Readers' Guide to Periodical Literature, 1905 **Guide to Reprints** Albert James Diaz, 2001 *Manual of Deixis in Romance Languages* Konstanze Jungbluth, Federica Da Milano, 2015-10-16 Deixis as a field of research has generated increased interest in recent years It is crucial for a number of different subdisciplines pragmatics semantics cognitive and contrastive linguistics to name just a few The subject is of particular interest to experts and students philosophers teachers philologists and psychologists interested in the study of their language or in comparing linguistic structures The different deictic structures not only the items themselves but also the oppositions between them reflect the fact that neither the notions of space time person nor our use of them are identical cross culturally This diversity is not restricted to the difference between languages but also appears among related dialects and language varieties This volume will provide an overview of the field focusing on Romance languages but also reaching beyond this perspective Chapters on diachronic developments language change comparisons with other non European languages and on interfaces with neighboring fields of interest are also included The editors and authors hope that readers regardless of their familiarity with Romance languages will gain new insights into deixis in general and into the similarities and differences among deictic structures used in the languages of the world **Guide to Reprints**, 2001 **The MIDI Manual** David Miles Huber, 2007 The comprehensive reference on MIDI fully revised and updated Manual of Romance Word Classes Anna-Maria De Cesare, Giampaolo Salvi, 2024-09-02 Word classes are linguistic categories serving as basis in the description of the vocabulary and grammar of natural languages While important publications are regularly devoted to their definition identification and classification in the field of Romance linguistics we lack a comprehensive state of the art overview of the current research This Manual offers an updated and detailed discussion of all relevant aspects related to word classes in the Romance languages In the first part word classes are discussed from both a theoretical and historical point of view The second part of the volume takes as its point of departure single word classes described transversally in all the main Romance languages while the third observes the relevant word classes from the point of view of specific Romance based varieties The fourth part explores Romance word classes at the interface of grammar and other fields of research The Manual is intended as a reference work for all scholars and students interested in the description of both the standard major Romance languages and the smaller lesser described Romance based varieties Technical Abstract Bulletin, Subject Index of Modern Works Added to the Library of the British Museum in the Years 1881-1900 British Museum.
