2. PURPOSE: To outline the guidelines, policies, and procedures for the 310th Quartermaster Detachment's Safety and Occupational Health (SOH) Performance plan objectives as per 4th ESC OPORD 004-14-002, Safety Performance Plan Objectives FY14. This program is a proactive and aggressive approach to ensure Safety is the number one priority in all operations. This SOP will address requirements and will apply to all personnel in this command; use the references listed above as guidance.

3. BACKGROUND: Safe operations start with unit readiness. Readiness depends on the ability of a unit to perform its mission-essential task list (METL) to standard. Ready units have self-disciplined Soldiers who consistently perform to standard; leaders who are ready, willing and able to enforce standards; training that provides skills needed for performance to standards; standards and procedures for task performance that are clear and practical; and support for task performance, including required equipment, maintenance, facilities, and services. Performing to standard is one of the key steps in preventing accidents. However, engaged leaders are aware that written standards may not exist for every task. Leaders must identify high risk tasks and review to ensure adequate standards exist and risks are mitigated. When safety is fully integrated in a unit, Soldier errors, equipment breakdowns, and the negative effects of the operating environment are kept to a minimum.

Manual for the Wheeled Vehicle Driver United States. Department of the Army,1975

The Infantry Rifle Platoon and Squad (FM 3-21. 8 / 7-8) Department of the Army,2015-12-31 This field manual provides doctrinal framework for how infantry rifle platoons and squads fight It also addresses rifle platoon and squad non combat operations across the spectrum of conflict Content discussions include principles tactics techniques procedures terms and symbols that apply to small unit operations in the current operational environment

Battle Focused Training (FM 7-1) Department of the Army, 2012-09-30 Battle Focused Training FM 7 1 is the Army's doctrinal foundation for how to train and it is applicable to all units and organizations of the Army. It explains how the Army assesses, plans, prepares, and executes training and leader development; it is critical to all the Army does. The goal of this manual is to create leaders who know how to think and apply enduring training principles to their units and organizations. FM 7 0 introduces the training cycle, the linkage of Army training and leader development, and the three domains where training occurs: the operational, institutional, and self-development domains. FM 7 1 defines The Army Training System, outlines who is responsible for training and training support, and describes how to conduct training. This top-to-bottom understanding of training, ranging from policy and resources allocation at Headquarters, Department of the Army, to unit and organization methods, is critical to executing training successfully and to linking the three domains where training occurs. The training doctrine in this manual will shape Army training regulations and support unit and organization training plans. The emphasis is on teaching leaders to think through the training process, as opposed to simply following a prescribed method. There is no training model or strategy that can achieve warfighting readiness in a unit without intensive leadership to build both competence and confidence. FM 7 1 builds on task condition and standards-based training. Knowing the task, assessing the level of proficiency against the standard, and developing a sustaining or improving training plan is the essence of all Army training and development. But warfighting readiness is about more than just technical competence. It is about developing confidence through trust: soldier to soldier, leader to leader, and unit to unit, and the will to succeed. It is about leadership. Understanding how to conduct tough, realistic training at every echelon of the Army sets the foundation for successful multi-echelon, joint, interagency, and coalition operations. Leaders train the unit and organizational capabilities required to fight and win across the full spectrum of operations. This manual provides leaders with the doctrinal guidelines for how to train and is the basis for successful training and operations. Soldiers have never let the nation fail; it is essential to train soldiers and units to uphold the Army's nonnegotiable contract with the American people to fight and win the nation's wars decisively.
