plummeted by more than a third and the population of butterflies has declined 31 percent Protecting Pollinators explores why the statistics have become so dire and how they can be reversed Jodi Helmer breaks down the latest science on environmental threats and takes readers inside the most promising conservation initiatives Efforts include farmers reducing pesticides cities creating butterfly highways volunteers ripping up invasive plants gardeners planting native flowers and citizen scientists monitoring migration Along with inspiring stories of revival and lessons from failed projects readers will find practical tips to get involved They will also be reminded of the magic of pollinators not only the iconic monarch and dainty hummingbird but the drab hawk moth and homely bats that are just as essential Without pollinators the world would be a duller blander place Helmer shows how we can make sure they are always fluttering soaring and buzzing around us

**The Eagle Watchers** Ruth Tingay, Todd Katzner, 2011-01-15 Eagles have fascinated humans for millennia For some the glimpse of a distant eagle instantly becomes a treasured lifelong memory Others may never encounter a wild eagle in their lifetime This book was written by people who have dedicated years to the study of eagles to provide an insider's view for all readers but especially those who have never been up close and personal with these magnificent yet often misunderstood creatures In their stories twenty nine leading eagle researchers share their remarkable field experiences providing personal narratives that don't feature in their scientific publications They tell of their fear at being stalked by grizzly bears their surprise at being followed by the secret police their embarrassment when accidentally firing mortar rockets over a school gymnasium and their sense of awe at tracking eagles via satellite The reader experiences the cultural shock of being guest of honor at a circumcision ceremony the absurdity of sharing an aquatic car with the Khmer Rouge and the sense of foreboding at being press ganged into a frenzied tribal death march through the jungle The Eagle Watchers covers twenty four species on six continents from well known bald eagle golden eagle to obscure black and chestnut eagle New Guinea harpy eagle and from common African fish eagle to critically endangered Philippine eagle Madagascar fish eagle The diverse experiences vividly described in this book reveal the passion dedication and sense of adventure shared by those who study these majestic birds and strive for their conservation Featuring stunning color photographs of the eagles information on raptor conservation a global list of all eagle species with ranges and conservation status and a color map of the sites visited in the book The Eagle Watchers will appeal to birders conservationists and adventure travelers alike To further support the conservation programs described in this book all royalties are being donated to two leading nonprofit organizations for raptor conservation training and fieldwork Hawk Mountain Sanctuary Intern Program and the National Birds of Prey Trust
