Alternative Models of Addiction Hanna Pickard, Serge H. Ahmed, Bennett Foddy, 2015-12-07 For much of the 20th century theories of addictive behaviour and motivation were polarized between two models The first model viewed addiction as a moral failure for which addicts are rightly held responsible and judged accordingly The second model in contrast viewed addiction as a specific brain disease caused by neurobiological adaptations occurring in response to chronic drug or alcohol use and over which addicts have no choice or control As our capacity to observe neurobiological phenomena improved the second model became scientific orthodoxy increasingly dominating addiction research and informing public understandings of addiction More recently however a dissenting view has emerged within addiction research based partly on new scientific research and partly on progress in philosophical and psychological understandings of relevant mental phenomena This view does not revert to treating addiction as a moral failure but nonetheless holds that addictive behaviour is fundamentally motivated by choice and subject to at least a degree of voluntary control On this alternative model of addiction addictive behaviour is an instrumental means to ends that are desired by the individual although much controversy exists with respect to the rationality or irrationality of these ends the degree and nature of the voluntary control of addictive behaviour and motivation the explanation of the difference between addictive and non addictive behaviour and motivation and lastly the extent to which addictive behaviour and motivation is correctly characterised as pathological or diseased This research topic includes papers in the traditions of neuroscience psychology philosophy law and social science that explore alternative understandings of addiction *Women's Under-Representation in the Engineering and Computing Professions: Fresh Perspectives on a Complex Problem* Kathleen Buse, Catherine Hill, Romila Singh, 2018-06-21 Understanding the many complexities that define gender inequality has been described by researchers as a grand challenge Novel insights innovation a broader community to conduct research and to ascertain effective interventions are essential in the challenge to create organizations that are gender equal As such this Research Topic in *Frontiers in Psychology* addresses the under representation of women in engineering and computing as a complex but solvable problem This Research Topic seeks to

inform the global community about advances in understanding the under representation of women in engineering and computing with a focus on what enables change Further this Topic will promote fresh perspectives innovative methodologies and mixed method approaches important to accelerating the pace of change

If I Ran the Zoo Dr. Seuss,1950 Gerald tells of the very unusual animals he would add to the zoo if he were in charge

Biology Sandra Alters,1996 Designed for a one or two semester non majors course in introductory biology taught at most two and four year colleges This course typically fulfills a general education requirement and rather than emphasizing mastery of technical topics it focuses on the understanding of biological ideas and concepts how they relate to real life and appreciating the scientific methods and thought processes Given the authors work in and dedication to science education this text s writing style pedagogy and integrated support package are all based on classroom tested teaching strategies and learning theory The result is a learning program that enhances the effectiveness efficiency of the teaching and learning experience in the introductory biology course like no other before it

Julian Assange Julian Assange, 2011-09-22 In December 2010 Julian Assange signed a contract with Canongate Books to write a book part memoir part manifesto for publication the following year At the time Julian said I hope this book will become one of the unifying documents of our generation In this highly personal work I explain our global struggle to force a new relationship between the people and their governments In the end the work was to prove too personal Despite sitting for more than fifty hours of taped interviews and spending many late nights at Ellingham Hall where he was living under house arrest discussing his life and the work of WikiLeaks with the writer he had enlisted to help him Julian became increasingly troubled by the thought of publishing an autobiography After reading the first draft of the book at the end of March Julian declared All memoir is prostitution In June 2011 with thirty eight publishing houses around the world committed to releasing the book Julian told us he wanted to cancel his contract We disagree with Julian s assessment of the book We believe it explains both the man and his work underlining his commitment to the truth Julian always claimed the book was well written we agree and this also encouraged us to make the book available to readers And the contract By the time Julian wanted to cancel the deal he had already used the advance money to settle his legal bills So the contract still stands We have decided to honour it and to publish This book is the unauthorised first draft It is passionate provocative and opinionated like its author It fulfils the promise of the original proposal and we are proud to publish it Canongate Books September 2011

Communities in Action National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health

Practice, Committee on Community-Based Solutions to Promote Health Equity in the United States, 2017-04-27 In the United States some populations suffer from far greater disparities in health than others Those disparities are caused not only by fundamental differences in health status across segments of the population but also because of inequities in factors that impact health status so called determinants of health Only part of an individual's health status depends on his or her behavior and choice community wide problems like poverty unemployment poor education inadequate housing poor public transportation interpersonal violence and decaying neighborhoods also contribute to health inequities as well as the historic and ongoing interplay of structures policies and norms that shape lives When these factors are not optimal in a community it does not mean they are intractable such inequities can be mitigated by social policies that can shape health in powerful ways Communities in Action Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States This report focuses on what communities can do to promote health equity what actions are needed by the many and varied stakeholders that are part of communities or support them as well as the root causes and structural barriers that need to be overcome
