

Essay On The Drug Abuse/Addiction And The Society

The excessive and unregulated use of drugs which is popularly called drug abuse or drug addiction has emerged as a major social problem recently and has crossed the border of caste, class, creed, sex and nation.

It is like curse for developing country like India as it has already existing problems like poverty, unemployment and overpopulation. Drug abuse affects individuals, their families and the society as a whole. Drug abuse often leads to crime as a result of reduced impulse control, paranoia and negligence. Thus, effects the law and order, economic production and human welfare.

Drug abuse implies physical dependence upon a drug including the development of tolerance and withdrawal. An addict who develops tolerance requires more and more of the drug to transport him to the world of fantasies. If the addict is not allowed to take the drug he suffers from painful and uncontrollable convulsions, vomiting, depression and various other maladies.

If one looks at the causes of the spread of this evil, the changes in the traditional pattern of society emerge as the major one. Rapid industrialization and urbanization have ushered in a new way of life with new values like individualism and permissiveness. This has resulted in loosening of informal means of social control, for example, influences of conventional sophistication but have low frustration tolerance. the stresses and strains of modern life with resulting frustration and depression give rise of escapist tendencies. Way to materialism and consumerism and the resulting alienation also ha a bearing on the present day trend. Anonymity of our big cities is providing a favorable environment of drug addicts.

Family has also shown changes in its structure and function recently. As a result parental control is less today because of the working situation of both parents. Break up of joint family also means less control over the young people. Stressful home environment and broken home are often the contributory factors. If a child's basic needs like security, response, recognition and development are not adequately met at home, he develops feelings of inadequacy, frustration and emotional insecurity. He seeks to derive satisfaction fro nay other sources and comes in contact with unscrupulous persons. Delinquent gangs or pear group fulfill various needs of a dissatisfied adolescent and provide rationalization to

NIDA Research Monograph, 1976 **The Risks of Prescription Drugs** Donald Light, 2010 Few people realize that prescription drugs have become a leading cause of death disease and disability Adverse reactions to widely used drugs such as psychotropics and birth control pills as well as biologicals result in FDA warnings against adverse reactions The Risks of Prescription Drugs describes how most drugs approved by the FDA are under tested for adverse drug reactions yet offer few new benefits Drugs cause more than 2.2 million hospitalizations and 110,000 hospital based deaths a year Serious drug reactions at home or in nursing homes would significantly raise the total Women older people and people with disabilities are least used in clinical trials and most affected Health policy experts Donald Light Howard Brody Peter Conrad Allan Horwitz and Cheryl Stults describe how current regulations reward drug companies to expand clinical risks and create new diseases so millions of patients are exposed to unnecessary risks especially women and the elderly They reward developing marginally better drugs rather than discovering breakthrough life saving drugs The Risks of Prescription Drugs tackles critical questions about the pharmaceutical industry and the privatization of risk To what extent does the FDA protect the public from serious side effects and disasters What is the effect of giving the private sector and markets a greater role and reducing public oversight This volume considers whether current rules and incentives put patients health at greater risk the effect of the expansion of disease categories the industry's justification of high U.S. prices and the underlying shifts in the burden of risk borne by individuals in the world of pharmaceuticals Chapters

Kleiman, Jonathan P. Caulkins, Angela Hawken, 2011-07-13 While there have always been norms and customs around the use of drugs explicit public policies regulations taxes and prohibitions designed to control drug abuse are a more recent phenomenon Those policies sometimes have terrible side effects most prominently the development of criminal enterprises dealing in forbidden or untaxed drugs and the use of the profits of drug dealing to finance insurgency and terrorism Neither a drug free world nor a world of free drugs seems to be on offer leaving citizens and officials to face the age old problem What are we going to do about drugs In *Drugs and Drug Policy* three noted authorities survey the subject with exceptional clarity in this addition to the acclaimed series *What Everyone Needs to Know* They begin by defining drugs examining how they work in the brain discussing the nature of addiction and exploring the damage they do to users The book moves on to policy answering questions about legalization the role of criminal prohibitions and the relative legal

tolerance for alcohol and tobacco The authors then dissect the illicit trade from street dealers to the flow of money to the effect of catching kingpins and show the precise nature of the relationship between drugs and crime They examine treatment both its effectiveness and the role of public policy and discuss the beneficial effects of some abusable substances Finally they move outward to look at the role of drugs in our foreign policy their relationship to terrorism and the ugly politics that surround the issue Crisp clear and comprehensive this is a handy and up to date overview of one of the most pressing topics in today s world What Everyone Needs to Know is a registered trademark of Oxford University Press
