By claiming that it does not necessarily belong to any one mind in particular is inferring then that the self is not in fact a property. Then how can it be said to exist? Thomas Reid (Macquarie, lecture 17) also raises an important objection to Locke's theory of personal identity that seems fairly self-evident to me. We can consider a man as: a child, then in middle age and at old age. If the man in middle age can remember occurrences when he was a young boy, but now that he is an old man can't, then can he be considered a different person from the young boy?

Of Personal Identity Hume

According to Locke the old man is the same as the middle aged one, and the middle aged is the same as the child. Yet there is no continuity of consciousness between the three, any break in memory would render them a 'non-person' if we follow Locke's argument-clearly it is logically inconsistent. David Hume's 'bundle theory' of the self seems to me rather more logically coherent. He claimed that humans tend to think of themselves as the same person as they were, say, 10 years ago; that we believed that although one had evolved over the period in a number of ways that the self had endured.

According to Hume however, this was a mistake, and when examined empirically no more than a practical habit: "I never can catch myself at any time without a perception, and never observe anything but the perception"(TI, vi, p. 251). It is clear, posits Hume, our thoughts and perceptions flow from one idea to the next; so we encounter a 'bundle', or grouping, of perceptions throughout our life but no actual continuous and enduring underlying self- or "I" -as a 'unity of consciousness'.

While there is a stability of perceptions over the short term, and some loose association of experiences, there is no overarching continuity of "I" in reality. Hume agrees that we extend over time in actions, we begin a job and finish it some time later, and that our desires also extend in some sort of continuity over time. Furthermore our physical bodies endure reasonably consistently; we age gradually. This according to Hume is what ultimately defines our sense of personal identity. While Hume's theory of the self is attractive in my view, if anything it doesn't go far

Slors, 2013-03-14 The subject of personal and moral identity is at the centre of interest not only of academic research within disciplines such as philosophy and psychology but also of everyday thinking This is why the Netherlands School for Research in Practical Philosophy and the Institute for Ethics of the Vrije Universiteit in Amsterdam took the initiative to bring together scholars from various disciplines interested in the subject The expert seminar on Personal and Moral Identity took place from 12-14 January 1999 Financial contributions from the Vrije Universiteit the Dutch Scientific Organisation NWO and the Royal Dutch Academy for the Sciences KNAW made the event possible The chapters in this book either go back to papers presented at the seminar or were written afterwards by participants inspired by the discussions that took place during the seminar We are very grateful to Dr Hendrik Hutter for his assistance in editing the texts and making the manuscript camera ready December 2001 The Editors 1 Introduction Albert W Musschenga Although scholars studying the identity of persons usually address diverging issues and have different research agendas there is a growing awareness that one may benefit from insights and results present in other disciplines dealing with that subject This explains the enthusiastic responses to the invitation of the Netherlands School for Research in Practical Philosophy and the Institute for Ethics of the Vrije Universiteit to participate in a seminar on Personal and Moral Identity

Self-Identity and Everyday Life Harvie Ferguson, 2009-04-08 Identity and selfhood are terms routinely used throughout the human sciences that seek to analyze and describe the character of everyday life and experience Yet these terms are seldom defined or used with any precision and scant regard is paid to the historical and cultural context in which they arose or to which they are applied This innovative book provides fresh historical insights in terms of the emergence development and interrelationship of specific and varied notions of identity and selfhood and outlines a new sociological framework for analyzing it This is the first historical sociological framework for discussion of issues which have until now generally been treated as philosophy or psychology and as such it is essential reading for those undergraduates and postgraduates of sociology philosophy and history and cultural studies interested in the concepts of identity and self It covers a broader range of material than is usual in this style of text and includes a survey of relevant literature and precise analysis of key concepts written in a student friendly style

Persons and Personal Identity Amy Kind, 2015-10-02 As persons we are importantly different from all other creatures in the universe But in what exactly does this difference consist What kinds of entities are we and what makes each of us the same person today that we were yesterday Could we survive having all of our memories erased and replaced with false ones What about if our bodies were destroyed and our brains were transplanted into android bodies or if instead our minds were simply uploaded to computers In this engaging and accessible introduction to these important philosophical questions Amy Kind brings together three different areas of research the nature of personhood theories of personal identity over time and the constitution of self identity Surveying the key contemporary theories in the philosophical literature Kind analyzes and assesses their strengths and weaknesses As she shows our intuitions on these issues often pull us in different directions making it difficult to develop an adequate general theory Throughout her discussion Kind seamlessly interweaves a vast array of up to date examples drawn from both real life and popular fiction all of which greatly help to elucidate this central topic in metaphysics A perfect text for readers coming to these issues for the first time *Persons and Personal Identity* engages with some of the deepest and most important questions about human nature and our place in the world making it a vital resource for students and researchers alike

Staying Alive Marya Schechtman, 2014-03-14 Judgments of personal identity stand at the heart of our daily transactions Family life friendships institutions of justice and systems of compensation all rely on our ability to reidentify people It is not as obvious as it might at first appear just how to express this relation between facts about personal identity and practical interests in a philosophical account of personal identity A natural thought is that whatever relation is proposed as the one which constitutes the sameness of a person must be important to us in just the way identity is This simple understanding of the connection between personal identity and practical concerns has serious difficulties however One is that the relations that underlie our practical judgments do not seem suited to providing a metaphysical account of the basic literal continuation of an entity Another is that the practical interests we associate with identity are many and varied and it seems impossible that a single relation could simultaneously capture what is necessary and sufficient for all of them Staying Alive offers a new way of thinking about the relation between personal identity and practical interests which allows us to overcome these difficulties and to offer a view in which the most basic and literal facts about personal identity are inherently connected to practical concerns This account the Person Life View sees persons as unified loci of practical interaction and defines the identity of a person in terms of the unity of a characteristic kind of life made up of dynamic interactions among biological psychological and social attributes and functions mediated through social and cultural infrastructure
