Mind-Blowing

Modular Origami Byriah Loper,2016-10-11 Modular origami is the latest craze in paper folding These three dimensional models are created from a number of small pieces of paper that are easily folded and then cleverly fit together to form a spectacular shape They range from paper polyhedra to bristling buckyballs that are reminiscent of sea urchins to ornate flower like spheres Each piece of paper is held by the tension of the other papers demonstrating the remarkable hidden properties of paper which is at the same time flexible but also strong Author Byriah Loper has been creating modular origami sculptures for just five years but in that time he s pushed the upper limits of the art form with some of the largest most complex geometric paper constructions ever assembled While many geo modular origami artists focus on creating dense floral spheres Byriah has pioneered the open linear wire frame approach which results in a very complex looking model that reveals the interior of its form He exhibits his sculptures annually at the Origami USA convention in New York and was recently a featured artist at the Surface to Structure exhibition at the Cooper Union gallery in the East Village A great way to

Elements of Ethology D. Wood-Gush,2012-12-06 The object of this book is to introduce ethology to agricultural and veterinary students Today ethology covers many approaches to the study of animal behaviour which are connected by one unifying concept all behaviour must be considered in relation to the ecology and evolutionary history of the species under investigation This may seem to some to put domesticated animals beyond the scope of classical ethology but while domestication has involved some behavioural changes we shall see that much of the behaviour of our species of farm livestock differs little from that of their putative ancestors It is assumed that students using this book will already have studied some physiology It is also assumed that they are essentially practically minded and with this factor in mind I have discussed behaviour in terms of its function introducing the principles of ethology within functional categories of behaviour In order to best illustrate these principles I have taken examples from a variety of species and not confined myself to farm livestock and domestic animals for fundamental ethological research with these species has been patchy However at the end of each chapter I have given a list of papers pertaining to farm livestock so that the principles of ethology can be seen in a more practical context and to develop this approach further I have also added some practical problems for discussion at the end of each chapter
