Shaping Written Knowledge Charles Bazerman, 1988 The forms taken by scientific writing help to determine the very nature of science itself In this closely reasoned study Charles Bazerman views the changing forms of scientific writing as solutions to rhetorical problems faced by scientists arguing for their findings Examining such works as the early *Philosophical Transactions* and Newton's optical writings as well as *Physical Review* Bazerman views the changing forms of scientific writing as solutions to rhetorical problems faced by scientists The rhetoric of science is Bazerman demonstrates an embedded part of scientific activity that interacts with other parts of scientific activity including social structure and empirical experience This book presents a comprehensive historical account of the rise

and development of the genre and views these forms in relation to empirical experience Helping Children Learn Mathematics National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Mathematics Learning Study Committee, 2002-07-31 Results from national and international assessments indicate that school children in the United States are not learning mathematics well enough Many students cannot correctly apply computational algorithms to solve problems Their understanding and use of decimals and fractions are especially weak Indeed helping all children succeed in mathematics is an imperative national goal However for our youth to succeed we need to change how we re teaching this discipline Helping Children Learn Mathematics provides comprehensive and reliable information that will guide efforts to improve school mathematics from pre kindergarten through eighth grade The authors explain the five strands of mathematical proficiency and discuss the major changes that need to be made in mathematics instruction instructional materials assessments teacher education and the broader educational system and answers some of the frequently asked questions when it comes to mathematics instruction The book concludes by providing recommended actions for parents and caregivers teachers administrators and policy makers stressing the importance that everyone work together to ensure a mathematically literate society <https://books.google.com/books?id=PEZdDwAAQBAJ&pri...> ,

Permanent Present Tense Suzanne Corkin, 2013-05-14 In 1953 27 year old Henry Gustave Molaison underwent an experimental psychosurgical procedure a targeted lobotomy in an effort to alleviate his debilitating epilepsy The outcome was unexpected when Henry awoke he could no longer form new memories and for the rest of his life would be trapped in the moment But Henry s tragedy would prove a gift to humanity As renowned neuroscientist Suzanne Corkin explains in Permanent Present Tense she and her colleagues brought to light the sharp contrast between Henry s crippling memory impairment and his preserved intellect This new insight that the capacity for remembering is housed in a specific brain area revolutionized the science of memory The case of Henry known only by his initials H M until his death in 2008 stands as one of the most consequential and widely referenced in the spiraling field of neuroscience Corkin and her collaborators worked closely with Henry for nearly fifty years and in Permanent Present Tense she tells the incredible story of the life and legacy of this intelligent quiet and remarkably good humored man Henry never remembered Corkin from one meeting to the next and had only a dim conception of the importance of the work they were doing together yet he was consistently happy to see her and always willing to participate in her research His case afforded untold advances in the study of memory including the discovery that even profound amnesia spares some kinds of learning and that different memory processes are localized to separate circuits in the human brain Henry taught us that learning can occur without conscious awareness that short term and long term memory are distinct capacities and that the effects of aging related disease are detectable in an already damaged brain Undergirded by rich details about the functions of the human brain Permanent Present Tense pulls back the curtain on the man whose misfortune propelled a half century of exciting research With great clarity sensitivity and grace

Corkin brings readers to the cutting edge of neuroscience in this deeply felt elegy for her patient and friend **Teaching Mathematics at Secondary Level** Tony Gardiner,2016-02-08 Teaching Mathematics is nothing less than a mathematical manifesto Arising in response to a limited National Curriculum and engaged with secondary schooling for those aged 11 14 Key Stage 3 in particular this handbook for teachers will help them broaden and enrich their students mathematical education It avoids specifying how to teach and focuses instead on the central principles and concepts that need to be borne in mind by all teachers and textbook authors but which are little appreciated in the UK at present This study is aimed at anyone who would like to think more deeply about the discipline of elementary mathematics in England and Wales and anywhere else By analysing and supplementing the current curriculum Teaching Mathematics provides food for thought for all those involved in school mathematics whether as aspiring teachers or as experienced professionals It challenges us all to reflect upon what it is that makes secondary school mathematics educationally culturally and socially important The Queer and Transgender Resilience Workbook Anneliese A.
