Why Don't Students Like School? Daniel T. Willingham, 2009-06-10 Easy to apply scientifically based approaches for engaging students in the classroom Cognitive scientist Dan Willingham focuses his acclaimed research on the biological and cognitive basis of learning His book will help teachers improve their practice by explaining how they and their students think and learn It reveals the importance of story emotion memory context and routine in building knowledge and creating lasting learning experiences Nine easy to understand principles with clear applications for the classroom Includes surprising findings such as that intelligence is malleable and that you cannot develop thinking skills without facts How an understanding of the brain's workings can help teachers hone their teaching skills Mr Willingham's answers apply just as well outside the classroom Corporate trainers marketers and not least parents anyone who cares about how we learn should find his book valuable reading Wall Street Journal

How to Fall in Love with Anyone Mandy Len Catron, 2017-06-27 A beautifully written and well researched cultural criticism as well as an honest memoir Los Angeles Review of Books from the author of the popular New York Times essay To Fall in Love with Anyone Do This explores the romantic myths we create and explains how they limit our ability to achieve and sustain intimacy What really makes love last Does love ever work the way we say it does in movies and books and Facebook posts Or does obsessing over those love stories hurt our real life relationships When her parents divorced after a twenty eight year marriage and her own ten year relationship ended those were the questions that Mandy Len Catron wanted to answer In a series of candid vulnerable and wise essays that takes a closer look at what it means to love someone be loved and how we present our love to the world Catron melds science and emotion beautifully into a thoughtful and thought provoking meditation Bookpage She delves back to 1944 when her grandparents met in a coal mining town in Appalachia to her own dating life as a professor in Vancouver She uses biologists research into dopamine triggers to ask whether the need to love is an innate human drive She uses literary theory to show why we prefer certain kinds of love stories She urges us to question the unwritten scripts we follow in relationships and looks into where those scripts come from And she tells the story of how she decided to test an experiment that she'd read about where the goal was to create intimacy between strangers using a list of thirty six questions and ended up in the surreal situation of having millions of people following her brand new relationship Perfect fodder for the
