What is a Human? John Hyde Evans, 2016 Scholars claim that if the public has particular definitions of a human they will treat others like objects or animals This book examines these claims and finds that some definitions do lead to maltreatment but the definitions of a majority of the public are unlikely to do so

An Anthropology of Nothing in Particular Martin Demant Frederiksen, 2018-08-31 There have been claims that meaninglessness has become epidemic in the contemporary world One perceived consequence of this is that people increasingly turn against both society and the political establishment with little concern for the content or lack of content that might follow Most often encounters with meaninglessness and nothingness are seen as troubling Meaning is generally seen as being a cornerstone of the human condition as that which we strive towards This was famously explored by Viktor Frankl in *Man's Search for Meaning* in which he showed how even in the direst of situations individuals will often seek to find a purpose in life But what then is at stake when groups of people negate this position What exactly goes on inside this apparent turn towards nothing in the engagement with meaninglessness And what happens if we take the meaningless seriously as an empirical fact

The Art of Being Human Michael Wesch, 2018-08-07 Anthropology is the study of all humans in all times in all places But it is so much more than that Anthropology requires strength valor and courage Nancy Scheper Hughes noted Pierre Bourdieu called anthropology a combat sport an extreme sport as well as a tough and rigorous discipline It teaches students not to be afraid of getting one's hands dirty to get down in the dirt and to commit yourself body and mind Susan Sontag called anthropology a heroic profession What is the payoff for this heroic journey You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the light and life of places forgotten Real anthropology cannot be contained in a book You have to go out and feel the world's jagged edges wipe its dust from your brow and at times leave your blood in its soil In this unique book Dr Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human This special first draft edition is a loose framework for more and more complete future chapters and writings It serves as a companion to anth101 com a free and open resource for instructors of cultural anthropology This 2018 text is a revision of the first draft edition from 2017 and includes 7 new chapters

How to Think Like an Anthropologist Matthew Engelke, 2019-06-18 What is anthropology What can it tell us about the world Why in short does it matter For well over a century cultural anthropologists have circled the globe from Papua New Guinea to suburban England and from China to California uncovering surprising facts and insights about how humans organize their lives and articulate their values In the process anthropology has done more than any other discipline to reveal what culture means and why it matters By weaving together examples and theories from around the world Matthew Engelke provides a lively accessible and at times irreverent introduction to anthropology covering a wide range of classic and contemporary approaches subjects and practitioners Presenting a set of memorable cases he encourages readers to think deeply about some of the key concepts with which anthropology tries to make sense of the world from culture and nature to authority and blood Along the way he shows why anthropology matters not only because it helps us understand other cultures and points of view but also because in the process it reveals something about ourselves and our own cultures too Cover

In Defense of the Human Being Thomas Fuchs, 2021 With the progress of artificial intelligence the digitalization of the lifeworld and the reduction of the mind to neuronal processes the human being increasingly appears to be just a product of data and algorithms That is we conceive ourselves in the image of our machines and conversely we elevate our machines and our brains to new subjects At the same time demands for an enhancement of human nature culminate in transhumanist visions of taking human evolution to a new stage Against this self-reification of the human being this book defends a humanism of embodiment our corporeality vitality embodied freedom are the foundations of a self-determined existence which uses these new technologies only as a means instead of letting them rule us In Defence of the Human Being offers an array of interventions directed against a reductionist naturalism or transhumanism in various areas of science and society As alternative it offers an embodied and enactive account of the human person we are neither pure minds nor brains but primarily embodied living beings in relation with others Fuchs applied this concept to issues such as artificial intelligence transhumanism and enhancement virtual reality neuroscience embodied freedom psychiatry and finally to the accelerating dynamics of current society which lead to an increasing disembodiment of our everyday conduct of life Cutting across neuroscience philosophy and psychiatry this important new book applies cutting edge concepts of embodiment and enactivism to the current scientific technological and cultural tendencies that will crucially influence our society's development in the 21st century

What It Means to Be Human O. Carter Snead, 2020 American law assumes that individuals are autonomous defined by their capacity to choose and not obligated to each other But our bodies make us vulnerable and dependent and the law leaves the weakest on their own O Carter Snead argues for a paradigm that recognizes embodiment enabling law and policy to provide for the care that people need

Pathologies of Power Paul Farmer, 2005 Pathologies of Power uses harrowing stories of life and death to argue that the promotion of social and economic rights of the poor is the most important human rights struggle of our times

Anthropology Robert Louis Welsch, Luis Antonio Vivanco, Agustin Fuentes, 2019 From the authors who wrote the highly acclaimed Cultural Anthropology Asking Questions About Humanity this ground breaking general anthropology text co written with renowned scholar Agustin Fuentes takes a holistic approach that emphasizes critical thinking active learning and applying anthropology to solve contemporary human problems Building on the classical foundations of the discipline Anthropology Asking Questions About Human Origins Diversity and Culture shows students how anthropology is connected to such current topics as food health and medicine and the environment Full of relevant examples and current topics with a focus on contemporary problems and questions the book demonstrates the diversity and dynamism of anthropology today

How Forests Think Eduardo Kohn, 2013-08-10 Can forests think Do dogs dream In this astonishing book Eduardo Kohn challenges the very foundations of anthropology calling into question our central assumptions about what it means to be human and thus distinct from all other life forms Based on four years of fieldwork among the Runa of Ecuador's Upper Amazon Eduardo Kohn draws on his rich ethnography to explore how Amazonians interact with the many creatures that inhabit one of the world's most complex ecosystems Whether or not we recognize it our anthropological tools hinge on those capacities that make us distinctly human However when we turn our ethnographic attention to how we relate to other kinds of beings these tools which have the effect of divorcing us from the rest of the world break down *How Forests Think* seizes on this breakdown as an opportunity Avoiding reductionistic solutions and without losing sight of how our lives and those of others are caught up in the moral webs we humans spin this book skillfully fashions new kinds of conceptual tools from the strange and unexpected properties of the living world itself In this groundbreaking work Kohn takes anthropology in a new and exciting direction one that offers a more capacious way to think about the world we share with other kinds of beings
