**Design Manual Pump Station** Los Angeles County Flood Control District,1971\*      The Gas Station in America John A. Jakle,Keith A. Sculle,1994 The first architect designed gas station a Pittsburgh Gulf station in 1913 was also the first to offer free road maps the familiar Shell name and logo date from 1907 when a British mother of pearl importer expanded its line to include the newly discovered oil of the Dutch East Indies the first enclosed gas stations were built only after the first enclosed cars made motoring a year round activity and operating a service station was no longer a seasonal job the system of octane rating was introduced by Sun Oil as a marketing gimmick 74 for premium in 1931 As the number of true gas stations continues its steady decline from 239 000 in 1969 to fewer than 100 000 today the words and images of this book bear witness to an economic and cultural phenomenon that was perhaps more uniquely American than any other of this century

Jacket      *The Randstad* Wil Zonneveld,Vincent Nadin,2020-12-29 The Randstad metropolitan region encompassing Amsterdam The Hague Rotterdam and Utrecht in the western Netherlands is regarded worldwide as a model of a successful polycentric metropolis It is widely cited as an example of how a region of interconnected small cities can effectively compete globally by providing complementary functions which together match the power of large monocentric cities The methods of strategic spatial planning regional design and strategic projects that are said to underpin this polycentric metropolis are used as models for practitioners and students around the world But is this high reputation deserved Does the Randstad really function as a polycentric metropolis The operation of the Randstad as a polycentric networked region is controversial both in terms of the actual strength of relations between its component parts and the value of promoting polycentricity in policy What are the costs and benefits of a Randstad metropolis Does polycentricity improve the performance of the region in economic social and environmental terms How has the polycentric metropolis evolved and what part is played by its delta location Has spatial planning made a difference in the form and operation of the region today How will this spatial configuration fare in the face of the climate crisis and need to create healthy cities and regions Is there benefit in pursuing the idea of a polycentric metropolis in government policy and action and how These questions are of critical interest within the Netherlands but experience in the Randstad offers valuable insights to many other complex urban regions around the
