Personality Disorders Jan 03 2023 This work offers an evaluation of competing theoretical perspectives and nosological systems for personality disorders. The editors have brought together recognized authorities in the field to offer a synthesis of competing perspectives that provide readers with an assessment for each disorder. The result is a comprehensive, current, and critical summary of research and practice guidelines related to the personality disorders. Key Features focuses on controversies and alternative conceptualizations; separate chapters are dedicated to each personality disorder and considered from various points of view. It presents authoritative perspectives; leading scholars and researchers in the field provide a critical evaluation of alternative perspectives on each personality disorder. And it frames the current state of personality disorder research and practice issues; cutting edge and streamlined research is presented to be used in courses on diagnosis, assessment, psychopathology and abnormal psychology, especially those that include the DSM IV. It also offers an integrative understanding of elusive personality categorizations; wherever possible, case examples are offered as illustrations of each disorders clinical presentation. The use of technical terms are minimized; each contributor takes the approach of a user friendly summary and integration of major trends, findings, and future directions.
