[Working Knowledge](#) Aug 05 2023 Skilled workers of the early nineteenth century enjoyed a degree of professional independence because workplace knowledge and technical skill were their "property," or at least their attribute. In most sectors of today's economy, however, it is a foundational and widely accepted truth that businesses retain legal ownership of employee-generated intellectual property. In Working Knowledge, Catherine Fisk chronicles the legal and social transformations that led to the transfer of ownership of employee innovation from labor to management. This deeply contested development was won at the expense of workers' entrepreneurial independence and ultimately, Fisk argues, economic democracy. By reviewing judicial decisions and legal scholarship on all aspects of employee-generated intellectual property and combing the archives of major nineteenth-century intellectual property-producing companies—including DuPont, Rand McNally, and the American Tobacco Company—Fisk makes a highly technical area of law accessible to general readers while also addressing scholarly deficiencies in the histories of labor, intellectual property, and the business of technology.

Psychology Education and Training Apr 08 2021 Much of the psychological research in the last century has been conducted in the global North West; hence, many prevailing theories and methodologies reflect the philosophical framework and shared cultural knowledge of this region. Other world views and cultural contexts have, as yet, not had the same opportunity to develop scientific insights that come to the attention of global audiences. Psychology Education and Training is the first truly international effort to generate a framework for common standards in psychological education and training across the globe. Psychologists have long studied human beings in their socio-cultural context. New challenges such as globalisation and the relationship of the brain and behavior require that education and training keep pace with these rapidly evolving developments. The chapters in this book were generated by an international conference which resulted in the Dornburg Accord. While anchored in higher education, the focus is on the generative and translational psychological science needed to fulfill psychology's responsibility to society. Psychology Education and Training is the first book of its kind to cover both historic strengths and the requirements of emerging fields. The book deals with balancing the universalities and cultural specificities of psychological processes, the adjustments to academic curricula required to support national needs, as well as the credentials and regulations required to assure the quality of psychological services. Psychology Education and Training is unique in providing initial data and concurrent assessment of various components of education and training in psychology across the globe. The book is a must for faculty members, advanced students of psychology and policy-makers who are interested in the issues that shape their societies.

The Constitutional Jurisprudence of the Federal Republic of Germany Jun 22 2022 First published in 1989, The Constitutional Jurisprudence of the Federal Republic of Germany has become an invaluable resource for scholars and practitioners of comparative, international, and constitutional law, as well as of German and European politics. The third edition of this renowned English-language reference has now been fully updated and significantly expanded to incorporate both previously omitted topics and recent decisions of the German Federal Constitutional Court. As in previous editions, Donald P. Kommers and Russell A. Miller's discussions of key developments in German constitutional law are augmented by elegantly translated excerpts from more than one hundred German judicial decisions. Compared to previous editions of The Constitutional Jurisprudence of the Federal Republic of Germany, this third edition more closely tracks Germany's Basic Law and, therefore, the systematic approach reflected in the most-respected German constitutional law commentaries. Entirely new chapters address the relationship between German law and European and international law; social and economic rights, including the property and occupational rights cases that have emerged from Reunification; jurisprudence related to issues of equality, particularly gender equality; and the tension between Germany's counterterrorism efforts and its constitutional guarantees of liberty. Kommers and Miller have also updated existing chapters to address recent decisions involving human rights, federalism, European integration, and religious liberty.
