Read the following passage carefully and answer the question given at its end:

Something is radically wrong with the entire structure of human relationship that makes man delight in killing man, whether it be in the name of civilization or religion or anything else. Two wrongs do not make a right, hatred must beget hatred. It is this fundamental truth that women have got to bring home to the people in their respective countries. No peace treaties can avail that have revenge as their basis and self righteous arrogance and hypocrisy in the so-called victors. But women are the natural preservers of life.

21. *Which of the following expresses most accurately the idea contained in the opening sentence of the passage?*
 (A) Man destroying another man is a painful practice.
 (B) A social structure that permits people to kill each other for religion is inherently rotten.
 (C) It is strange that one religion encourages its followers to kill the followers of another religion.
 (D) It is wrong on man's part to derive pleasure out of killing others for any motive whatsoever.
22. *The expression "Two wrongs do not make a right" means that:*
 (A) A wrong action in retaliation does not mend matters.
 (B) Hatred destroys the person who perpetrates it.
 (C) A tit for tat policy aggravates hatred.
 (D) Even repeated assertions of a wrong statement do not make it right.
23. *Which of the following statements is not implied in the passage?*
 (A) It is human tendency to kill others professing different religion.
 (B) It is the duty of women to foster peace and harmony amongst their countrymen.
 (C) Peace treaties among nations tend to establish peace in the world.
 (D) If you hate someone, he is bound to respond with the same feeling.
24. *Which word is opposite in meaning to 'preserver' as used in the passage?*
 (A) Enemy (B) Destroyer
 (C) Rival (D) Belligerent
25. *Which of the following would sum up most suitably the central idea of the passage?*

Black Identities Mary C. WATERS,2009-06-30 The story of West Indian immigrants to the United States is generally considered to be a great success Mary Waters however tells a very different story She finds that the values that gain first generation immigrants initial success a willingness to work hard a lack of attention to racism a desire for education an incentive to save are undermined by the realities of life and race relations in the United States Contrary to long held beliefs Waters finds those who resist Americanization are most likely to succeed economically especially in the second generation

Interleukin Protocols Luke A. J. O'Neill, Andrew Bowie, 2008-02-02 Interleukins are a family of proteins that regulate the maturation, differentiation or activation of cells involved in immunity and inflammation and belong to a broader family termed cytokines. Collectively these proteins are the key orchestrators of host defense and the response to tissue injury. There are currently 23 different interleukins numbered from IL 1 to IL 23, although the full extent of the interleukin family will only become clear upon analysis of the human genome sequence. Most important interleukins are central to the pathogenesis of a wide range of diseases that involve an immune component including such conditions as rheumatoid arthritis, multiple sclerosis, ulcerative colitis, psoriasis, and asthma. Interleukins have also been implicated in other conditions including cancer, migraine, myocardial infarction, and depression. In essence, when cells are activated by interleukins, a program of gene expression is initiated in the target cell that alters the cell's phenotype, leading to enhanced immune reactivity, inflammation, and/or proliferation. Interleukins are therefore at the core of the cellular basis for many diseases. They are the subject of intense investigation by biomedical researchers, and the targeting or use of interleukins in the clinic is proceeding apace. Approaches such as targeting IL 4 in asthma or IL 1 in joint disease are being pursued, and it is likely that in the next 5-10 years a number of new therapies based on either inhibiting or administering interleukins will be available.

Mathematics Learning in Early Childhood National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Committee on Early Childhood Mathematics, 2009-11-13 Early childhood mathematics is vitally important for young children's present and future educational success. Research demonstrates that virtually all young children have the capability to learn and become competent in mathematics. Furthermore, young children enjoy their early informal experiences with mathematics. Unfortunately, many children's potential in mathematics is not fully realized, especially those children who are economically disadvantaged. This is due in part to a lack of opportunities to learn mathematics in early childhood settings or through everyday experiences in the home and in their communities. Improvements in early childhood mathematics education can provide young children with the foundation for school success. Relying on a comprehensive review of the research, *Mathematics Learning in Early Childhood* lays out the critical areas that should be the focus of young children's early mathematics education, explores the extent to which they are currently being incorporated in early childhood settings, and identifies the changes needed to improve the quality of mathematics experiences for young children. This book serves as a call to action to improve the state of early childhood mathematics. It will be especially useful for policy makers and practitioners, those who work directly with children and their families in shaping the policies that affect the education of young children.
