**European Ungulates and Their Management in the 21st Century** Marco Apollonio, Reidar Andersen, Rory Putman, 2010-02-04 The first book to summarise management objectives for ungulates across Europe

**Ungulate Management in Europe** Rory Putman, Marco Apollonio, Reidar Andersen, 2011-04-28 This book considers a number of problems posed by ungulates and their management in Europe Through a synthesis of the underlying biology and a comparison of the management techniques adopted in different countries the book explores which management approaches seem effective and in which circumstances Experts in a number of different areas of applied wildlife biology review various management problems and alternative solutions including the impact of large ungulates on agriculture forestry and conservation habitats the impact of disease and predation on ungulate populations and the involvement of ungulates in road traffic accidents and possible measures for mitigation This book is directed at practising wildlife managers those involved in research to improve methods of wildlife management and policy makers in local regional and national administrations

**Behaviour and Management of European Ungulates** Rory Putman, Marco Apollonio, 2014-10-13 Ungulates are an extraordinarily important group of animals worldwide In many cases they are keystone species with a disproportionate effect on the functioning of the wider ecological systems of which they form a part They can also serve as dominant species acting as ecological engineers and as a prey base for endangered or expanding populations of large carnivores They are important culturally and economically as a major source of protein in subsistence cultures and because of their wide exploitation in recreational hunting which is still a major form of land use in many countries The book considers a number of aspects of the balance of cost and benefit of ungulates and their management in Europe Through a synthesis of the underlying biology and a comparison of the management techniques adopted in different countries management approaches which seem effective within their respective circumstances are explored Each chapter is written by experts in their own fields ensuring that they are aware of the most up to date literature on that topic and can also offer an experienced and informed review based on their own research experience

**Of Moose and Men** Jerry C. Haigh, 2012 Drawing on the author's personal experiences with both tame and wild moose this handbook contains a wealth of information about this unique animal from all corners of the world An overview of moose biology is featured including their specialised diet and the relationship between sex and antlers where size really does matter This also contains accessible chapters exploring moose diseases moose and traffic moose as a resource and the uses of live moose in several ways ranging from transport and clothing to dairy animals and pets

**Integrated Waste Management** Sunil Kumar, 2011-08-23 This book reports research on policy and legal issues anaerobic digestion of solid waste under processing aspects industrial waste application of GIS and LCA in waste management and a couple of research papers relating to leachate and odour management

**Ecology, Conservation and**

**Management of Wild Pigs and Peccaries** Mario Melletti, Erik Meijaard, 2017-11-23 Wild pigs inhabit vast areas in Europe Southern Asia and Africa and have been introduced in North and South America while feral pigs are widespread in Australia and New Zealand Many wild pig species are threatened with extinction but Eurasian wild boar populations however are increasing in many regions Covering all wild pig and peccary species the Suidae and Tayassuidae families this comprehensive review presents new information about the evolution taxonomy and domestication of wild pigs and peccaries alongside novel case studies on conservation activities and management One hundred leading experts from twenty five countries synthesise understanding of this group of species discussing current research and gaps in the knowledge of researchers conservation biologists zoologists wildlife managers and students This beautifully illustrated reference includes the long history of interactions between wild pigs and humans the benefits some species have brought us and their role and impact on natural ecosystems

**Deer and People** Karis Baker, Ruth Carden, Richard Madgwick, 2014-09-30 Deer have been central to human cultures throughout time and space whether as staples to hunter gatherers icons of Empire or the focus of sport Their social and economic importance has seen some species transported across continents transforming landscape as they went with the establishment of menageries and park The fortunes of other species have been less auspicious some becoming extirpated or being in threat of extinction due to pressures of over hunting and or human instigated environmental change In spite of their diverse deep rooted and long standing relations with human societies no multi disciplinary volume of research on cervids has until now been produced This volume draws together research on deer from wide ranging disciplines and in so doing substantially advances our broader understanding of human deer relationships in the past and the present Themes include species dispersal exploitation patterns symbolic significance material culture and art effects on the landscape and management The temporal span of research ranges from the Pleistocene to the modern day and covers Europe North America and Asia Papers derived from international conferences held at the University of Lincoln and in Paris

Terrestrial Cetartiodactyla Luca Corlatti, Frank E. Zachos, 2022-09-29 This volume provides comprehensive overviews of each terrestrial cetartiodactyl species biology including palaeontology physiology genetics reproduction and development ecology habitat and diet Their economic significance and management as well as future challenges for research and conservation are also addressed Each chapter includes a distribution map a photograph of the animal and key literature This authoritative volume of the Handbook of the Mammals of Europe is a timely and detailed compilation of all European terrestrial cetartiodactyls and will appeal to academics and students in mammal research as well as to professionals dealing with mammal management including control use and conservation

**Advances in Ungulate Ecology** R. Terry Bowyer, Vernon Bleich, Paul Richard Krausman, Jean-Michel Gaillard, 2021-06-28 *Sika Deer: Life History Plasticity and Management* Koichi Kaji, Hiroyuki Uno, Hayato Iijima, 2022-06-20 This book provides complete and up to date information on sika deer biology and its management focusing on their life history with an integrated approach of population dynamics

morphology genetics and evolution The expanding distribution of sika and its increase in population in Japan and other countries are causing damage to agriculture and forestry impacting ecosystems and affecting other species We are facing conflicting deer issues regarding the conservation of resource values and pest control of sika deer This contributed volume compiles new findings focusing on the ecological plasticity of the sika deer It aims to clarify the ecological characteristics of the deer by integrating studies of different approaches and provides a perspective for their management The book consists of six parts Part I introduces the ecological and management background behind the history of sika deer The following four parts discuss movement ecology Part II impact on vegetation and bottom up effect on sika deer Part III impact on ecosystem and its resilience Part IV and comparison of life history characteristics between sika deer and other ungulate species Part V The last part Part VI covers the science based management of sika deer Contributed by recognized experts and young researchers of sika deer this book appeals to researchers and professionals in wildlife biology and wildlife management evolution population dynamics morphology genetics and reproductive physiology

**Forest Microbiology Vol.3\_Tree Diseases and Pests** Fred O Asiegbu,Andriy Kovalchuk,2022-07-28 Forest Microbiology Tree Diseases and Pests Volume Three in the Forest Microbiology series provides an overview of major disease agents of trees including viruses phytoplasma bacteria fungi nematodes and major insect pests With a strong emphasis on genetics biochemistry physiology evolutionary biology and population dynamics of the organisms involved this book provides a comprehensive understanding on the health of forests Sections cover important pest threats such as bark beetles emerald ash borer coffee borers leaf cutting ants cocoa mirids and more This volume highlights a range of emerging diseases of forest trees in temperate and tropic regions as well as information on habitats Forest trees play crucial roles not only for mitigating effects of the climate change but also for their considerable economic and ecological value Forest trees are equally vital as an alternative bioenergy source and play important roles in pollution abatement and the maintenance of biodiversity Timber and its associated products from forest trees contribute substantially to the revenue generation of many countries of the world Includes case studies of complex diseases of economically important trees Highlights novel approaches to managing tree pests and diseases in a changing climate Focuses on the many functions of microbial disease agents of trees Addresses major insect pests of boreal temperate and tropical trees

Demographic Methods across the Tree of Life Roberto Salguero-Gomez,Marlène Gamelon,2021-08-31 Demography is everywhere in our lives from birth to death Indeed the universal currencies of survival development reproduction and recruitment shape the performance of all species from microbes to humans The number of techniques for demographic data acquisition and analyses across the entire tree of life microbes fungi plants and animals has drastically increased in recent decades These developments have been partially facilitated by the advent of technologies such as GIS and drones as well as analytical methods including Bayesian statistics and high throughput molecular analyses However despite the universality of demography and the significant research potential that could emerge from unifying i questions

across taxa ii data collection protocols and iii analytical tools demographic methods to date have remained taxonomically siloed and methodologically disintegrated This is the first book to attempt a truly unified approach to demography and population ecology in order to address a wide range of questions in ecology evolution and conservation biology across the entire spectrum of life This novel book provides the reader with the fundamentals of data collection model construction analyses and interpretation across a wide repertoire of demographic techniques and protocols It introduces the novice demographer to a broad range of demographic methods including abundance based models life tables matrix population models integral projection models integrated population models individual based models and more Through the careful integration of data collection methods analytical approaches and applications clearly guided throughout with fully reproducible R scripts the book provides an up to date and authoritative overview of the most popular and effective demographic tools *Demographic Methods across the Tree of Life* is aimed at graduate students and professional researchers in the fields of demography ecology animal behaviour genetics evolutionary biology mathematical biology and wildlife management *Animals' Influence on the Landscape and Ecological Importance* Friedrich-Karl Holtmeier,2014-10-22 In its first English language edition this book introduces the many faceted interactions of animal populations with their habitats From soil fauna ants and termites to small and large herbivores burrowing mammals and birds the author presents a comprehensive analysis of animals and ecosystems that is as broad and varied as all nature Chapter 2 addresses the functional role of animals in landscape ecosystems emphasizing fluxes of energy and matter within and between ecosystems and the effects of animals on qualitative and structural habitat change Discussion includes chapters on the role of animal population density and the impacts of native herbivores on vegetation and habitats from the tropics to the polar regions Cyclic mass outbreaks of species such as the larch bud moth in Switzerland the mountain pine beetle and the African red billed weaver bird are described and analyzed Other chapters discuss Zoochory the dispersal of seeds by ants mammals and birds and the influence of burrowing animals on soil development and geomorphology Consideration extends to the impact of feral domestic animals Chapter 5 focuses on problems resulting from introduction of alien animals and from re introduction of animal species to their original habitats discusses the effects on ecosystems of burrowing digging and trampling by animals The author also addresses keystone species such as kangaroo rats termites and beavers Chapter 6 addresses the role of animals in landscape management and nature conservation with chapters on the impact of newcomer species such as animals introduced into Australia New Zealand and Europe and the consequences of reintroduction of species to original habitat It also discusses the carrying capacity of natural habit public attitudes toward conversation and more The final section ponders the effects of climate on interactions between animals and their habitats *Nature's Contributions to People: On the Relation Between Valuations and Actions* Marie Stenseke,Thomas H. Beery,Martin F. Quaas,2021-08-26

**Human-Wildlife Interactions** Beatrice Frank,Jenny A. Glikman,Silvio Marchini,2019-05-02 Presents solutions to turn

conflict into tolerance and coexistence with an emphasis on the human dimensions of human wildlife interactions

**Satellite Remote Sensing for Conservation Action** Allison K. Leidner, Graeme M. Buchanan, 2018-08-16 Explains how satellite remote sensing informs and helps deliver successful conservation management through case studies which highlight practitioner experience

**Primates and Lagomorpha** Klaus Hackländer, Paulo C. Alves, 2023-05-31 This volume provides comprehensive overviews of the primate s and each lagomorph species biology including palaeontology physiology genetics reproduction and development ecology habitat diet mortality and age determination Their economic significance and management as well as future challenges for research and management are also addressed Each chapter includes a distribution map a photograph of the animal and key literature This authoritative volume of the Handbook of the Mammals of Europe is a timely and detailed compilation of all European primates and lagomorphs and will appeal to academics and students in mammal research as well as to professionals dealing with mammal management including control use and conservation

Wildlife Parasitology: Emerging Diseases and Neglected Parasites Georgiana Deak, Nina Germitsch, Alicia Rojas ,Alireza Sazmand, 2024-07-22 Climate change agricultural practices and landscape changes have caused ecosystem fragmentation and increased the parasite spillover from wildlife to humans and domestic animals and vice versa Wild animals have a very important role in maintaining and spreading different pathogens to domestic animals and humans Most of these pathogens affect more than one animal species complicating their control in nature Parasitic diseases are commonly identified in wild animals livestock and companion animals In domestic animals prevention and antiparasitic treatments are necessary for good health and are used to treat and prevent infections However if left untreated some parasitic diseases severely affect the host and more rarely can be fatal

**Harvest of Fish and Wildlife** Kevin L. Pope, Larkin A. Powell, 2021-06-06 Harvest of Fish and Wildlife New Paradigms for Sustainable Management unites experts in wildlife and fishery sciences for an interdisciplinary overview of harvest management This book presents unique insights for embracing the complete social ecological system to ensure a sustainable future It educates users on evolutionary and population dynamics social and political influences hunter and angler behavior decision processes impacts of regulations and stakeholder involvement Features Written by twenty four teams of leading scientists and managers Promotes transparent justification for fishing and hunting regulations Provides examples for integrating decision making into management Emphasizes creativity in management by integrating art and science This book appeals to population biologists evolutionary biologists and social scientists It is a key resource for on the ground managers and research scientists developing harvesting applications As the book s contributors explain Making decisions that are robust to uncertainty is a paradigm shift with a lot of potential to improve outcomes for fish and wildlife populations Andrew Tyre and Brigitte Tenhumberg Temporal shifts in system states must somehow be anticipated and dealt with to derive harvest policies that remain optimal in the long term Michael Conroy Proactive effective management of sportspersons will be essential in the new paradigm of harvest
