States of Matter Simulation Lab

Before you open the simulation:

PREDICT

1. Draw a diagram below showing what you think the molecules will look like for each state of matter: solid, liquid, and gas. Write a sentence below each diagram predicting what the motion of the molecules will be like.

	Solid	Liquid	Gas
Diagram of molecules			
Sentence explaining how molecules will be moving	The molecules are organized and do not move around.	The molecules slowly begin moving because they are less organized. However, they will stay within the container they are held in.	The molecules are fast moving and will move within the container as well as outside the container.

2. If you start with a substance as a solid, what will happen to the molecules as you add thermal energy (heat)?

If the molecules are heated as that means they will begin moving faster and faster due to becoming less organized.

ONCE YOU HAVE COMPLETED THIS PAGE YOU MAY BEGIN THE SIMULATION.

Open the simulation. You will find it in a folder on your desktop labeled "States of Matter Simulation."

INVESTIGATE

1. Use the menu on the right side of the program to select Water and Solid. Draw and describe what you see in the space below.

Diagram	Description
	The molecules are barely moving and clumped together.

4. Now, use the slider on the bottom of the program to Add Heat. Notice the thermometer at the top of the program. What temperature scale is this thermometer showing? Fahrenheit.

5. What happens to the water as you increase the temperature? That turns faster and faster.

6. What is the melting/freezing point of water in Fahrenheit? 32 F.

7. Add heat until the temperature is just below and then just above the melting point of water. How is water different below its melting point and above it? That moves faster.

8. Draw and describe what water looks like as a liquid.

Diagram	Description
	The molecules aren't really moving in an organized group.

Biology for AP® Courses Julianne Zedalis, John Eggebrecht, 2017-10-16 Biology for AP courses covers the scope and sequence requirements of a typical two semester Advanced Placement biology course The text provides comprehensive coverage of foundational research and core biology concepts through an evolutionary lens Biology for AP Courses was designed to meet and exceed the requirements of the College Board's AP Biology framework while allowing significant flexibility for instructors Each section of the book includes an introduction based on the AP curriculum and includes rich features that engage students in scientific practice and AP test preparation it also highlights careers and research opportunities in biological sciences

The Beak of the Finch Jonathan Weiner, 2014-05-14 PULITZER PRIZE WINNER A dramatic story of groundbreaking scientific research of Darwin's discovery of evolution that sparks not just the intellect but the imagination Washington Post Book World Admirable and much needed Weiner's triumph is to reveal how evolution and science work and to let them speak clearly for themselves The New York Times Book Review On a desert island in the heart of the Galapagos archipelago where Darwin received his first inklings of the theory of evolution two scientists Peter and Rosemary Grant have spent twenty years proving that Darwin did not know the strength of his own theory For among the finches of Daphne Major natural selection is neither rare nor slow it is taking place by the hour and we can watch In this remarkable story Jonathan Weiner follows these scientists as they watch Darwin's finches and come up with a new understanding of life itself *The Beak of the Finch* is an elegantly written and compelling masterpiece of theory and explication in the tradition of Stephen Jay Gould

Phenotypes and Genotypes Florian Frommlet, Małgorzata Bogdan, David Ramsey, 2016-02-12 This timely text presents a comprehensive guide to genetic association a new and rapidly expanding field that aims to elucidate how our genetic code genotypes influences the traits we possess phenotypes The book provides a detailed review of methods of gene mapping used in association with experimental crosses as well as genome wide association studies Emphasis is placed on model selection procedures for analyzing data from large scale genome scans based on specifically designed modifications of the Bayesian information criterion Features presents a thorough introduction to the theoretical background to studies of genetic association both genetic and statistical reviews the latest advances in the field illustrates the properties of methods for mapping quantitative trait loci using computer simulations and the analysis of real data discusses open challenges includes an extensive statistical appendix as a reference for those who are not totally familiar with the fundamentals of statistics

Preparing for the Biology AP Exam Neil A. Campbell, Jane B. Reece, Fred W. Holtzclaw, Theresa Knapp Holtzclaw, 2009-11-03 Fred and Theresa Holtzclaw bring over 40 years of AP Biology teaching experience to this student manual Drawing on their rich experience as readers and faculty consultants to the College Board and their participation on the AP Test Development Committee the Holtzclaws have designed their resource to help your

students prepare for the AP Exam Completely revised to match the new 8th edition of Biology by Campbell and Reece New Must Know sections in each chapter focus student attention on major concepts Study tips information organization ideas and misconception warnings are interwoven throughout New section reviewing the 12 required AP labs Sample practice exams The secret to success on the AP Biology exam is to understand what you must know and these experienced AP teachers will guide your students toward top scores

Teaching and Learning STEM Richard M. Felder, Rebecca Brent, 2024-03-19

The widely used STEM education book updated Teaching and Learning STEM A Practical Guide covers teaching and learning issues unique to teaching in the science technology engineering and math STEM disciplines Secondary and postsecondary instructors in STEM areas need to master specific skills such as teaching problem solving which are not regularly addressed in other teaching and learning books This book fills the gap addressing topics like learning objectives course design choosing a text effective instruction active learning teaching with technology and assessment all from a STEM perspective You ll also gain the knowledge to implement learner centered instruction which has been shown to improve learning outcomes across disciplines For this edition chapters have been updated to reflect recent cognitive science and empirical educational research findings that inform STEM pedagogy You ll also find a new section on actively engaging students in synchronous and asynchronous online courses and content has been substantially revised to reflect recent developments in instructional technology and online course development and delivery Plan and deliver lessons that actively engage students in person or online Assess students progress and help ensure retention of all concepts learned Help students develop skills in problem solving self directed learning critical thinking teamwork and communication Meet the learning needs of STEM students with diverse backgrounds and identities The strategies presented in Teaching and Learning STEM don t require revolutionary time intensive changes in your teaching but rather a gradual integration of traditional and new methods The result will be a marked improvement in your teaching and your students learning

Discipline-Based Education Research National Research Council, Division of Behavioral and Social Sciences and Education, Board on Science Education, Committee on the Status, Contributions, and Future Directions of Discipline-Based Education Research, 2012-08-27

The National Science Foundation funded a synthesis study on the status contributions and future direction of discipline based education research DBER in physics biological sciences geosciences and chemistry DBER combines knowledge of teaching and learning with deep knowledge of discipline specific science content It describes the discipline specific difficulties learners face and the specialized intellectual and instructional resources that can facilitate student understanding Discipline Based Education Research is based on a 30 month study built on two workshops held in 2008 to explore evidence on promising practices in undergraduate science technology engineering and mathematics STEM education This book asks questions that are essential to advancing DBER and broadening its impact on undergraduate science teaching and learning The book provides empirical research on undergraduate teaching and learning in the sciences explores the extent to which this research currently

influences undergraduate instruction and identifies the intellectual and material resources required to further develop DBER Discipline Based Education Research provides guidance for future DBER research In addition the findings and recommendations of this report may invite if not assist post secondary institutions to increase interest and research activity in DBER and improve its quality and usefulness across all natural science disciplines as well as guide instruction and assessment across natural science courses to improve student learning The book brings greater focus to issues of student attrition in the natural sciences that are related to the quality of instruction Discipline Based Education Research will be of interest to educators policy makers researchers scholars decision makers in universities government agencies curriculum developers research sponsors and education advocacy groups

Lizards in an Evolutionary Tree Jonathan B.

Losos,2011-02-09 In a book both beautifully illustrated and deeply informative Jonathan Losos a leader in evolutionary ecology celebrates and analyzes the diversity of the natural world that the fascinating anoline lizards epitomize Readers who are drawn to nature by its beauty or its intellectual challenges or both will find his book rewarding Douglas J Futuyma State University of New York Stony Brook This book is destined to become a classic It is scholarly informative stimulating and highly readable and will inspire a generation of students Peter R Grant author of How and Why Species Multiply The Radiation of Darwin s Finches Anoline lizards experienced a spectacular adaptive radiation in the dynamic landscape of the Caribbean islands The radiation has extended over a long period of time and has featured separate radiations on the larger islands Losos the leading active student of these lizards presents an integrated and synthetic overview summarizing the enormous and multidimensional research literature This engaging book makes a wonderful example of an adaptive radiation accessible to all and the lavish illustrations especially the photographs make the anoles come alive in one s mind David Wake University of California Berkeley This magnificent book is a celebration and synthesis of one of the most eventful adaptive radiations known With disarming prose and personal narrative Jonathan Losos shows how an obsession beginning at age ten became a methodology and a research plan that together with studies by colleagues and predecessors culminated in many of the principles we now regard as true about the origins and maintenance of biodiversity This work combines rigorous analysis and glorious natural history in a unique volume that stands with books by the Grants on Darwin s finches among the most informed and engaging accounts ever written on the evolution of a group of organisms in nature Dolph Schluter author of The Ecology of Adaptive Radiation

News Inc Portland OR *ICOPE 2020* Ryzal Perdana, Gede Eka Putrawan, Sunyono, 2021-03-24 We are delighted to introduce the Proceedings of the Second International Conference on Progressive Education ICOPE 2020 hosted by the Faculty of Teacher Training and Education Universitas Lampung Indonesia in the heart of the city Bandar Lampung on 16 and 17 October 2020 Due to the COVID 19 pandemic we took a model of an online organised event via Zoom The theme of the 2nd ICOPE 2020 was Exploring the New Era of Education with various related topics including Science Education Technology and Learning Innovation Social and Humanities Education Education Management Early Childhood Education Primary Education Teacher Professional Development Curriculum and Instructions Assessment and Evaluation and Environmental Education This conference has invited academics researchers teachers practitioners and students worldwide to participate and exchange ideas experiences and research findings in the field of education to make a better more efficient and impactful teaching and learning This conference was attended by 190 participants and 160 presenters Four keynote papers were delivered at the conference the first two papers were delivered by Prof Emeritus Stephen D Krashen from the University of Southern California the USA and Prof Dr Bujang Rahman M Si from Universitas Lampung Indonesia The second two papers were presented by Prof Dr Habil Andrea Bencsik from the University of Pannonia Hungary and Dr Hisham bin Dzakiria from Universiti Utara Malaysia Malaysia In addition a total of 160 papers were also presented by registered presenters in the parallel sessions of the conference The conference represents the efforts of many individuals Coordination with the steering chairs was essential for the success of the conference We sincerely appreciate their constant support and guidance We would also like to express our gratitude to the organising committee members for putting much effort into ensuring the success of the day to day operation of the conference and the reviewers for their hard work in reviewing submissions We also thank the four invited keynote speakers for sharing their insights Finally the conference would not be possible without the excellent papers contributed by authors We thank all authors for their contributions and participation in the 2nd ICOPE 2020 We strongly believe that the 2nd ICOPE 2020 has provided a good forum for academics researchers teachers practitioners and students to address all aspects of education related issues in the current educational situation We feel honoured to serve the best recent scientific knowledge and development in education and hope that these proceedings will furnish scholars from all over the world with an excellent reference book We also expect that the future ICOPE conference will be more successful and stimulating Finally it was with great pleasure that we had the opportunity to host such a conference

Molecular Biology of the Cell, 2002 *Process Oriented Guided Inquiry Learning (POGIL)* Richard Samuel Moog, 2008 POGIL is a student centered group learning pedagogy based on current learning theory This volume describes POGIL's theoretical basis its implementations in diverse environments and evaluation of student outcomes **On the Origin of Species Illustrated** Charles Darwin, 2020-12-04 On the Origin of Species or more completely On the Origin of Species by Means of Natural Selection or the Preservation of Favoured Races in the Struggle for Life 3 published on 24

November 1859 is a work of scientific literature by Charles Darwin which is considered to be the foundation of evolutionary biology 4 Darwin s book introduced the scientific theory that populations evolve over the course of generations through a process of natural selection It presented a body of evidence that the diversity of life arose by common descent through a branching pattern of evolution Darwin included evidence that he had gathered on the Beagle expedition in the 1830s and his subsequent findings from research correspondence and experimentation

Innumeracy John Allen Paulos,2011-04-01 Readers of Innumeracy will be rewarded with scores of astonishing facts a fistful of powerful ideas and most important a clearer more quantitative way of looking at their world Why do even well educated people understand so little about mathematics And what are the costs of our innumeracy John Allen Paulos in his celebrated bestseller first published in 1988 argues that our inability to deal rationally with very large numbers and the probabilities associated with them results in misinformed governmental policies confused personal decisions and an increased susceptibility to pseudoscience of all kinds Innumeracy lets us know what we re missing and how we can do something about it Sprinkling his discussion of numbers and probabilities with quirky stories and anecdotes Paulos ranges freely over many aspects of modern life from contested elections to sports stats from stock scams and newspaper psychics to diet and medical claims sex discrimination insurance lotteries and drug testing

Overcoming Students' Misconceptions in Science Mageswary Karpudewan,Ahmad Nurulazam Md Zain,A.L. Chandrasegaran,2017-03-07 This book discusses the importance of identifying and addressing misconceptions for the successful teaching and learning of science across all levels of science education from elementary school to high school It suggests teaching approaches based on research data to address students common misconceptions Detailed descriptions of how these instructional approaches can be incorporated into teaching and learning science are also included The science education literature extensively documents the findings of studies about students misconceptions or alternative conceptions about various science concepts Furthermore some of the studies involve systematic approaches to not only creating but also implementing instructional programs to reduce the incidence of these misconceptions among high school science students These studies however are largely unavailable to classroom practitioners partly because they are usually found in various science education journals that teachers have no time to refer to or are not readily available to them In response this book offers an essential and easily accessible guide

Innovations, Technologies and Research in Education Linda Daniela,2018-06-11 The book includes studies presented at the ATEE Spring Conference 2017 on emerging trends in the use of technology in educational processes the use of robotics to facilitate the construction of knowledge how to facilitate learning motivation transformative learning and innovative educational solutions Chapters here are devoted to studies on the didactic aspects of technology usage how to facilitate learning and the

social aspects affecting acquisition of education among others This volume serves as a basis for further discussions on the development of educational science on topical research fields and practical challenges It will be useful to scientists in the educational field who wish to get acquainted with the results of studies conducted in countries around the world on emerging educational issues Moreover teachers who need to implement into practice the newest scientific findings and opinions and future teachers who need to acquire new knowledge will also find this book useful
