Containing 97 percent of Earth's water supply, the ocean plays a huge role in regulating global temperatures, supporting plant and animal life, and contributing to the livelihoods of millions of people. But in spite of all this, the ocean remains drastically unexplored, and the details of its impact on human lives aren't fully understood. Scientists from around the world are realizing that to address issues plaguing the ocean, such as dead zones, coral bleaching, and climate change, we need to better understand this incredible, unique feature of our planet. With a range of impressive, cutting-edge technologies at their disposal, oceanographers have set out to measure, sample, and analyze at every turn. Every day, mysteries about the ocean are being solved, and every day, new questions come to light. The more scientists learn, the better they are able to answer these new questions. What lies in the deep? And who is at the forefront of these exciting discoveries? The scientists and research included in this book shed light on the most pressing issues currently facing oceanographers and point us in the right direction to solving these challenges. Joyce Carol Oates, a queen-pin of the noir genre, has brought

her keen and discerning eye to the curation of an outstanding anthology of brand-new top-shelf short stories (and poems by Margaret Atwood!). While bad men are not always the victims in these tales, they get their due often enough to satisfy readers who are sick and tired of the gendered status quo, or who just want to have a little bit of fun at the expense of a crumbling patriarchal society. This stylistically diverse collection will make you squirm in your seat, stay up at night, laugh out loud, and inevitably wish for more. With stories by: Joyce Carol Oates, Margaret Atwood (poems), Valerie Martin, Aimee Bender, Edwidge Danticat, Sheila Kohler, S.A. Solomon, S.J. Rozan, Lucy Taylor, Cassandra Khaw, Bernice L. McFadden, Jennifer Morales, Elizabeth McCracken, Livia Llewellyn, Lisa Lim, and Steph Cha. Praise for Cutting Edge “The indefatigable Joyce Carol Oates gathers a strong list of names . . . . Emerging and established authors provide attention-grabbing short works: especially notable are Edwidge Danticat's story on the quotidian horror of domestic violence, Bernice L. McFadden's comic take on the appropriation of racial friendship, and Lisa Lim's illustrations of a grotesque marriage.” —Alfred Hitchcock Mystery Magazine “But of course, in the end, it isn't the themes or the innovations on the format of the short story anthology that make the tales collected in Cutting Edge most “feel” as if you were reading Joyce Carol Oates herself. It is the writing. The tight plots and fresh, flowing prose that go about their business until—snap!—the story's well-oiled mousetrap does its job.” —New York Journal of Books “The 15 stories and six poems in this slim yet weighty all-original noir anthology . . . are razor-sharp and relentless in their portrayal of life, offering snapshots of dysfunction, everyday toil, and brief joy. It is unusual, however, in its scope, zeroing in not only on what

the female characters endure but what they dish out . . . . Each story sears but does not cauterize, leaving protagonists and readers raw . . . . Fans of contemporary crime fiction won't want to miss this one.” —Publishers Weekly Turn students into learning superheroes! Every student has superpowers hidden inside, and you hold the keys to unlock them. With this cutting-edge handbook, transform your classroom into a place where students don't just get an education—they use their powers to create it. Discover specific, ready-to-use instructional journeys that foster an inquiry-based, student-driven learning environment. Each research-based journey: Supports one of the student superpowers: Wondering, Curating, Designing, Digital Inking, Gaming, and Connecting Helps students become deep thinkers as required by the CCSS Includes step-by-step lesson frameworks, aligned with the Common Core, that fit into your regular day This is an elementary level text for learners of the English language.
