoles are introduced, driving the continued applicability of Moore's law. The semiconductor manufacturing industry is highly dynamic and releases new, better, and cheaper products day by day. But what happens to long-field-life products like airplanes or ships, which need the same components for decades? How do electronic and also non-

electronic systems that need to be manufactured and supported of decades manage to continue operation using parts that were available for a few years at most This book attempts to answer these questions This is the only book on the market that covers obsolescence forecasting methodologies including forecasting tactics for hardware and software that enable cost effective proactive product life cycle management This book describes how to implement a comprehensive obsolescence management system within diverse companies Strategies to the Prediction Mitigation and Management of Product Obsolescence is a must have work for all professionals in product project management sustainment engineering and purchasing
