*Mountains Beyond Mountains* Tracy Kidder, 2009-08-25 NEW YORK TIMES BESTSELLER A masterpiece an astonishing book that will leave you questioning your own life and political views USA Today If any one person can be given credit for transforming the medical establishment's thinking about health care for the destitute it is Paul Farmer *Mountains Beyond Mountains* inspires discomforts and provokes The New York Times Best Books of the Year In medical school Paul Farmer found his life's calling to cure infectious diseases and to bring the lifesaving tools of modern medicine to those who need

them most Tracy Kidder's magnificent account shows how one person can make a difference in solving global health problems through a clear-eyed understanding of the interaction of politics, wealth, social systems, and disease. **Profound and powerful Mountains Beyond Mountains** takes us from Harvard to Haiti, Peru, Cuba, and Russia as Farmer changes people's minds through his dedication to the philosophy that the only real nation is humanity. **WINNER OF THE LETTRE ULYSSES AWARD FOR THE ART OF REPORTAGE** This deluxe paperback edition includes a new Epilogue by the author. **Great Walls of Discourse and Other Adventures in Cultural China** Haun Saussy, 2020-03-23 China and the West: us and them, the subject and the non-subject, these and other dualisms furnish China watchers both inside and outside China with a pervasive, ready-made set of definitions immune to empirical disproof. But what does this language of essential difference accomplish? The essays in this book are an attempt to cut short the recitation of differences and to answer this question. In six interpretive studies of China, the author examines the ways in which the networks of assumption and consensus that make communication possible within a discipline affect collective thinking about the object of study. Among other subjects, these essays offer a historical and historiographical introduction to the problem of comparison and deal with translation, religious proselytization, semiotics, linguistics, cultural bilingualism, writing systems, the career of postmodernism in China, and the role of China as an imaginary model for postmodernity in the West. Against the reigning simplifications, these essays seek to restore the interpretation of China to the complexity and impurity of the historical situations in which it is always caught. The chief goal of the essays in this book is not to expose errors in interpreting China but to use these misunderstandings as a basis for devising better methodologies for comparative studies. **Paul Among the People** Sarah Ruden, 2010-02-16 It is a common and fundamental misconception that Paul told people how to live. Apart from forbidding certain abusive practices, he never gives any precise instructions for living. It would have violated his two main social principles: human freedom and dignity, and the need for people to love one another. Paul was a Hellenistic Jew, originally named Saul, from the tribe of Benjamin, who made a living from tent-making or leatherworking. He called himself the Apostle to the Gentiles and was the most important of the early Christian evangelists. Paul is not easy to understand. The Greeks and Romans themselves probably misunderstood him or skimmed the surface of his arguments when he used terms such as law, referring to the complex system of Jewish religious law in which he himself was trained. But they did share a language, Greek, and a cosmopolitan, urban culture that of the Roman Empire. Paul considered evangelizing the Greeks and Romans to be his special mission. For you were called to freedom, brothers and sisters, only do not use your freedom as an opportunity for self-indulgence, but through love become slaves to one another. For the whole law is summed up in a single commandment: You shall love your neighbor as yourself. The idea of love as the only rule was current among Jewish thinkers of his time, but the idea of freedom being available to anyone was revolutionary. Paul, regarded by Christians as the greatest interpreter of Jesus' mission, was the first person to explain how Christ's life and death fit into the larger scheme of salvation, from the creation of Adam to the end.

of time Preaching spiritual equality and God's infinite love he crusaded for the Jewish Messiah to be accepted as the friend and deliverer of all humankind In Paul Among the People Sarah Ruden explores the meanings of his words and shows how they might have affected readers in his own time and culture She describes as well how his writings represented the new church as an alternative to old ways of thinking feeling and living Ruden translates passages from ancient Greek and Roman literature from Aristophanes to Seneca setting them beside famous and controversial passages of Paul and their key modern interpretations She writes about Augustine about George Bernard Shaw's misguided notion of Paul as the eternal enemy of Women and about the misuse of Paul in the English Puritan Richard Baxter's strictures against flesh pleasing Ruden makes clear that Paul's ethics in contrast to later distortions were humane open and responsible Paul Among the People is a remarkable work of scholarship synthesis and understanding a revelation of the founder of Christianity

Giving Bill Clinton, 2007-09-04 Here from Bill Clinton is a call to action Giving is an inspiring look at how each of us can change the world First it reveals the extraordinary and innovative efforts now being made by companies and organizations and by individuals to solve problems and save lives both down the street and around the world Then it urges us to seek out what each of us regardless of income available time age and skills can do to help to give people a chance to live out their dreams Bill Clinton shares his own experiences and those of other givers representing a global flood tide of nongovernmental nonprofit activity These remarkable stories demonstrate that gifts of time skills things and ideas are as important and effective as contributions of money From Bill and Melinda Gates to a six year old California girl named McKenzie Steiner who organized and supervised drives to clean up the beach in her community Clinton introduces us to both well known and unknown heroes of giving Among them Dr Paul Farmer who grew up living in the family bus in a trailer park vowed to devote his life to giving high quality medical care to the poor and has built innovative public health care clinics first in Haiti and then in Rwanda a New York couple in Africa for a wedding who visited several schools in Zimbabwe and were appalled by the absence of textbooks and school supplies They founded their own organization to gather and ship materials to thirty five schools After three years the percentage of seventh graders who pass reading tests increased from 5 percent to 60 percent Oseola McCarty who after seventy five years of eking out a living by washing and ironing gave 150 000 to the University of Southern Mississippi to endow a scholarship fund for African American students Andre Agassi who has created a college preparatory academy in the Las Vegas neighborhood with the city's highest percentage of at risk kids Tennis was a stepping stone for me says Agassi Changing a child's life is what I always wanted to do Heifer International which gave twelve goats to a Ugandan village Within a year Beatrice Biira's mother had earned enough money selling goat's milk to pay Beatrice's school fees and eventually to send all her children to school and as required to pass on a baby goat to another family thus multiplying the impact of the gift Clinton writes about men and women who traded in their corporate careers and the fulfillment they now experience through giving He writes about energy efficient practices about progressive companies going

green about promoting fair wages and decent working conditions around the world He shows us how one of the most important ways of giving can be an effort to change improve or protect a government policy He outlines what we as individuals can do the steps we can take how much we should consider giving and why our giving is so important Bill Clinton's own actions in his post presidential years have had an enormous impact on the lives of millions Through his foundation and his work in the aftermath of the Asian tsunami and Hurricane Katrina he has become an international spokesperson and model for the power of giving We all have the capacity to do great things President Clinton says My hope is that the people and stories in this book will lift spirits touch hearts and demonstrate that citizen activism and service can be a powerful agent of change in the world

**Tomorrow's Table** Pamela C. Ronald, R. W. Adamchak, 2008-04-18 By the year 2050 Earth's population will double If we continue with current farming practices vast amounts of wilderness will be lost millions of birds and billions of insects will die and the public will lose billions of dollars as a consequence of environmental degradation Clearly there must be a better way to meet the need for increased food production Written as part memoir part instruction and part contemplation Tomorrow's Table argues that a judicious blend of two important strands of agriculture genetic engineering and organic farming is key to helping feed the world's growing population in an ecologically balanced manner Pamela Ronald a geneticist and her husband Raoul Adamchak an organic farmer take the reader inside their lives for roughly a year allowing us to look over their shoulders so that we can see what geneticists and organic farmers actually do The reader sees the problems that farmers face trying to provide larger yields without resorting to expensive or environmentally hazardous chemicals a problem that will loom larger and larger as the century progresses They learn how organic farmers and geneticists address these problems This book is for consumers farmers and policy decision makers who want to make food choices and policy that will support ecologically responsible farming practices It is also for anyone who wants accurate information about organic farming genetic engineering and their potential impacts on human health and the environment

**Tinderbox** Craig Timberg, Daniel Halperin, 2012-03-01 In this groundbreaking narrative longtime Washington Post reporter Craig Timberg and award winning AIDS researcher Daniel Halperin tell the surprising story of how Western colonial powers unwittingly sparked the AIDS epidemic and then fanned its rise Drawing on remarkable new science Tinderbox overturns the conventional wisdom on the origins of this deadly pandemic and the best ways to fight it today Recent genetic studies have traced the birth of HIV to the forbidding equatorial forests of Cameroon where chimpanzees carried the virus for millennia without causing a major outbreak in humans During the Scramble for Africa colonial companies blazed new routes through the jungle in search of rubber and other riches sending African porters into remote regions rarely traveled before It was here that humans first contracted the strain of HIV that would eventually cause 99 percent of AIDS deaths around the world Western powers were key actors in turning a localized outbreak into a sprawling epidemic as bustling new trade routes modern colonial cities and the rise of prostitution sped the virus across Africa Christian missionaries

campaigns to suppress polygamy but left in its place fractured sexual cultures that proved uncommonly vulnerable to HIV Equally devastating was the gradual loss of the African ritual of male circumcision which recent studies have shown offers significant protection against infection Timberg and Halperin argue that the same Western hubris that marked the colonial era has hamstrung the effort to fight HIV From the United Nations AIDS program to the Bush administration's historic relief campaign global health officials have favored well meaning Western approaches abstinence campaigns condom promotion HIV testing that have proven ineffective in slowing the epidemic in Africa Meanwhile they have overlooked homegrown African initiatives aimed squarely at the behaviors spreading the virus In a riveting narrative that stretches from colonial Leopoldville to 1980s San Francisco to South Africa today *Tinderbox* reveals how human hands unleashed this epidemic and can now overcome it if only we learn the lessons of the past
