The Origin of Competitive Strength Akira Kawahara, 2012-12-06 When the war ended on August 15, 1945 I was a naval engineering cadet at the Kure Navy Yard near Hiroshima Japan A week later I was demobilized and returned to my home in Tokyo fortunate not to find it ravaged by firebombing At the beginning of September a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo Near my home I watched a procession of American military motor vehicles snaking along Highway 1 This truly awe inspiring cavalcade included jeeps two and a half ton trucks and enormous trailers mounted with tanks and artillery At the time I was a 21 year old student in the Machinery Section of Engineering at the Tokyo Imperial University Watching that magnificent parade of military vehicles I was more than impressed by the gap in industrial strength between Japan and the U S That realization led me to devote my whole life to the development of the Japanese auto industry I wrote a small article concerning this incident in Nikkei Sangyo Shimbun one of the leading business newspapers in Japan on May 2, 1983 The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital Journal and the September 13, 1983 issue of the Asian Wall Street Journal The Topeka Capital Journal headline read MacArthur's Jeeps Were the Toyota Catalyst

Permanent Magnet Motor Technology Jacek F. Gieras, 2009-08-25 The importance of permanent magnet PM motor technology and its impact on electromechanical drives has grown exponentially since the publication of the bestselling second edition The PM brushless motor market has grown considerably faster than the overall motion control market This rapid growth makes it essential for electrical and electromechanical engineers and students to stay up to date on developments in modern electrical motors and drives including their control simulation and CAD Reflecting innovations in the development of PM motors for electromechanical drives Permanent Magnet Motor Technology Design and Applications Third Edition demonstrates the construction of PM motor drives and supplies ready to implement solutions to common roadblocks along the way This edition supplies fundamental equations and calculations for determining and evaluating system performance efficiency reliability and cost It explores modern computer aided design of PM motors including the finite element approach and explains how to select PM motors to meet the specific requirements of electrical drives The

numerous examples models and diagrams provided in each chapter facilitate a lucid understanding of motor operations and characteristics This 3rd edition of a bestselling reference has been thoroughly revised to include Chapters on high speed motors and micromotors Advances in permanent magnet motor technology Additional numerical examples and illustrations An increased effort to bridge the gap between theory and industrial applications Modified research results The growing global trend toward energy conservation makes it quite possible that the era of the PM brushless motor drive is just around the corner This reference book will give engineers researchers and graduate level students the comprehensive understanding required to develop the breakthroughs that will push this exciting technology to the forefront

Biochar for Environmental Management Dr. Johannes Lehmann, Stephen Joseph, 2009 Biochar is the carbon rich product when biomass such as wood manure or crop residues is heated in a closed container with little or no available air It can be used to improve agriculture and the environment in several ways and its stability in soil and superior nutrient retention properties make it an ideal soil amendment to increase crop yields In addition to this biochar sequestration in combination with sustainable biomass production can be carbon negative and therefore used to actively remove carbon dioxide from the atmosphere with major implications for mitigation of climate change Biochar production can also be combined with bioenergy production through the use of the gases that are given off in the pyrolysis process This book is the first to synthesize the expanding research literature on this topic The book s interdisciplinary approach which covers engineering environmental sciences agricultural sciences economics and policy is a vital tool at this stage of biochar technology development This comprehensive overview of current knowledge will be of interest to advanced students researchers and professionals in a wide range of disciplines

Hydrogen Technology Aline Léon,2008-07-18 Aline Leon In the last years public attention was increasingly shifted by the media and world governments to the concepts of saving energy reducing pollution protecting the vironment and developing long term energy supply solutions In parallel research funding relating to alternative fuels and energy carriers is increasing on both tional and international levels Why has future energy supply become such a matter of concern The reasons are the problems created by the world s current energy supply s tem which is mainly based on fossil fuels In fact the energystored in hydrocarb based solid liquid and gaseous fuels was is and will be widely consumed for internal combustion engine based transportation for electricity and heat generation in

residential and industrial sectors and for the production of fertilizers in agriculture as it is convenient abundant and cheap. However such a widespread use of fossil fuels by a constantly growing world population from 2.3 billion in 1939 to 6.5 billion in 2006 gives rise to the two problems of oil supply and environmental degradation. The problem related to oil supply is caused by the fact that fossil fuels are not newable primary energy sources. This means that since the first barrel of petroleum has been pumped out from the ground we have been exhausting a heritage given by nature.
