

Question 1 (10 marks)

You are the Manager of Electrical Engineering at an underground mine. The mine is to install a dewatering pumping system at the rear of the longwall blocks. The pumping system will be installed within a cased borehole from the surface to an area in the goaf which will become flooded and therefore not be able to be inspected.

Your Mine Operator has requested that you advise him of the requirements to complete the project and an expected time frame. Include the following information:

- a) What type of certification will be required for the installation? (1 mark)
- b) In relation to the electrical installation:
 - i) Which items are 'safety critical' for the electrical installation? (2 marks)
 - ii) Briefly explain why each item in i) above is 'safety critical'? (2 marks)
 - iii) Which items will require a SIL assessment? (1 mark)
- c) On the spreadsheet provided develop an expected project plan from the start of the project to the completion, giving the expected time frames and project tasks (4 marks) See spreadsheet over page.

Recommendations on the Transport of Dangerous Goods United Nations,2020-01-06 The Manual of Tests and Criteria contains criteria test methods and procedures to be used for classification of dangerous goods according to the provisions of Parts 2 and 3 of the United Nations Recommendations on the Transport of Dangerous Goods Model Regulations as well as of chemicals presenting physical hazards according to the Globally Harmonized System of Classification and Labelling of Chemicals GHS As a consequence it supplements also national or international regulations which are derived from the United Nations Recommendations on the Transport of Dangerous Goods or the GHS At its ninth session 7 December 2018 the Committee adopted a set of amendments to the sixth revised edition of the Manual as amended by Amendment 1 This seventh revised edition takes account of these amendments In addition noting that the work to facilitate the use of the Manual in the context of the GHS had been completed the Committee considered that the reference to the Recommendations on the Transport of Dangerous Goods in the title of the Manual was no longer appropriate and decided that from now on the Manual should be entitled Manual of Tests and Criteria

Answer Set Programming Vladimir Lifschitz,2019-08-29 Answer set programming ASP is a programming methodology oriented towards combinatorial search problems In such a problem the goal is to find a solution among a large but finite number of possibilities The idea of ASP came from research on artificial intelligence and computational logic ASP is a form of declarative programming an ASP program describes what is counted as a solution to the problem but does not specify an algorithm for solving it Search is performed by sophisticated software systems called answer set solvers Combinatorial search problems often arise in science and technology and ASP has found applications in diverse areas in historical linguistic in bioinformatics in robotics in space exploration in oil and gas industry and many others The importance of this programming method was recognized by the Association for the Advancement of Artificial Intelligence in 2016 when AI Magazine published a special issue on answer set programming The book introduces the reader to the theory and practice of ASP It describes the input language of the answer set solver CLINGO which was designed at the University of Potsdam in Germany and is used today by ASP programmers in many countries It includes numerous examples of ASP programs and present the mathematical theory that ASP is based on There are many exercises with complete solutions

Power Piping Charles Becht (IV.),2013 This essential new volume provides background information historical perspective and expert commentary on the ASME B31 1 Code requirements for power piping design and construction It provides the most complete coverage of the Code that is available today and is packed with additional information useful to those responsible for the

design and mechanical integrity of power piping The author Dr Becht is a long serving member of ASME piping code committees and is the author of the highly successful book Process Piping The Complete Guide to ASME B31.3 also published by ASME Press and now in its third edition Dr Becht explains the principal intentions of the Code covering the content of each of the Code's chapters Book inserts cover special topics such as spring design design for vibration welding processes and bonding processes Appendices in the book include useful information for pressure design and flexibility analysis as well as guidelines for computer flexibility analysis and design of piping systems with expansion joints From the new designer wanting to know how to size a pipe wall thickness or design a spring to the expert piping engineer wanting to understand some nuance or intent of the Code everyone whose career involves process piping will find this to be a valuable reference

Methods of Estimating Loads in Plumbing Systems Roy B. Hunter, 1940 **Simulation Modeling and Analysis with Expertfit Software** Averill Law, 2006-07-21 Since the publication of the first edition in 1982 the goal of Simulation Modeling and Analysis has always been to provide a comprehensive state of the art and technically correct treatment of all important aspects of a simulation study The book strives to make this material understandable by the use of intuition and numerous figures examples and problems It is equally well suited for use in university courses simulation practice and self study The book is widely regarded as the bible of simulation and now has more than 100 000 copies in print The book can serve as the primary text for a variety of courses for example A first course in simulation at the junior senior or beginning graduate student level in engineering manufacturing business or computer science Chaps 1 through 4 and parts of Chaps 5 through 9 At the end of such a course the students will be prepared to carry out complete and effective simulation studies and to take advanced simulation courses A second course in simulation for graduate students in any of the above disciplines most of Chaps 5 through 12 After completing this course the student should be familiar with the more advanced methodological issues involved in a simulation study and should be prepared to understand and conduct simulation research An introduction to simulation as part of a general course in operations research or management science part of Chaps 1 3 5 6 and 9
