Academic Writing Jun 30 2021 This book provides a foundation and framework to enhance your understanding of the various processes involved in academic writing. The term, academic writing, here refers to the types of writing used in college level writing courses at both the undergraduate and graduate level. However, this book was not written simply to help you pass another English class or to get you through the next writing intensive course (although it will certainly do that). At some point you will be out in the real world (hopefully). Thus, the purpose of this book is to enable you to be an effective writer and thinker in all contexts including your personal and professional lives.
