Causes and Consequences of Income Inequality Ms.Era Dabla-Norris,Ms.Kalpana Kochhar,Mrs.Nujin Suphaphiphat,Mr.Frantisek Ricka,Ms.Evridiki Tsounta,2015-06-15 This paper analyzes the extent of income inequality from a global perspective its drivers and what to do about it The drivers of inequality vary widely amongst countries with some common drivers being the skill premium associated with technical change and globalization weakening protection for labor and lack of financial inclusion in developing countries We find that increasing the income share of the poor and the middle class actually increases growth while a rising income share of the top 20 percent results in lower growth that is when the rich get richer benefits do not trickle down This suggests that policies need to be country specific but should focus on raising the income share of the poor and ensuring there is no hollowing out of the middle class To tackle inequality financial inclusion is imperative in emerging and developing countries while in advanced economies policies should focus on raising human capital and skills and making tax systems more progressive

Edible Insects Arnold van Huis, Food and Agriculture Organization of the United Nations, 2013 Edible insects have always been a part of human diets but in some societies there remains a degree of disdain and disgust for their consumption Although the majority of consumed insects are gathered in forest habitats mass rearing systems are being developed in many countries Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production diversify diets and support livelihoods in both developing and developed countries It shows the many traditional and potential new uses of insects for direct human consumption and the opportunities for and constraints to farming them for food and feed It examines the body of research on issues such as insect nutrition and food safety the use of insects as animal feed and the processing and preservation of insects and their products It highlights the need to develop a regulatory framework to govern the use of insects for food security And it presents case studies and examples from around the world Edible insects are a promising alternative to the conventional production of meat either for direct human consumption or for indirect use as feedstock To fully realise this potential much work needs to be done by a wide range of stakeholders This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life and it will stimulate debate on the expansion of the use of insects as food and feed

iGen Jean M. Twenge, 2017-08-22 As seen in Time USA TODAY The Atlantic The Wall Street Journal and on CBS This Morning BBC PBS CNN and NPR iGen is crucial reading to understand how the children teens and young adults born in the mid 1990s and later are vastly different from their Millennial predecessors and from any other generation With generational divides wider than ever parents educators and employers have an urgent need to understand today's rising generation of teens and young adults Born in the mid 1990s up to the mid 2000s iGen is the first generation to spend their entire adolescence in the age of the smartphone With social media and texting replacing other activities iGen spends less time with their friends in person perhaps contributing to their unprecedented levels of anxiety depression and loneliness But technology is not the only thing that makes iGen distinct from

every generation before them they are also different in how they spend their time how they behave and in their attitudes toward religion sexuality and politics They socialize in completely new ways reject once sacred social taboos and want different things from their lives and careers More than previous generations they are obsessed with safety focused on tolerance and have no patience for inequality With the first members of iGen just graduating from college we all need to understand them friends and family need to look out for them businesses must figure out how to recruit them and sell to them colleges and universities must know how to educate and guide them And members of iGen also need to understand themselves as they communicate with their elders and explain their views to their older peers Because where iGen goes so goes our nation and the world

Capitalism and Desire Todd McGowan,2016-09-20 Despite creating vast inequalities and propping up reactionary world regimes capitalism has many passionate defenders but not because of what it withholds from some and gives to others Capitalism dominates Todd McGowan argues because it mimics the structure of our desire while hiding the trauma that the system inflicts upon it People from all backgrounds enjoy what capitalism provides but at the same time are told more and better is yet to come Capitalism traps us through an incomplete satisfaction that compels us after the new the better and the more Capitalism s parasitic relationship to our desires gives it the illusion of corresponding to our natural impulses which is how capitalism s defenders characterize it By understanding this psychic strategy McGowan hopes to divest us of our addiction to capitalist enrichment and help us rediscover enjoyment as we actually experienced it By locating it in the present McGowan frees us from our attachment to a better future and the belief that capitalism is an essential outgrowth of human nature From this perspective our economic social and political worlds open up to real political change Eloquent and enlivened by examples from film television consumer culture and everyday life Capitalism and Desire brings a new psychoanalytically grounded approach to political and social theory
