

CHILL MAN

NUMBER: DWN-076
WEAPON: Chill Spike
WEAKNESS: Solar Blaze

“TIME FOR A
COLD SNAP!”

WEAPON COPY

Before catching Roboenza, Chill Man's purpose was to observe arctic wildlife and use his abilities to stave off the melting of glaciers caused by global warming. Following the infection, however, he would use his Chill Spike ability to pepper the ground with icy spikes and entrap his foes. In addition, he can also pelt his enemies with shots of ice.

A photography enthusiast, Chill Man likes to spread the word about the importance of nature by publishing his pictures of nature's grandeur.

The Fourth Industrial Revolution Klaus Schwab, 2017-01-03
World renowned economist Klaus Schwab Founder and Executive Chairman of the World Economic Forum explains that we have an opportunity to shape the fourth industrial revolution which will fundamentally alter how we live and work Schwab argues that this revolution is different in scale scope and complexity from any that have come before Characterized by a range of new technologies that are fusing the physical digital and biological worlds the developments are affecting all disciplines economies industries and governments and even challenging ideas about what it means to be human Artificial intelligence is already all around us from supercomputers drones and virtual assistants to 3D printing DNA sequencing smart thermostats wear able sensors and microchips smaller than a grain of sand But this is just the beginning nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development Imagine smart factories in which global systems of manufacturing are coordinated virtually or implantable mobile phones made of biosynthetic materials The fourth industrial revolution says Schwab is more significant and its ramifications more profound than in any prior period of human history He outlines the key technologies driving this revolution and discusses the major impacts expected on government business civil society and individuals Schwab also offers bold ideas on how to harness these changes and shape a better future one in which technology empowers people rather than replaces them progress serves society rather than disrupts it and in which innovators respect moral and ethical boundaries rather than cross them We all
