Lai,2016-03-09 Metaphor

has been an issue of intense research and debate for decades see for example 1 Researchers in various disciplines including linguistics psychology computer science education and philosophy have developed a variety of theories and much progress has been made 2 For one metaphor is no longer considered a rhetorical flourish that is found mainly in literary texts Rather linguists have shown that metaphor is a pervasive phenomenon in everyday language a major force in the development of new word meanings and the source of at least some grammatical function words 3 Indeed one of the most influential theories of metaphor involves the suggestion that the commonality of metaphoric language results because cross domain mappings are a major determinant in the organization of semantic memory as cognitive and neural resources for dealing with concrete domains are recruited for the conceptualization of more abstract ones 4 Researchers in cognitive neuroscience have explored whether particular kinds of brain damage are associated with metaphor production and comprehension deficits and whether similar brain regions are recruited when healthy adults understand the literal and metaphorical meanings of the same words see 5 for a review Whereas early research on this topic focused on the issue of the role of hemispheric asymmetry in the comprehension and production of metaphors 6 in recent years cognitive neuroscientists have argued that metaphor is not a monolithic category and that metaphor processing varies as a function of numerous factors including the novelty or conventionality of a particular metaphoric expression its part of speech and the extent of contextual support for the metaphoric meaning see e g 7 8 9 Moreover recent developments in cognitive neuroscience point to a sensorimotor basis for many concrete concepts and raise the issue of whether these mechanisms are ever recruited to process more abstract domains 10 This Frontiers Research Topic brings together contributions from researchers in cognitive neuroscience whose work involves the study of metaphor in language and thought in order to promote the development of the neuroscientific investigation of metaphor Adopting an interdisciplinary perspective it synthesizes current findings on the cognitive neuroscience of metaphor provides a forum for voicing novel perspectives and promotes avenues for new research on the metaphorical brain 1 Arbib M A 1989 The metaphorical brain 2 Neural networks and beyond John Wiley Sons Inc 2 Gibbs Jr R W Ed 2008 The Cambridge handbook of metaphor and thought Cambridge University Press 3 Sweetser Eve E Grammaticalization and semantic bleaching Annual Meeting of the Berkeley Linguistics Society Vol 14 2011 4 Lakoff G Johnson M 1999 Philosophy in the flesh The embodied mind and its challenge to western thought Basic books 5 Coulson S 2008 Metaphor comprehension and the brain The Cambridge handbook of metaphor and thought 177 194 6 Winner E Gardner H 1977 The comprehension of metaphor in brain damaged patients Brain 100 4 717 729 7 Coulson S Van Petten C 2007 A special role for the right hemisphere in metaphor comprehension ERP evidence from hemifield presentation Brain Research 1146 128 145 8 Lai V T Curran T Menn L 2009 Comprehending conventional and novel metaphors An ERP study Brain Research 1284 145 155 9 Schmidt G L Kranjec A Cardillo E R Chatterjee A 2010 Beyond laterality a critical assessment of research on the neural basis of metaphor Journal of the International Neuropsychological Society 16 01 1 5 10 Desai R H

Steel, Guy Guldentops, Pieter Beullens, 1999 Aristotle's zoological writings with their wealth of detailed investigations on diverse species of animals have fascinated medieval and Renaissance culture This volume explores how these texts have been read in various traditions Arabic Hebrew Latin and how they have been incorporated in different genres in philosophical and scientific treatises in florilegia and encyclopedias in theological symbolism in moral allegories and in manuscript illustrations This multidisciplinary and multilinguistic approach highlights substantial aspects of Aristotle's animals **National Electrical Code** National Fire Protection Association, 1998 Presents the latest electrical regulation code that is applicable for electrical wiring and equipment installation for all buildings covering emergency situations owner liability and procedures for ensuring public and workplace safety A Holistic Approach to Ship Design Apostolos Papanikolaou, 2018-12-11 This book introduces a holistic approach to ship design and its optimisation for life cycle operation It deals with the scientific background of the adopted approach and the associated synthesis model which follows modern computer aided engineering CAE procedures It integrates techno economic databases calculation and multi objective optimisation modules and software tools with a well established Computer Aided Design CAD platform along with a Virtual Vessel Framework VVF which will allow virtual testing before the building phase of a new vessel The resulting graphic user interface GUI and information exchange systems enable the exploration of the huge design space to a much larger extent and in less time than is currently possible thus leading to new insights and promising new design alternatives The book not only covers the various stages of the design of the main ship system but also addresses relevant major onboard systems components in terms of life cycle performance to offer readers a better understanding of suitable outfitting details which is a key aspect when it comes the outfitting intensive products of international shipyards The book disseminates results of the EU funded Horizon 2020 project HOLISHIP The Birth of Hedonism Kurt Lampe, 2014-10-26 According to Xenophon Socrates tried to persuade his associate Aristippus to moderate his excessive indulgence in wine women and food arguing that only hard work can bring happiness Aristippus wasn't convinced Instead he and his followers espoused the most radical form of hedonism in ancient Western philosophy Before the rise of the better known but comparatively ascetic Epicureans the Cyrenaics pursued a way of life in which moments of pleasure particularly bodily pleasure held the highest value In The Birth of Hedonism Kurt Lampe provides the most comprehensive account in any language of Cyrenaic ideas and behavior revolutionizing the understanding of this neglected but important school of philosophy The Birth of Hedonism thoroughly and sympathetically reconstructs the doctrines and practices of the Cyrenaics who were active between the fourth and third centuries BCE The book examines not only Aristippus and the mainstream Cyrenaics but also Hegesias Anniceris and Theodorus Contrary to recent scholarship the book shows that the Cyrenaics despite giving primary value to discrete pleasurable experiences accepted the dominant Greek

philosophical belief that life long happiness and the virtues that sustain it are the principal concerns of ethics The book also offers the first in depth effort to understand Theodorus s atheism and Hegesias s pessimism both of which are extremely unusual in ancient Greek philosophy and which raise the interesting question of hedonism s relationship to pessimism and atheism Finally the book explores the new Cyrenaicism of the nineteenth century writer and classicist Walter Pater who drew out the enduring philosophical interest of Cyrenaic hedonism more than any other modern thinker Anomalies and Curiosities of Medicine George Milbry Gould,Walter Lytle Pyle,1901 *The Marine Engineer* ,1882 *Practical Ship Design* D.G.M. Watson,2002-02-22 The ever growing demand for commercial activities at sea has meant that ships are rapidly developing and that the rules governing their construction and operation are changing Practical Ship Design records these changes their outcomes and the reasoning behind them It deals with every aspect of ship design and handles a wide range of both merchant ships and naval ships with authority It provides coverage of cargo ships and passenger ships tugs dredgers and other service craft It also includes concept design detail design structural design hydrodynamics design the effect of regulations the preparation of specifications and matters of costs and economics Drawing on the author s extensive practical experience Practical Ship Design is likely to interest everybody involved in the design construction repair and operation of ships Students and the most experienced professionals will all benefit from the book s vast store of design data and its conclusions and recommendations **Corrosion Failures** K. Elayaperumal,V. S. Raja,2015-04-27 Provides corrosion basics in a lucid manner to students and working professionals and over 80 corrosion failure analysis case studies Correlates Failure Analysis with Corrosion Science Exclusively provides corrosion related failure analysis case histories in one place in a convenient format One stop shop for both science and real time occurrence of the phenomenon of corrosion Full coverage of all MOC Materials of Construction used for process equipments Simple but Lucid presentation of Failure Analysis procedure How is Your MPA Doing? Robert S. Pomeroy,John E. Parks,Lani M. Watson,2004 Guidebook which aims to improve MPA management by providing a framework that links the goals and objectives of MPAs with indicators that measure management effectiveness The framework and indicators were field tested in 18 sites around the world and results of these pilots were incorporated into the guidebook Published as a result of a 4 year partnership of IUCN s World Commission on Protected Areas Marine World Wildlife Fund and the NOAA National Ocean Service International Program Office **Translating Style** Tim Parks,2014-06-03 Arising from a dissatisfaction with blandly general or abstrusely theoretical approaches to translation this book sets out to show through detailed and lively analysis what it really means to translate literary style Combining linguistic and lit crit approaches it proceeds through a series of interconnected chapters to analyse translations of the works of D H Lawrence Virginia Woolf James Joyce Samuel Beckett Henry Green and Barbara Pym Each chapter thus becomes an illuminating critical essay on the author concerned showing how divergences between original and translation tend to be of a different kind for each author depending on the nature of his or her inspiration This new and thoroughly

revised edition introduces a system of back translation that now makes Tim Parks highly praised book reader friendly even for those with little or no Italian An entirely new final chapter considers the profound effects that globalization and the search for an immediate international readership is having on both literary translation and literature itself *Practical Risk Management for EPC / Design-Build Projects* Walter A. Salmon,2020-02-25 Many of the books on construction risk management concentrate on theoretical approaches to the accurate assessment of the overall risks of taking on a new project Less attention is paid to the typical risks to which the operational level of a project is exposed and how operational managers should approach those risks during project implementation This book identifies precisely where the major EPC Design Build risks occur within an operational framework and shows how best to deal with those risks The book attempts to offer practical advice approaches and tools for dealing with risks to which the various operational departments are exposed **Four Centuries of Italian-American History** Giovanni Ermenegildo Schiavo,1955 *FTP Code* International Maritime Organization,2012 The 2010 FTP Code provides the international requirements for laboratory testing typeapproval and fire test procedures for products referenced under SOLAS chapter II 2 It comprehensively revises and updates the current Code adopted by the MSC in 1996 The 2010 FTP Code includes the following test for non combustibility test for smoke and toxicity test for A B and F class divisions test for fire door control systems test for surface flammability surface materials and primary deck coverings test for vertically supported textiles and films test for upholstered furniture test for bedding components test for fire restricting materials for high speed craft and test for fire resisting divisions of high speed craft It also includes annexes on Products which may be installed without testing and or approval and on Fire protection materials and required approval test methods **AWS D10. 12M/D10. 12-2000, Guide for Welding Mild Steel Pipe** American Welding Society,2000-01-01
