Chemistry 2e Paul Flowers, Richard Langely, William R. Robinson, Klaus Hellmut Theopold, 2019-02-14 *Chemistry 2e* is designed to meet the scope and sequence requirements of the two semester general chemistry course. The textbook provides an important opportunity for students to learn the core concepts of chemistry and understand how those concepts apply to their lives and the world around them. The book also includes a number of innovative features including interactive exercises and real world applications designed to enhance student learning. The second edition has been revised to incorporate clearer, more current and more dynamic explanations while maintaining the same organization as the first edition. Changes made in *Chemistry 2e* are described in the preface to help instructors transition to the second edition. **Prentice Hall Chemistry** Antony C. Wilbraham, 2006-10-15 Prentice Hall *Chemistry* meets the needs of students with a range of abilities, diversities, and learning styles by providing real world connections to chemical concepts and processes. The first nine chapters introduce students to the conceptual nature of chemistry before they encounter the more rigorous mathematical models and concepts in later chapters. The technology backbone of the program is the widely praised Interactive Textbook with ChemASAP which provides frequent opportunities to practice and reinforce key concepts with tutorials that bring chemistry to students through Animations, Simulations, Assessment, and Problem solving tutorials. *Chemistry* Theodore Lawrence Brown, H. Eugene LeMay, Bruce E. Peer-Led Team Learning J. A. Kampmeier, Pratibha Varma-Nelson, Donald K. Wedegaertner, 2000-09. Workbook developed from the Workshop Chemistry Project which explored, developed, and applied the concept of peer-led team learning in problem-solving workshops in introductory chemistry courses. General Chemistry Donald Allan McQuarrie, Peter A. Rock, Ethan B. Gallogly, 2011. Atoms First seems to be the flavor of the year in chemistry textbooks, but many of them seem to be little more than rearrangement of the chapters. It takes a master like McQuarrie to go back to the drawing board and create a logical development from smallest to largest that makes sense to students. Hal Harris, University of Missouri, St. Louis. McQuarrie's book is extremely well-written; the order of topics is logical, and it does a great job with both introductory material and more advanced concepts. Students of all skill levels will be able to learn from this book. Mark Kearley, Florida State University. This new fourth edition of *General Chemistry* takes an atoms-first approach from beginning to end. In the tradition of McQuarrie's many previous works, it promises to be another ground-breaking text. This superb new book combines the clear writing and wonderful problems that have made McQuarrie famous among chemistry professors and students worldwide. Presented in an elegant design with all new illustrations, it is available in a soft cover edition to offer professors a fresh choice at an outstanding value. Student supplements include an online series of descriptive chemistry Interchapters, a Student Solutions Manual, and an optional state-of-the-art Online Homework program. For adopting professors, an Instructor's Manual and a CD of the art are also available. **Chemistry** Nivaldo J. Tro, 2019-01-04. NOTE: This loose-leaf, three-hole-punched version of the textbook gives you the flexibility to take only what you need to class and add your own notes, all at an affordable price. For loose-leaf editions that include MyLab™ or Mastering™, several versions may exist for each title, and registrations are not transferable. You may need a Course ID provided by your instructor to register for and use MyLab or Mastering products. For courses in chemistry, actively engage students to become expert problem solvers and critical thinkers. Nivaldo Tro's *Chemistry: A Molecular Approach* presents chemistry visually through multi-level images, macroscopic, molecular, and symbolic representations to help students see the connections between the world they

see around them the atoms and molecules that compose the world and the formulas they write down on paper Interactive digital versions of select worked examples instruct students how to break down problems using Tro's unique Sort Strategize Solve and Check technique and then complete a step in the example To build conceptual understanding Dr Tro employs an active learning approach through interactive media that requires students to pause during videos to ensure they understand before continuing The 5th Edition pairs digital pedagogical innovation with insights from learning design and educational research to create an active integrated and easy to use framework The new edition introduces a fully integrated book and media package that streamlines course set up actively engages students in becoming expert problem solvers and makes it possible for professors to teach the general chemistry course easily and effectively Also available with Mastering Chemistry By combining trusted author content with digital tools and a flexible platform MyLab or Mastering personalizes the learning experience and improves results for each student The fully integrated and complete media package allows instructors to engage students before they come to class hold them accountable for learning during class and then confirm that learning after class NOTE You are purchasing a standalone product Mastering™ Chemistry does not come packaged with this content Students if interested in purchasing this title with Mastering Chemistry ask your instructor to confirm the correct package ISBN and Course ID Instructors contact your Pearson representative for more information If you would like to purchase both the loose leaf version of the text and Mastering Chemistry search for 0134990617 9780134990613 Chemistry A Molecular Approach Loose Leaf Plus Mastering Chemistry with Pearson eText Access Card Package 5 e Package consists of 0134989694 9780134874371 Chemistry A Molecular Approach 013498854X 9780134989693 Mastering Chemistry with Pearson eText ValuePack Access Card for Chemistry A Molecular Approach Loose Leaf Edition Chemistry Nivaldo J.
