Automatic Pleasures Nic Costa,2013-06-02 This book has stood the test of time Copies of the first edition have over the years regularly sold for many times the cover price The full color book is once more in print Since its original publication it has been cited in many academic papers and has since become the definitive work on the subject It caused embarrassment to the huge American coin machine industry when it was first published in 1988 they were busy celebrating the centenary of the Juke Box in that year as an American invention whereas the book revealed that it was actually an earlier British invention It awoke huge interest in Japan by giving them long sought answers as to the origins of the Pachinko machine which at the time was consuming as much as a quarter of the gross domestic product in Japan As a direct result of the book a new museum was established in the Japanese city of Kobe and for a short while the author became a national celebrity there The book established many new facts and destroyed many of the myths that had arisen in the gaming industry during the 20th century Originally an ancient Greek invention the advent of the coin machine in the 19th century heralded a Victorian revolution which sought to establish a fully automated society The visionaries of the past are the direct forbears of the all pervasive computer industries without the gaming and coin machine industries it is doubtful as to whether today s computer dominated age would have ever happened Most important of all it is fun to read

The Ascent of Humanity Charles Eisenstein,2013-02-05 The author of The More Beautiful World Our Hearts Know Is Possible explores the history and potential future of civilization tracing the converging crises of our age to the illusion of the separate self Our disconnection from one another and the natural world has mislaid the foundations of science religion money technology economics medicine and education as we know them It has fired our near pathological pursuit of technological Utopias even as we push ourselves and our planet to the brink of collapse Fortunately an Age of Reunion is emerging out of the birth pangs of an earth in crisis Our journey of separation hasn t been a terrible mistake but an evolutionary process and an adventure in self discovery Even in our darkest hour Eisenstein sees the possibility of a more beautiful world not through the extension of millennia old methods of management and control but by fundamentally reimagining ourselves and our systems We must shift away from our Babelian efforts to build ever higher towers to heaven and instead turn out attention to creating a new kind of civilization one designed for beauty rather than height
