Radar Principles Nadav Levanon, 1988-05-19 An advanced treatment of the main concepts of radar Systematic and organized it nicely balances readability with mathematical rigor Many techniques and examples have been chosen from the radar industry Rayleigh fluctuating targets are used as they yield simple expressions for the probability of detection and others for their pedagogical value Costas signals lead the coded radar signals because their ambiguity function can be intuitively deduced Ordered statistics is covered in more depth than other CFAR techniques because its performance can be obtained analytically without resorting to simulation methods Contains many exercises An Instructor's Manual presenting detailed solutions to all the problems in the book is available from the Wiley editorial department

Radar Principles Peyton Z. Peebles, 2004

Radar Principles for the Non-Specialist John C. Toomay, 2012-12-06 What This Book Is This book is about radar It will teach you the essentials of radar the underlying principles It is not like an engineering handbook which provides detailed design equations without explaining either derivation or rationale It is not like a graduate school textbook which may be abstruse and esoteric to the point of incomprehensibility And it is not like an anthology of popular magazine articles which may be gaudy but superficial It is an attempt to distill the very complex rich technology of radar into its fundamentals tying them to the laws of nature on one end and to the most modern and complex systems on the other Who It's For If your work requires you to supervise or meet as coequals with radar systems engineers or designers this book will allow you to understand them to question them intelligently and perhaps to provide them with a perspective a dispassionate yet competent view that they lack If you are trained in another discipline but have been made the manager of a radar project or a system program that has one or more radars as sub systems this book will provide you with the tools you need not only to give your team members confidence but also to make a substantive technical contribution yourself
