*Case Studies in Special Education* Tera Torres, Catherine R. Barber, 2017-06-12 Special education law and practice have undergone profound transformation over the past 50 years. Students with disabilities are now more likely to receive a free and appropriate education in the least restrictive environment possible; however, the ideals of the law have not always been manifested in effective practice. Although special education services are vastly better today than they were in the early years of public education, current policies and practices continue to result in the under-education of many children with disabilities. This book illustrates key failures of the system within the context of real children's experiences. The case study approach gives voice to the students, families, and educators who have been let down by the special education process. The goal is to shed light on the flaws and injustices of the status quo. After identifying these problems, the authors offer sound solutions. Section 1 is devoted to issues surrounding identification of students with learning disabilities. These topics include occurrence of inconsistencies in assessment and diagnoses, understanding the struggles of the slow learner, and the interference of behavioral challenges with students' educational performance. Section 2 addresses problems within the evaluation process that negatively influence diagnoses. Discussions include disproportionate representation of students from low socioeconomic backgrounds, as well as students of color and bilingual students. Section 3 highlights significant concerns with service provision within the special education realm. The narratives throughout the book present stories of children on the receiving end of a severely fractured special education system. Recommendations focus on solving specific problems, such as inconsistent identification processes and categories, disproportionate representation, ill-conceived IEPs, ineffective specially designed instruction, and poorly implemented RTI programs. The book's methodological approach affirms that there is much room for reform within both the special education system and the public education system as a whole. This book will be an excellent resource for graduate-level students, practitioners, and teachers in the fields of special education, disability studies, early intervention, school psychology, and child and family services. Additionally, it will be of interest to social workers, counselors, and researchers.

Similar to a handbook in its comprehensive topical coverage, this edited collection provides a contextual foundation for academic assessment and intervention, describes both norm-referenced and curriculum-based assessment measurement in detail, considers the implications of both of these assessments on ethnically diverse populations, provides a clear link between assessment evidence-based interventions and the RTI model, and considers other important topics related to this area, such as teacher behavior. Intended primarily for graduate-level courses in education, school psychology, or child clinical psychology, it will also be of interest to practicing professionals in these fields.
