Unemployment and Underemployment Justin

Healey,2021-07 As Australia s economy recovers from the coronavirus pandemic jobs growth is bouncing back in most sectors in spite of disruptions from lockdowns and many workers being based at home Meanwhile the recent modest rise in the JobSeeker payment has been broadly criticised as insufficient to help recipients find work and keep up with the costs of living entrenching financial stress and mental distress and affecting motivation and skills Of additional concern is the rate of underemployment which has overtaken the jobless rate Most new jobs being created are in part time casual or insecure gig work affecting a higher proportion of young people Is job insecurity now the norm for many Australians This title explains the

fundamentals around the measurement and types of unemployment and reveals who it most affects It also examines the latest employment trends and impacts of casualisation on job security Government policies and social sector strategies for tackling the economic and social consequences of unemployment and underemployment are also featured Finding a job and indeed enough employment can be hard work in itself **Our Common Future** ,1990 The Battle of the Fields Brian Short,2014 This book will appeal not only to historians and geographers but to many who maintain a deep interest in the British countryside and its past and to those who continue to share a fascination for the Second World War in particular the home front The Battle of the Fields tells the story of rural community and authority in Britain during the Second World War by looking at the County War Agricultural Executive Committees From 1939 they were imbued with powers to transform British farming to combat the loss of food imports caused by German naval activity and initial European mainland successes Their powers were sweeping and draconian When fully exercised against recalcitrant farmers dispossession in part or whole could and did result This book includes the most detailed analysis of these dispossessions including the tragic case of Ray Walden the Hampshire farmer who was killed by police after refusing to leave his farmhouse in 1940 The committees were deemed successful by Whitehall as harbingers of modernity mechanization draining artificial fertilizers reclamation of heaths marshes and woodlands We now deplore some of these changes but Britain did not starve in large part thanks to their efforts This book will appeal not only to historians and geographers but to many who maintain a deep interest in the British countryside and its past and to those who continue to share a fascination for the Second World War in particular the home front It will also demonstrate to all who are anxious about food security in the modern age how this question was dealt with 70 years ago BRIAN SHORT is Emeritus Professor of Historical Geography at the University of Sussex and formerly Dean of School and Head of the Department of Geography
