

Light & Optics Exam Review

Name: _____ Period: _____ Date: _____

1) (TEKS 7B – EOC) The amplitude of a sound wave is to its loudness as the amplitude of a light wave is to its _____.

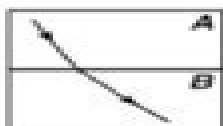

2) (TEKS 7D – EOC) Which property of light is illustrated by the diagram to the right?

3) (TEKS 7D – Supporting) A ray is reflected from a surface as shown in the diagram to the left.

Which letter represents the angle of incidence? _____

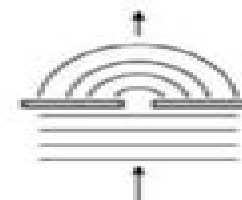

4. (TEKS 7D – EOC) As light passes from air into glass, its speed _____.

5) (TEKS 7D – EOC) The diagram to the left represents the path of periodic waves passing from medium A into medium B.

As the waves enter medium B, their speed _____.

6) (TEKS 7D – EOC) The diagram to the right represents waves passing through a small opening in a barrier. This is an example of _____.

7) (TEKS 7C – Supporting) List the following electromagnetic radiations from the shortest wavelength to the longest wavelength? Visible light, radio waves, ultraviolet, infrared

Note that this question is asking the wavelength of waves. Waves are also identified by their frequencies. The longer wavelength a wave has, the shorter frequency it has, because the speed of electromagnetic waves is constant in the same medium.

8) (TEKS 7C – Supporting) Compared to visible light, ultraviolet radiation is more harmful to human skin and eyes because ultraviolet radiation has a higher _____.

Note that energy of photons is directly proportional to their frequency.

9) (TEKS 7C – Supporting) Which of the following electromagnetic waves has the lowest frequency? A) green light B) red light C) violet light D) yellow light

Note that colors in light spectrum you remember are listed in the increasing order of frequency. R, O, Y, G, B, V.

11) (TEKS 7E – EOC) A convex (converging) lens can form images that are: A) virtual, only B) real, only C) neither real nor virtual D) either real or virtual

12) (TEKS 7E – EOC) Which diagram correctly shows the image of object X produced by plane mirror M?

Light Optics Test Review Answers

Light & Optics Science Learning Guide NewPath Learning,2014-03-01 The Light The EM Spectrum Transmission of Light Light Interactions with Light Reflections Refraction Light and Light in Technology Aligned to Next Generation Science Standards NGSS and other state standards *Last-minute Optics* David G. Hunter,Constance E. West,2010 The popular optics review manual Last Minute Optics A Concise Review of Optics Refraction and Contact Lenses has been revised and updated into a Second Edition This unique resource boils down the overwhelming subject matter of clinical optics and refraction helping the ophthalmologist cover the essentials in a single review manual The content is based upon the practical experience of two clinically active experts who lecture on ophthalmic optics around the world This updated Second Edition by Drs David G Hunter and Constance E West includes new questions added to selected chapters and a new chapter covering refractive surgery as well as a key chapter that helps you evaluate patients with symptoms related directly to optical or refractive concerns The complex concepts of optics are revealed in easy to understand explanations enhanced by simple illustrations Last Minute Optics Second Edition allows you to test your knowledge while increasing your understanding of optics Designed in a clear concise question and answer format this book allows for self assessment and a chance to test your understanding before you read the answer Features of the Second Edition Written in a light and approachable style to make optics accessible and understandable Unique question and answer format allows for self assessment while studying to identify areas where more work is needed Perfect for limited study time Includes real life examples that are clinically relevant Numerous practical tips to help enhance clinical practice Includes 223 questions and answers Whether you re an ophthalmologist ophthalmic technician resident or student reviewing the optics facts and concepts is easier with Last Minute Optics A Concise Review of Optics Refraction and Contact Lenses Second Edition **Last-Minute Optics** DAVID G. WAN HUNTER (MICHAEL J.. WEST, CONSTANCE.),David G Hunter, MD PhD,Michael J. Wan,Constance West,2024-07 Learn and review clinical optics and refraction with the newly revised edition of this popular resource Last Minute Optics 3rd Edition distills a vast amount of complex information into an easy to read engaging text that makes the most of your limited study time Now in full color for the first time this clear and concise review manual features a unique question and answer format that allows for self assessment and easy identification of areas where more study is needed Features a light approachable tone that helps you quickly gain a solid grasp of core optics concepts for optimal exam performance and clinical practice Provides a high yield quick review enhanced by full color illustrations and photos charts and graphs diagrams and new companion videos that illustrate key concepts in real time Uses a unique question and answer format with more than 225 questions and detailed answers that can be used to study and then test your understanding Includes exam pearls throughout that highlight practical tips for studying and taking both oral and written exams Covers the latest advancements in the field

including important updates on intraocular lens and refractive surgery technology Covers key topics such as instrumentation low vision intraocular lenses contact lenses refraction and optical dispensing and visual acuity testing Ideal for ophthalmology residents re certifying ophthalmologists optometry trainees orthoptists and ophthalmic technicians who need a firm grasp of this complex area of eye care An eBook version is included with purchase The eBook allows you to access all of the text figures and references with the ability to search customize your content make notes and highlights and have content read aloud Additional digital ancillary content may publish up to 6 weeks following the publication date

MCAT Physics and Math Review 2023-2024 Kaplan Test Prep, 2022-08-02 Kaplan's MCAT Physics and Math Review 2023 2024 offers an expert study plan detailed subject review and hundreds of online and in book practice questions all authored by the experts behind the MCAT prep course that has helped more people get into medical school than all other major courses combined Prepping for the MCAT is a true challenge Kaplan can be your partner along the way offering guidance on where to focus your efforts and how to organize your review This book has been updated to match the AAMC's guidelines precisely no more worrying about whether your MCAT review is comprehensive The Most Practice More than 350 questions in the book and access to even more online more practice than any other MCAT physics and math book on the market The Best Practice Comprehensive physics and math subject review is written by top rated award winning Kaplan instructors Full color 3 D illustrations from Scientific American charts graphs and diagrams help turn even the most complex science into easy to visualize concepts All material is vetted by editors with advanced science degrees and by a medical doctor Online resources including a full length practice test help you practice in the same computer based format you'll see on Test Day Expert Guidance High yield badges throughout the book identify the topics most frequently tested by the AAMC We know the test The Kaplan MCAT team has spent years studying every MCAT related document available Kaplan's expert psychometricians ensure our practice questions and study materials are true to the test

WAVE OPTICS SURESH GARG, SANJAY GUPTA, C. K. GHOSH, 2011-12-24 This textbook offers a complete and rigorous presentation of the fundamentals and applications of wave optics The material of the book covers topics on wave nature of light reflection refraction polarisation diffraction dispersion and scattering of electromagnetic waves Interference phenomenon is discussed both by division of wavefront and by division of amplitude Diffraction is classified as Fresnel diffraction and Fraunhofer diffraction The discussion on Fraunhofer diffraction has been used to explain the theory and resolving power of optical

instruments The role of phenomena of dispersion and scattering of light has been lucidly explained in the field of communication of information its quality and content The last three chapters are devoted to the study of the recently developed modern topics lasers holography and fibre optics all of which have opened up immense opportunities for new applications in almost all branches of science and engineering Though the book is intended for the undergraduate students of physics both honours and general courses it will also be useful to candidates aspiring to sit the competitive examinations

KEY FEATURES Presents interactive text interspersed with in text questions to enable students to shift focus on active learning Uses access devices such as expected learning outcomes and practice exercises for directed teaching learning Includes numerous worked out examples to illustrate the concepts and provides review questions to test the students understanding of the subject Gives chapter end summary for quick revision of the important results
