Transforming the Workforce for Children Birth Through Age 8 National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success, 2015-07-23

Children are already learning at birth and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress and the adults who provide for the care and the education of young children bear a great responsibility for their health development and learning. Despite the fact that they share the same objective to nurture young children and secure their future success, the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive and ultimately improve outcomes for children.

How Learning Works Susan A. Ambrose, Michael W. Bridges, Michele DiPietro, Marsha C. Lovett, Marie K. Norman, 2010-04-16

Praise for *How Learning Works*: *How Learning Works* is the perfect title for this excellent book. Drawing upon new research in psychology, education, and cognitive science, the authors have demystified a complex topic into clear explanations of seven powerful learning principles. Full of great ideas and practical suggestions, all based on solid research evidence, this book is essential reading for instructors at all levels who wish to improve their students' learning. Barbara Gross Davis, assistant vice chancellor for educational development, University of California Berkeley, and author *Tools for Teaching*. This book is a must-read for every instructor, new or experienced. Although I have been teaching for almost thirty years, as I read this book, I found myself resonating with many of its ideas, and I discovered new ways of thinking about teaching. Eugenia T. Paulus, professor of chemistry, North Hennepin Community College, and 2008 U.S. Community Colleges Professor of the Year from The Carnegie Foundation for the Advancement of Teaching and the Council for Advancement and Support of Education. Thank you, Carnegie Mellon, for making accessible what has previously been inaccessible to those of us who are not learning scientists. Your focus on the essence of learning, combined with concrete examples of the daily challenges of teaching and clear tactical strategies for faculty to consider, is a welcome work. I will recommend this book to all my colleagues. Catherine M. Casserly, senior partner, The Carnegie Foundation for the Advancement of Teaching. As you read about each of the seven basic learning principles in this book, you will find advice that is grounded in learning theory, based on research evidence relevant to college teaching, and easy to understand. The authors have extensive knowledge and experience in applying the science of learning to college teaching, and they graciously share it with you in this organized and readable book. From the Foreword by Richard E. Mayer, professor of psychology, University of California Santa Barbara, coauthor of *Learning and the Science of Instruction*, and author *Multimedia Learning*.
