BOOKS OF THE YEAR by New York Public Library • Kirkus Reviews • Booklist • Publishers Weekly In this gorgeous debut graphic novel, fairy tales are the only way one boy can communicate with his Vietnamese immigrant parents. But how will he find the words to tell them that he's gay? A powerful read about family, identity and the enduring magic of stories. "One of the most astounding graphic novels of the year" -Entertainment Weekly Tien and his mother may come from different cultures—she's an immigrant from Vietnam still struggling with English; he's been raised in America—but through the fairy tales he checks out from

the local library, those differences are erased. But as much as Tien's mother's English continues to improve as he reads her tales of love, loss, and travel across distant shores, there's one conversation that still eludes him—how to come out to her and his father. Is there even a way to explain what he's going through in Vietnamese? And without a way to reveal his hidden self, how will his parents ever accept him? This beautifully illustrated graphic novel speaks to the complexity of family and how stories can bring us together even when we don't know the words. "A lyrical masterpiece."
-BuzzFeed The ancient

Egyptians regarded the animal kingdom with great interest and in this, the first book of its kind, Patrick Houlihan looks at the fauna and their relationship with the people in the religious, cultural and social contexts. Like Twain -- or more contemporary humorists Dave Barry and Garrison Keillor -- Patrick McManus shares the belief that life's eternal verities exist primarily to be overturned. In McManus's world, all steaks should be chicken-fried, strong coffee is drunk by the light of a campfire, and fishing trips consist of men acting like boys and boys behaving like the small animals we've always assumed they were. In this, the

tenth hilarious collection of his adventures, wry observations, and curmudgeonly calls for bigger and bigger fish stories, McManus takes on everything from an Idaho crime wave to his friend Dolph's atomic-powered huckleberry picker to the uncertain joys of standing waist-deep in icy water, watching the fish go by. Three volumes: *A Fine and Pleasant Misery*, *Never Sniff a Gift Fish*, *They Shoot Canoies Don't they?* "National Geographic Explorer-in-Residence Enric Sala takes readers on an unforgettable journey to 10 places where the ocean is virtually untouched by man, offering a fascinating glimpse into our past and an inspiring vision for the future.

From the shark-rich waters surrounding Coco Island, Costa Rica, to the iceberg-studded sea off Franz Josef Land, Russia, this incredible photographic collection showcases the thriving marine ecosystems that Sala is working to protect. Offering a rare glimpse into the world's underwater Edens, more than 200 images take you to the frontier of the Pristine Seas expeditions, where Sala's teams explore the breathtaking wildlife and habitats from the depths to the surface--thriving ecosystems with healthy corals and a kaleidoscopic variety of colorful fish and stunning creatures that have been protected from human

interference. With this dazzling array of photographs that capture the beauty of the water and the incredible wildlife within it, this book shows us the brilliance of the sea in its natural state."-- *DIVFifty* million Americans go fishing every year. But why? Pavlov's Trout answers that question and many more as it examines the mysteries of the sport of fishing through the microscope of modern psychology. Eminent psychologist and veteran fisherman Paul Quinnett, Ph.D., explores the many, often mysterious, motivations that attract millions to the sport of fishing. In this lighthearted and insightful book, Quinnett postulates that people fish to

satisfy primitive instinct, connect to the wilderness, relieve stress, and to experience the optimism, freedom, and excitement of the pursuit. Pavlov's Trout is truly a fishing book like no other -- a venturing into the world of the psyche of the angler, a world where it is better to fish hopefully than to catch fish./div From the acclaimed author of *Maybe He Just Likes You* and *Halfway Normal* comes a "compassionate...touching" (Donna Gephart, award-winning author of *The Paris Project*) and powerful story of learning how to grow, change, and survive. When twelve-year-old Zinnia Manning's older brother Gabriel is diagnosed

with a mental illness, the family's world is turned upside down. Mom and Dad want Zinny, her sixteen-year-old sister, Scarlett, and her eight-year-old brother, Aiden, to keep Gabriel's condition "private"—and to Zinny that sounds the same as "secret." Which means she can't talk about it with her two best friends, who don't understand why Zinny keeps pushing them away, turning everything into a joke. It also means she can't talk about it during Lunch Club, a group run by the school guidance counselor. How did Zinny get stuck in this weird club, anyway? She certainly doesn't have anything in common with these kids—and

even if she did, she'd never betray her family's secret. The only good thing about school is science class, where cool teacher Ms. Molina has them doing experiments on crayfish. And when Zinny has the chance to attend a dream marine biology camp for the summer, she doesn't know what to do. How can Zinny move forward when Gabriel—and, really, her whole family—still needs her help? Patrick McManus, the bestselling author of such hilarious books as *A Fine and Pleasant Misery* and *Never Sniff a Gift Fish*, now offers readers solid thoughts on the qualities that define leadership, beginning with the need to be tall, and much more, in this

outrageous collection of short pieces that reveals his tortuous trip along the writer's path. More humorous observations and insights into the agonies and ecstasies of hunting, fishing, and camping by the author of *They Shoot Canoes, Don't They?* and other celebrations of life in the wild.

From the author of *Empire of Pain*—a stunning, intricate narrative about a notorious killing in Northern Ireland and its devastating repercussions.

"Masked intruders dragged

Jean McConville, a 38-year-old widow and mother of 10, from her Belfast home in 1972. In this meticulously reported book—as finely paced as a novel—Keefe uses McConville's murder as a prism to tell the history of the Troubles in Northern Ireland. Interviewing people on both sides of the conflict, he transforms the tragic damage and waste of the era into a searing, utterly gripping saga." —New York Times Book Review "Reads like a novel ... Keefe is ... a master of narrative nonfiction. . . . An incredible story." —Rolling Stone A Best Book of the Year: The New York Times, The Washington Post, The Wall Street Journal, TIME, NPR, and

more! Jean McConville's abduction was one of the most notorious episodes of the vicious conflict known as The Troubles. Everyone in the neighborhood knew the I.R.A. was responsible. But in a climate of fear and paranoia, no one would speak of it. In 2003, five years after an accord brought an uneasy peace to Northern Ireland, a set of human bones was discovered on a beach. McConville's children knew it was their mother when they were told a blue safety pin was attached to the dress—with so many kids, she had always kept it handy for diapers or ripped clothes. Patrick Radden Keefe's mesmerizing book on the bitter

conflict in Northern Ireland and its aftermath uses the McConville case as a starting point for the tale of a society wracked by a violent guerrilla war, a war whose consequences have never been reckoned with. The brutal violence seared not only people like the McConville children, but also I.R.A. members embittered by a peace that fell far short of the goal of a united Ireland, and left them wondering whether the killings they committed were not justified acts of war, but simple murders. From radical and impetuous I.R.A. terrorists such as Dolours Price, who, when she was barely out of her teens, was already planting bombs in

London and targeting informers for execution, to the ferocious I.R.A. mastermind known as The Dark, to the spy games and dirty schemes of the British Army, to Gerry Adams, who negotiated the peace but betrayed his hardcore comrades by denying his I.R.A. past--Say Nothing conjures a world of passion, betrayal, vengeance, and anguish. Writer and humor columnist McManus delivers the second, eagerly awaited book in his quirky, bestselling mystery series. The debut cookbook by the creator of the wildly popular blog Damn Delicious proves that quick and easy doesn't have to mean boring. Blogger Chungah Rhee has attracted millions of

devoted fans with recipes that are undeniable 'keepers'-each one so simple, so easy, and so flavor-packed, that you reach for them busy night after busy night. In Damn Delicious, she shares exclusive new recipes as well as her most beloved dishes, all designed to bring fun and excitement into everyday cooking. From five-ingredient Mini Deep Dish Pizzas to no-fuss Sheet Pan Steak & Veggies and 20-minute Spaghetti Carbonara, the recipes will help even the most inexperienced cooks spend less time in the kitchen and more time around the table. Packed with quickie breakfasts, 30-minute skillet sprints, and speedy takeout copycats, this

cookbook is guaranteed to inspire readers to whip up fast, healthy, homemade meals that are truly 'damn delicious!' Memoirs blend fact and fiction including recipes for edible and not-so-edible dishes An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students. This was the first effort to standardize methods for inland fish sampling across North America and, as such, was a joint effort contributed to by a large group of talented and dedicated individuals, in addition to the authors and coeditors. While these sampling methods were primarily developed for North

America, most could be used with little or no modification in other areas of the world. Those involved with standard sampling efforts in North America would welcome the opportunity to collaborate with scientists from other regions to develop methods to share data worldwide. Here are the hilarious tales of a sportsman's life in the great and often not-so great outdoors. McManus offers more cracker-barrel wisdom and zany insights into the agonies and ecstasies of hunting, fishing, and camping. The Behavior and Ecology of Pacific Salmon and Trout explains the patterns of mate choice, the competition for nest sites, and the fate of the

salmon after their death. It describes the lives of offspring during the months they spend incubating in gravel, growing in fresh water, and migrating out to sea to mature. This thorough, up-to-date survey should be on the shelf of everyone with a professional or personal interest in Pacific salmon and trout. Written in a technically accurate but engaging style, it will appeal to a wide range of readers, including students, anglers, biologists, conservationists, legislators, and armchair naturalists. America's best-selling outdoor humorist for adults has a secret following: middle-grade and young-adult readers. Never Cry "Arp!" is a

lively collection of twelve stories about young Pat's misadventures in the Great American Wilderness. All the McManus regulars are here: Crazy Eddie Muldoon, the best friend everybody wishes they had (and everybody's mother wishes they didn't); Rancid Crabtree, the good-hearted, if gamey, woodsman; Pat's skunk dog, Strange, who lives up to his name; and Pat's pal, Retch Sweeney, who does, too. This is a book for kids who love to start fishing at 4am (at least they say they do) or for those who prefer to experience the mighty outdoors in the safety of their homes. "Everybody should read Patrick McManus," said the New York Times. Now,

everybody can. This edition contains summaries and an index of Patrick F. McManus's humorous essays and novels. Billy is a lonely boy. He's obsessed with swimming in the sea, which is where he goes to wash his problems far, far away. Thanks to his mum's mystery illness, his dad has been forced to work extra hours to make ends meet, so Billy locks himself away with David Attenborough films, and ponders the magic of nature. Meanwhile at school, bullies mercilessly seize on Billy's 'otherness' and make his life as miserable as possible - but then new boy Patrick Green, with "fingers like steel, strength of a bear", joins Billy's class. And

when a mackerel swims up to Billy's face, blows bubbles into his Vista Clear Mask goggles and says: Fish Boy - Billy's whole world changes. The intake of food by fishes is an area of study that is of great importance to the applied sciences of fisheries and aquaculture for a number of reasons. For example a thorough knowledge of factors influencing the ingestion of feed can lead to successful manipulation of the rearing environment of cultured fishes, thereby ensuring improved growth performance and feed utilisation, and decreasing the amount of waste (and consequent pollution) per unit of fish produced. This

important book, which has arisen out of a European Union COST programme, illustrates how insights into the biological and environmental factors that underlie the feeding responses of fish may be used to address practical issues of feed management. Food Intake in Fish contains carefully edited contributions from internationally recognised scientists, providing a book that is an invaluable tool and reference to all those involved in aquaculture, especially those working in the aquaculture feed industry and scientific personnel in commercial and research aquaculture facilities. This book should also find a place on the shelves of fish

biologists and physiologists and as a reference in libraries of universities, research establishments and aquaculture equipment companies. Celebrate St. Patrick's Day in this installment of Natasha Wing's best-selling series, a fun read-aloud sure to keep kids engaged and laughing out loud! It's the night before St. Patrick's Day, and Tim and Maureen are wide awake setting traps to catch a leprechaun! When they wake the next morning to the sound of their dad playing the bagpipes and the smell of their mom cooking green eggs, they're shocked to find that they've actually caught a

leprechaun. But will they be able to find his pot of gold? Natasha Wing's sweet story is once again told in verse to the same meter of Clement Moore's classic. Patrick McManus, the bestselling author of such hilarious books as A Fine and Pleasant Misery and Never Sniff a Gift Fish, now offers readers solid thoughts on the qualities that define leadership, beginning with the need to be tall, and much more, in this outrageous collection of short pieces that reveals his tortuous trip along the writer's path. "In McManus's world, all steaks would be chicken-fried, strong coffee is drunk by the light of a campfire, and fishing trips

consist of men acting like boys and boys behaving like the small animals we've always assumed them to be."--Jacket. Witty cautionary tales of outdoor life. Patrick F. McManus, the "funniest guy in the Outdoor Life and Field & Stream gang...offers another bag of whimsy in the Great Outdoors"* with The Grasshopper Trap. In this collection of thirty zany stories, spoofing camping, fishing, and other outdoor recreational activities, McManus shares his

hilarious wilderness misadventures. From facing an angry bear with an unloaded gun and the folly of running a boat while it's still on the trailer to not questioning the ingredients found in camp cookout cuisine and the best methods of catching grasshoppers, no one knows how to express Mother Nature's sense of humor like Patrick F. McManus. "It's enough to tickle the most rabid member of the National Rifle Association."—*Kirkus Reviews Offers a humorous collection of tales, including "Muldoon in Love," a story that features a teacher who wore the same suit to school for thirty years. More humorous observations

and insights into the agonies and ecstasies of hunting, fishing, and camping by the author of *They Shoot Canoes, Don't They?* and other celebrations of life in the wild. Bestsellers by America's favorite humorist: *A Fine And Pleasant Misery They Shoot Canoes, Don't They?* *Never Sniff A Gift Fish The Grasshopper Trap Rubber Legs And White Tail-hairs The Night The Bear Ate Goombaw Whatchagot Stew* (with Patricia "The Troll" McManus Gass) *Real Ponies Don't Go Oink The Good Samaritan Strikes Again How I Got This Way* These titles are available from Henry Hold and Company. The beloved humorist and

bestselling author returns with his most riotous collection of essays to date. Overflowing with his trademark outdoorsman's wit, Patrick F. McManus's newest collection ponders the strange allure of the RV, the existential implications of being lost, the baffling tendency of animals to outsmart those who wish to hunt them, and the singular pleasure of doubling the size of every fish one doesn't actually catch. Combining the curmudgeonly voice of Dave Barry and the sly humor of Garrison Keillor, McManus brilliantly captures the everyday absurdities that comprise our existence. Alongside his humor,

McManus's inimitable vision consistently evokes a childlike wonder at the natural world. Even if we are running low on food, the compass is broken, and we are fairly certain we have just spotted a family of Sasquatches frolicking in the treetops, *The Bear in the Attic* makes the outdoors seem irresistible. A Finalist for the Los Angeles Times Book Prize National Bestseller Winner of the National Outdoor Book Award Longlisted for the Andrew Carnegie Medal for Excellence in Nonfiction A New York Times Notable Book One of TIME's 100 Must Read Books of the Year One of The Washington Post's 50 Notable Nonfiction Books of the Year

One of Smithsonian Magazine's 10 Best Science Books of the Year One of Publishers Weekly's Best Nonfiction Books of the Year A New York Times Editor's Choice Part H Is for Hawk, part The Soul of an Octopus, *The Book of Eels* is both a meditation on the world's most elusive fish—the eel—and a reflection on the human condition Remarkably little is known about the European eel, *Anguilla anguilla*. So little, in fact, that scientists and philosophers have, for centuries, been obsessed with what has become known as the “eel question”: Where do eels come from? What are they? Are they fish or some other kind of

creature altogether? Even today, in an age of advanced science, no one has ever seen eels mating or giving birth, and we still don't understand what drives them, after living for decades in freshwater, to swim great distances back to the ocean at the end of their lives. They remain a mystery. Drawing on a breadth of research about eels in literature, history, and modern marine biology, as well as his own experience fishing for eels with his father, Patrik Svensson crafts a mesmerizing portrait of an unusual, utterly misunderstood, and completely captivating animal. In *The Book of Eels*, we meet renowned historical thinkers, from

Aristotle to Sigmund Freud to Rachel Carson, for whom the eel was a singular obsession. And we meet the scientists who spearheaded the search for the eel's point of origin, including Danish marine biologist Johannes Schmidt, who led research efforts in the early twentieth century, catching thousands upon thousands of eels, in the hopes of proving their birthing grounds in the Sargasso Sea. Blending memoir and nature writing at its best, Svensson's journey to understand the eel becomes an exploration of the human condition that delves into overarching issues about our roots and destiny, both as humans and as animals, and,

ultimately, how to handle the biggest question of all: death. The result is a gripping and slippery narrative that will surprise and enchant. Presents a collection of curmudgeonly tales on Pacific Northwest country living as enjoyed by both outdoorsmen and armchair enthusiasts, in a volume that explores the lighter side of such topics as gun safes, fly tying, and bird dog flatulence. Focusing on pathobiology and protective strategies against protozoan and metazoan parasites of fish, this book reviews the latest research on important parasites: those that cause financial hardships to the aquaculture industry, have

been introduced to new geographical regions through transportation of infected fish, are pathogenic to groups of finfish and detrimental to production, are highly adaptable and not host-specific with worldwide distributions, and that may serve as disease models for studies on other pathogens. It also highlights gaps in the knowledge to help direct future research. With tongue pressed firmly in cheek and a gentle but penetrating eye for human foibles, Patrick F. McManus celebrates the hidden pleasures, unappreciated lore, and opportunities for disaster to be found in the recreations of camping, hunting, and fishing

in his hilarious collection *They Shoot Canoes, Don't They?* Gathered here for the reader's edification are such treasures as the true but little known story of the discovery of the efficacy of live bait by Genghis Khan's chef, an examination of the precarious and perhaps fanatical expertise required for ice fishing, and a consideration of the circumstances that can cause a deer to ride a bicycle. Among additional topics explored are *The Crouch Hop and Other Useful Outdoor Steps*, *The Sensuous Angler*, and *Psychic Powers for Outdoorsmen*. Included, too, is *The Hunter's Dictionary*, an invaluable lexicon that helps the novice sportsman

understand such arcane terminology as "Ooooooeeee-ah-ah-ah! (If there's one thing I hate, it's putting on cold, wet pants in the morning)" and "Baff mast pime ig bead feas mid miff pife! (That's the last time I try to eat peas in the dark with my hunting knife!)" The author's appreciation of outdoor life began in his early boyhood, when he absorbed a wealth of improbable information imparted by the old woodsman Rancid Crabtree, "who bathed only on leap years." Young McManus also enjoyed special adventures with his ill-remembered sidekick, Retch Sweeney, and another boon companion of days gone by, the loquacious

family dog, Strange, whose exploits as a hunter were limited to assaulting stray chickens and on one memorable occasion a skunk. "McManus here follows up *A Fine and Pleasant Misery* with a collection of sketches that launches him into the front ranks of outdoor humorists."—*Library Journal* *The Horse in My Garage and Other Stories* is a hilarious addition to Patrick F. McManus's existing work in humor. The author weighs in on his childhood, everyday life, and outdoor tales with his typical exaggerated commentary that will elicit a belly laugh from all types of readers. Read about the antics

of Patrick's friends Rancid Crabtree and Retch Sweeney in such stories as "Shaping Up for the Hunt" and "Bear Hunters." McManus plays off the recent obsession with hoarders in his surprising story "The Lady Who Kept Things." In the titular story, meet Patrick's horse, Huckleberry, and enjoy the experience of all the problems that come along with owning your own horse—or keeping him in the garage. Other great stories include: "Catch-And-Eaters," about the importance of a forked stick when fishing "\$7000 TV Historical Extravaganza," a look at one director's loose interpretation of historical accuracy and political correctness "A Lake

Too Far," concerning the woes of Patrick and his wife, Bun, on a fateful birding trip in Australia "Chicken Chronicles," which involves Patrick's memory of wandering around naked in the chicken yard when guests came to call So pull up a chair, sit back, and enjoy laughing to the hilarious adventures of Patrick F. McManus in *The Horse in My Garage and Other Stories*. America's "most gifted outdoor humorist" (Detroit Free Press) regales readers with this collection of gut-busting, man vs. nature tales originally published in such magazines as *Field & Stream* and *Outdoor Living*. Patrick F. McManus's hilarious and comic stories of

camping and other nature-oriented activities reach ridiculous proportions in *The Night the Bear Ate Goombaw*. From teaching his stepfather the methods of madness behind farm work through his best friend's grandmother's fear of bears, McManus reveals that human behavior is even wilder than the wilderness. Humorous essays about the joys and irritations of outdoor life range from the art of wrestling toads to pondering the philosophical nature of being lost.
