**MultiMedia Modeling** Apr 17 2021 The two-volume set LNCS 8325 and 8326 constitutes the thoroughly refereed proceedings of the 20th Anniversary International Conference on Multimedia Modeling, MMM 2014, held in Dublin, Ireland, in January 2014. The 46 revised regular papers, 11 short papers, and 9 demonstration papers were carefully reviewed and selected from 176 submissions. 28 special session papers and 6 papers from Video Browser Showdown workshop are also included in the proceedings. The papers included in these two volumes cover a diverse range of topics including: applications of multimedia modelling, interactive retrieval, image and video collections, 3D and augmented reality, temporal analysis of multimedia content, compression and streaming. Special session papers cover the following topics: Mediadrom: artful post-TV scenarios, MM analysis for surveillance video and security applications, 3D multimedia computing and modeling, social geo-media analytics and retrieval, multimedia hyperlinking and retrieval.

**New Advances in Building Information Modeling and Engineering Management** Dec 18 2023 This book explores the latest advances in the field of building management. Several chapters use new technologies such as the BIM methodology for collecting life cycle information and managing the maintenance of existing buildings, sharing

valid historical and architectural heritage data, energy analysis of building envelopes, and planning new buildings or sustainable building practices. In addition, other tools are presented that focus on improving access to BIM information, open-source governance, mobile applications to accelerate information transfer, the use of blockchain, lean design methods, and open-source software to solve critical path problems. Some contributions feature the assessment of occupational risks in construction, as it is necessary to plan preventive measures based on risk assessments integrated throughout the construction process, which is another important element for the management of this sector.

Impact of Industry 4.0 on Architecture and Cultural Heritage Apr 10 2023 In the modern age of the 4th Industrial Revolution, advancements in communication and connectivity are transforming the professional world as new technologies are being embedded into society. These innovations have triggered the development of a digitally driven world where adaptation is necessary. This is no different in the architectural field, where the changing paradigm has opened new methods and advancements that have yet to be researched. Impact of Industry 4.0 on Architecture and Cultural Heritage is a pivotal reference source that provides vital research on the application of new technological tools, such as digital modeling, within architectural design, and improves the understanding of the strategic role of Industry 4.0 as a tool to empower the role of architecture and cultural heritage in society. Moreover, the book provides insights and support concerned with advances

in communication and connectivity among digital environments in different types of research and industry communities. While highlighting topics such as semantic processing, crowdsourcing, and interactive environments, this publication is ideally designed for architects, engineers, construction professionals, cultural researchers, academicians, and students.

**Advancing Knowledge on Cyanobacterial Blooms in Freshwaters** Aug 14 2023 Cyanobacterial blooms are a water quality problem that is widely acknowledged to have detrimental ecological and economic effects in drinking and recreational water supplies and fisheries. There is increasing evidence that cyanobacterial blooms have increased globally and are likely to expand in water resources as a result of climate change. Of most concern are cyanotoxins, along with the mechanisms that induce their release and determine their fate in the aquatic environment. These secondary metabolites pose a potential hazard to human health and agricultural and aquaculture products that are intended for animal and human consumption; therefore, strict and reliable control of cyanotoxins is crucial for assessing risk. In this direction, a deeper understanding of the mechanisms that determine cyanobacterial bloom structure and toxin production has become the target of management practices. This Special Issue, entitled “Advancing Knowledge on Cyanobacterial Blooms in Freshwaters”, aims to bring together recent multi- and interdisciplinary research, from the field to the laboratory and back again, driven by working hypotheses based on any

aspect of mitigating cyanobacterial blooms, from ecological theory to applied research.

**The Lens** Nov 24 2021 Which lens should I buy for my camera? It's such a simple question, but choosing the right lens or lenses is actually one of the most important photographic decisions you can make. Nothing affects the quality of a photo more than the lens. It's no longer just about the megapixels-it's the glass that makes all the difference! Many first-time buyers of DSLRs don't venture past the basic lens included in the box. While some are reluctant to spend more money, others are confused by all the buzzwords or are overwhelmed by all the choices out there. It's really a shame, because interchangeable lenses give you amazing scope for quality photography. Take in vast sweeping scenes with a wide angle lens. Capture faraway birds with a telephoto lens. Examine the tiniest detail of a flower with a macro lens. Record the perfect portrait with a prime lens. Anything is possible when you choose the right lens for the job! This book isn't a simple catalogue of available lenses. New products are coming out all the time, and comparing specific lenses can be difficult. Instead, author N.K. Guy gives you all the information you need to make smart buying decisions. Optical technology is

demystified, arcane terminology is decoded, and practical tips are provided. The Lens will help you build the perfect lens collection to suit your needs-now and in the future.

Mit viel Fachkenntnis zeigen sie die Verbindung zwischen Technik und Motiv auf und liefern Tipps und Tricks für die gängigsten Fotogenres ab. Die vielen hochwertigen Beispielbilder sind alle mit dem NEX-System aufgenommen worden.

Remotely Sensed Albedo Feb 25 2022 Albedo is a known and documented phenomenon, defined as the reflectivity of a surface, i.e., the ratio of reflected light energy to incident light energy. It is a dimensionless quantity, used in particular in agro-forestry, urban environment, cryosphere

and geology. It is an Essential Climate Variable (ECV), deemed extremely meaningful to compute the earth heat balance. The albedo of natural surfaces varies largely, especially in the visible, with the lowest values found for water bodies and dense vegetation canopies and the highest values for desert and snow. It also changes with the angular distribution and spectral composition of the incident radiation and with the surface moisture. Satellite observations allow consistent measuring of the surface albedo at continental scale over a short period of time. Long-term series of surface albedo are good indicators of climate change, especially over glaciers and polar caps. On the other hand, the albedo of bare soil provides a good diagnostic of their degradation. The reliability of satellite albedo is verified against ground-based radiometers and UAV, which also serves to calibrate the instruments embarked on spaceborne observing systems and check the quality of the atmospheric correction.

*Making Short Films, Third Edition* Dec 06 2022 Making movies is the most exciting way to earn a living and it is not surprising that media and film studies remain the most popular courses at colleges across the western world. A short film provides an opportunity for elliptical, poetic, condensed story telling. Shorts can take risks rarely seen in features. It is the arena where a strong voice or individual vision is possible; an invitation for experimentation and originality. *Making Short Films, 3rd edition* is entirely revised and restructured, providing a much more complete and detailed guide to filmmaking, with more information on new technology, illustrations and ideas for best practice.

**Goodbye, Things: The New Japanese Minimalism** Jul 13 2023 The best-selling phenomenon from Japan that shows us a minimalist life is a happy life. Fumio Sasaki is not an enlightened minimalism expert or organizing guru like Marie Kondo—he's just a regular guy who was stressed out and constantly comparing himself to others, until one day he decided to change his life by saying goodbye to everything he didn't absolutely need. The effects were remarkable: Sasaki gained true freedom, new focus, and a real sense of gratitude for everything around him. In *Goodbye, Things* Sasaki modestly shares his personal minimalist experience, offering specific tips on the minimizing process and revealing how the new minimalist movement can not only transform your space but truly enrich your life. The benefits of a minimalist life can be realized by anyone, and Sasaki's humble vision of true happiness will open your eyes to minimalism's potential.

[Social Activism in Women's Tennis](#) Dec 26 2021 Analyzing the key players and political moments in women's professional tennis since 1968, this book explores the historical lineage of social activism within women's tennis and the issues, expressions, risks, and effects associated with each cohort of players. Drawing on original qualitative

research, including interviews with former players, the book examines tennis's position in debates around gender, sexuality, race, and equal pay. It looks at how the actions and choices of the pioneering activist players were simultaneously shaped by, and had a part in shaping, larger social movements committed to challenging the status quo and working towards increased economic equality for women. Taking an intersectional approach, the book assesses the significance of players from Althea Gibson and Martina Navratilova to Venus and Serena Williams, illuminating our understanding of the relationship between sport, social justice, and wider society. This is important reading for researchers and students working in sport studies, sociology, women's studies, and political science, as well as anybody with an interest in social activism and social movements. It is also a fascinating read for the general tennis fan.

*Le Sony NEX-7* Feb 13 2021 Le Sony NEX-7 est la version résolument orientée vers les photographes (et vidéastes) experts de la gamme d'appareils compacts à objectifs interchangeables de la marque. Il dispose d'un capteur de taille dite "APS-C" de la plus haute définition connue pour ce format début 2012, soit 24 millions de pixels. Cet appareil est équipé d'un viseur électronique à hauteur d'oeil, permettant un cadrage sur 100 % de l'image, et un d'écran arrière très pratique en vidéo sur pied. Mais il est surtout extraordinairement polyvalent en matière d'objectifs compatibles, pouvant utiliser en autofocus non seulement toute la gamme Sony pour reflex, mais aussi de très nombreux objectifs tiers à mise au point manuelle, le tout

grâce à de multiples adaptateurs. L'appareil est-il vraiment pratique pour tous les styles photographiques ou bien son usage est-il limité ? Avec une telle définition, les hautes sensibilités restent-elles exploitables ? Quels sont les logiciels conseillés pour le post-traitement ? Quels sont les réglages de base pour la vidéo ? Et quelles optiques choisir, de marque Sony ou compatibles ? Jean-Marie Sepulchre a été responsable et animateur de clubs photo depuis 1974, fondateur ou partenaire de plusieurs sites web consacrés à la photographie depuis 1998, et auteur régulier de tests d'optiques pour la revue lemondedelaphoto.com. Il est auteur aux éditions Eyrolles des ouvrages Tout photographe en numérique, Apprendre à photographier en numérique, Photographier avec son téléphone et DxO pour les photographes, ainsi que de nombreux e-books consacrés à des tests d'objectifs et conseils de réglages pour les reflex Nikon, dont le D3s. Depuis 2010, il a par ailleurs publié quatre e-books dans cette nouvelle collection qui présente les points forts d'un appareil récent et donne des conseils sur les choix d'objectifs, mesures à l'appui (Leica M9, Nikon D7000, Nikon D5100, Canon 1D Mk IV).
