Contributions to Philosophy Sep 26 2023 Heidegger's second magnum opus after *Being and Time*, laying the groundwork for his later writing, in a translation of "impeccable clarity and readability" (Peter Warnek). Martin Heidegger's *Contributions to Philosophy*, written in the late 1930s and published posthumously in 1989, is now widely viewed as his second magnum opus, after *Being and Time*. Here, Heidegger lays the groundwork for a new conception of thought and being, rooting them both in the event of appropriation. Here, Heidegger establishes the language and intellectual framework necessary for all of his later writings. *Contributions* was composed as a series of private ponderings that were not originally intended for publication. They are nonlinear and radically at odds with the traditional understanding of thinking. This translation presents Heidegger in plain and straightforward terms, allowing surer access to this new turn in Heidegger's conception of being.

Heidegger's Poietic Writings Sep 02 2021 Engaging the development of Heidegger's non-public writings on the event between 1936 and 1941, Daniela Vallega-Neu reveals what Heidegger's private writings kept hidden. Vallega-Neu takes readers on a journey through these volumes, which are not philosophical works in the traditional sense as they read more like fragments, collections of notes, reflections, and expositions. In them, Vallega-Neu sees Heidegger searching for a language that does not simply speak about being, but rather allows a

sense of being to emerge in his thinking and saying. She focuses on striking shifts in the tone and movement of Heidegger's thinking during these important years. Skillfully navigating the unorthodox and intimate character of these writings, Vallega-Neu provides critical insights into questions of attunement, language, the body, and historicity in Heidegger's thinking.

Contributions to Thought May 03 2024 A collection of essays and musings by William Willder Wheildon, covering topics ranging from philosophy to literature to science. Art Line Thought Nov 16 2022 Art Line Thought discusses the main issues that beset our time and philosophy by locating these same issues in artworks and describing closely what is shown there. While respecting their differences, art and philosophy are thus made to cross back and forth into one another, delineating in fresh ways our concerns about nature, the human and non-human, the body, femininity, ecology, technology, textism, the end of history, community, postmodernism, relativism and non-Eurocentric ethics. A 'philosophy of line' gathers these issues, opposing the current dominance of 'word' and linguistic analyses. Art has long been aware that the line communicates meaning at least as well as the word. The volume is divided between contemporary and prehistoric art in order to reveal the presumptions of 'Western' culture and how we might move beyond it. Since the book is a critique of Eurocentric thinking and prose, it works at finding new styles of both. Its philosophical meditation is directed equally to those who are intellectually interested in contemporary and prehistoric art, in theories of postmodern culture and criticism, and in anthropology.

Contributions to Philosophy (Of the Event) Mar 21 2023 Martin Heidegger's Contributions to

Philosophy reflects his famous philosophical "turning." In this work, Heidegger returns to the question of being from its inception in *Being and Time* to a new questioning of being as event. Heidegger opens up the essential dimensions of his thinking on the historicity of being that underlies all of his later writings. *Contributions* was composed as a series of private ponderings that were not originally intended for publication. They are nonlinear and radically at odds with the traditional understanding of thinking. This translation presents Heidegger in plain and straightforward terms, allowing surer access to this new turn in Heidegger's conception of being. *The Social Origins of Thought* Nov 04 2021 By studying how different societies understand categories such as time and causality, the Durkheimians decentered Western epistemology. With contributions from philosophy, sociology, anthropology, media studies, and sinology, this volume illustrates the interdisciplinarity and intellectual rigor of the "category project" which did not only stir controversies among contemporary scholars but paved the way for other theories exploring how the thoughts of individuals are prefigured by society and vice versa.

Distant Mental Influence Dec 06 2021 Professionals in modern psychology, behavioral medicine, and psychoneuroimmunology are exploring ways in which we can "mentally" influence our own bodies through hypnosis, imagery, visualization, attention, intention, and other forms of self-regulation--for fostering physical and psychological health and well-being. Is it possible for us to use such techniques to influence others, even at a distance, for purposes of healing? Is it possible for us to influence the images, thoughts, behaviors, and physiological reactions of other persons--separated by distance--without conventional sensory means of interaction? Can these abilities extend to animals and even to cells (e.g., human red blood cells)? Might these abilities be involved in the efficacy of distant, mental, or spiritual healing and intercessory prayer? Might these influences even extend to events distant in time--even "backwards in time?" Do these influences have major implications for our scientific theories, our human identity, the interconnections between ourselves and nature, and our relationships with others? Careful laboratory work--described in detail in this book--suggests that the answer to all these questions is a resounding "Yes!" A personal introduction and 12 detailed chapters describe the evidence that support these important claims. The book also describes the factors that make such distant mental influences more or less likely, so that anyone might use these distant influence skills more effectively and consistently for their own benefit and for the benefit of others.

The Emergency of Being Aug 02 2021 "The heart of history, for Heidegger, is not a sequence of occurrences but the eruption of significance at critical junctures that bring us into our own by making all being, including our being, into an urgent issue. In emergency, being emerges."—from *The Emergency of Being* *The esoteric Contributions to Philosophy*, often considered Martin Heidegger's second main work after *Being and Time*, is crucial to any interpretation of his thought. Here Heidegger proposes that being takes place as "appropriation." Richard Polt's independent-minded account of the *Contributions* interprets appropriation as an event of emergency that demands to be thought in a "future-subjunctive" mode. Polt explores the roots of appropriation in Heidegger's earlier philosophy; Heidegger's search for a way of thinking suited to appropriation; and the implications of appropriation for time, space, human existence, and beings as a whole. In his concluding chapter, Polt reflects critically on the difficulties of the radically antirationalist and antimodern thought of the *Contributions*. Polt's original reading neither reduces this challenging text to familiar concepts nor refutes it, but engages it in a confrontation—an encounter that respects a way of thinking by struggling with it. He describes this most private work of Heidegger's philosophy as "a dissonant symphony that imperfectly weaves together its moments into a vast fugue, under the leitmotif of appropriation. This fugue is

seeded with possibilities that are waiting for us, its listeners, to develop them. Some are dead ends—viruses that can lead only to a monolithic, monotonous misunderstanding of history. Others are embryonic insights that promise to deepen our thought, and perhaps our lives, if we find the right way to make them our own."

Lorine Niedecker Apr 09 2022 "The Brontës had their moors, I have my marshes," Lorine Niedecker wrote of flood-prone Black Hawk Island in Wisconsin, where she lived most of her life. Her life by water, as she called it, could not have been further removed from the avant-garde poetry scene where she also made a home. Niedecker is one of the most important poets of her generation and an essential member of the Objectivist circle. Her work attracted high praise from her peers--Marianne Moore, William Carlos Williams, Louis Zukofsky, Cid Corman, Clayton Eshleman--with whom she exchanged life-sustaining letters. Niedecker was also a major woman poet who interrogated issues of gender, domesticity, work, marriage, and sexual politics long before the modern feminist movement. Her marginal status, both geographically and as a woman, translates into a major poetry. Niedecker's lyric voice is one of the most subtle and sensuous of the twentieth century. Her ear is constantly alive to sounds of nature, oddities of vernacular speech, textures of vowels and consonants. Often compared to Emily Dickinson, Niedecker writes a poetry of wit and emotion, cosmopolitan experimentation and down-home American speech. This much-anticipated volume presents all of Niedecker's surviving poetry, plays, and creative prose in the sequence of their composition. It includes many poems previously unpublished in book form plus all of Niedecker's surviving 1930s surrealist work and her 1936-46 folk poetry, bringing to light the formative experimental phases of her early career. With an introduction that offers an account of the poet's life and notes that provide detailed textual information, this book will be the definitive reader's and scholar's edition of Niedecker's work.

Heidegger, Translation, and the Task of Thinking Feb 05 2022 Numerous volumes have been written on the philosophy of Martin Heidegger, and new translations of his writings appear on a regular basis. Up to now, however, no book has addressed the connections between Heidegger's thought and the hermeneutic methodology involved in translating his works - or any other text. Gathering essays by internationally recognized scholars, this volume examines the specific synergy that holds between Heidegger's thinking and the distinctive endeavor of translation. **Heidegger, Translation, and the Task of Thinking: Essays in Honor of Parvis Emad** offers scholars and students alike a rare journey into the insights and intricacies of one of the greatest philosophers of the twentieth century. The book also pays homage to Parvis Emad, Professor Emeritus of Philosophy at De Paul University, founder of the journal *Heidegger Studies* and a renowned translator of Heidegger's writings. **Heidegger, Translation, and the Task of Thinking: Essays in Honor of Parvis Emad** provides a uniquely focused perspective on Heidegger's thought, and delves into the strategies and controversies that attend all attempts to translate his most complex and challenging texts, including his seminal works *Contributions to Philosophy* and *Mindfulness*. Accordingly, this book will be of great interest and benefit to anyone working in the fields of phenomenology, hermeneutics, or Heidegger studies.

Heidegger's Contributions to Philosophy Aug 26 2023 "For those who want to think rigorously with Heidegger and with the movement of thinking set forth in *Contributions*, Vallega-Neu's book will prove to be an invaluable guide and resource. One of the great virtues of the book is its impeccable clarity and readability." -- Peter Warnek In her concise introduction to Martin Heidegger's second most important work, *Contributions to Philosophy (From Enowning)*, Daniela Vallega-Neu provides guidance and structure to readers attempting to navigate this much-discussed but difficult text. *Contributions* reflects Heidegger's struggle to think at the edge of words and to bring to language what remains beyond the written or the spoken. In view of the

centrality of Being and Time to Heidegger interpretation in recent decades, Vallega-Neu introduces Contributions first by reconsidering Being and Time in light of the transformative turn from prepositional thought to the poietic, performative character of thinking and language that marks the passage between the two works. She then discusses each of the "joinings" that structure the composition of Contributions. This graceful introduction provides students and scholars with a much-needed key for unlocking the thinking that underlies Heidegger's later writings.

Companion to Heidegger's Contributions to Philosophy Dec 18 2022 The publication of the first English translation of Martin Heidegger's Beiträge zur Philosophie (Vom Ereignis) marked a significant event for Heidegger studies. Considered by scholars to be his most important work after Being and Time, Contributions to Philosophy (From Enowning) elaborates what Heidegger calls "being-historical-thinking," a project in which he undertakes to reshape what it means both to think and to be. Contributions is an indispensable book for scholars and students of Heidegger, but it is also one of his most difficult because of its aphoristic style and unusual language. In this Companion 14 eminent Heidegger scholars share strategies for reading and understanding this challenging work. Overall approaches for becoming familiar with Heidegger's unique language and thinking are included, along with detailed readings of key sections of the work. Experienced readers and those coming to the text for the first time will find the Companion an invaluable guide to this pivotal text in Heidegger's philosophical corpus.

Philosophy's Moods: The Affective Grounds of Thinking May 11 2022 Philosophy's Moods is a collection of original essays interrogating the inseparable bond between mood and philosophical thinking. What is the relationship between mood and thinking in philosophy? In what sense are we always already philosophizing from within a mood? What kinds of mood are central for shaping the space of philosophy? What is the philosophical imprint of Aristotle's wonder, Kant's melancholy, Kierkegaard's anxiety or Nietzsche's shamelessness? Philosophy's Moods invites its readers to explore the above questions through diverse methodological perspectives. The collection includes twenty-one contributions by internationally renowned scholars as well as younger and emerging voices. In pondering the place of the subjective and personal roots that thinking is typically called to overcome, the book challenges and articulates an alternative to a predominant tendency in philosophy to view the theoretical content and the affective side of thought as opposed to one another.

On the Way to Heidegger's Contributions to Philosophy Oct 16 2022 One of the most significant philosophical works of the twentieth century, Contributions to Philosophy is also one of the most difficult. Parvis Emad, in this collection of interpretive and critical essays, unravels and clarifies this challenging work with a rare depth and originality. In addition to grappling with other commentaries on Heidegger, he highlights Heidegger's "being-historical thinking" as thinking that sheds new light on theological, technological, and scientific interpretations of reality. At the crux of Emad's interpretation is his elucidation of the issue of "the turning" in Heidegger's thought and his "enactment" of Heidegger's thinking. He finds that only when Heidegger's work is enacted is his thinking truly revealed.

Thinking in Tongues Jun 23 2023 The past several decades have seen a renaissance in Christian philosophy, led by the work of Alvin Plantinga, Nicholas Wolterstorff, William Alston, Eleonore Stump, and others. In the spirit of Plantinga's famous manifesto, Advice to Christian Philosophers, James K. A. Smith here offers not only advice to Pentecostal philosophers but also some Pentecostal advice to Christian philosophers. In this inaugural Pentecostal Manifestos volume Smith begins from the conviction that implicit in Pentecostal and charismatic spirituality is a tacit worldview or social imaginary. Thinking in Tongues unpacks and articulates the key elements of this Pentecostal worldview and then explores their implications for philosophical reflection on ontology, epistemology, aesthetics, language, science, and philosophy of religion. In each case, Smith demonstrates how the implicit wisdom of Pentecostal spirituality makes unique contributions to current conversations in Christian philosophy.

Contributions of Thought Dec 30 2023 Interest in alternative medical therapies and complimentary medicine has never been stronger than it is today, yet relatively few people are

aware that the premises underlying Osteopathic medicine are emerging as the leading edge thinking in the American medical community. In this book from Dr. William Garner Sutherland, the man considered to be the foremost thinker, teacher, researcher, and practitioner in the field of Osteopathy, the serious lay reader will learn the concepts, theories, and practices that represent the foundation of this exciting complimentary medical practice, a holistic philosophy that focuses on manipulation of the musculoskeletal system. This volume represents all the material Dr. Sutherland created regarding the science and practice of osteopathy.

American Accountants and Their Contributions to Accounting Thought (RLE Accounting)

May 30 2021 Accounting carries with its history a vast number of ideas which have slowly developed along with it. This volume relates this history as it took place during the first three decades of the twentieth century in the United States. In particular it deals with those individuals who were for the most part responsible for it. It was these pioneers who recorded their observations of the actual workings of the myriad adaptations and new devices which had slowly eased their way into accounting theory and practice in the USA in the early twentieth century.

Contributions of Thought Jul 05 2024 William Garner Sutherland came to study the osteopathy of Dr. Andrew Taylor Still in 1898 and found within that study a lifetime's work. This volume of his collected writings, Contributions of Thought, represents that work, which Adah Sutherland described in the preface to the first edition as depicting the progress of an "original thinker."

Against Ethics Sep 14 2022 A brilliant and witty postmodern critique of ethics, framed as a contemporary restaging of Kierkegaard's Fear and Trembling. John D. Caputo undertakes a passionate, poetic, and satiric search for the basis of an ethics in the postmodern situation. Restaging Kierkegaard's Fear and Trembling, Caputo defends the notion of obligation without ethics, of responsibility without the support of ethical foundations. Retelling the story of Abraham and Isaac, he strikes the pose of a postmodern-day Johannes de Silentio, accompanied by communications from such startling figures as Johanna de Silentio, Felix Sin culpa, and Magdalena de la Cruz. In dialogue with the thought of Kierkegaard, Nietzsche, Derrida, and Lyotard, Caputo forges a challenging, original account of what is possible and what is not possible for a continentalist ethics today. "Against Ethics is a bold work. . . . A counterethics whose multiple voices will be heard long after the trivializing arguments of many analytic

ethicists have vanished and the arcane formulations of many postmoderns have been jettisoned.”
—Edith Wyschogrod “Caputo provides a brilliant new analysis of the limits of ethics. . . .
Essential reading for anyone concerned with the philosophical issues raised in postmodernity.”
—Drucilla Cornell “One of the most important works on philosophical ethics written in recent
years. . . . Caputo speaks with a passion and concern that are rare in academic philosophy.”
—Mark C. Taylor “Against Ethics is beautifully written, clever, learned, thought-provoking, and
even inspiring.” —Theological Studies “Writing in the form of his ideas, Caputo offers the
reader a truly exquisite reading experience. . . . His iconic style mirrors a truly refreshing honesty
that draws the reader in to play.” —Quarterly Journal of Speech
